ı	2		2	give will be the truth, the whole truth, and
l	3	COURT REPORTER: On record. My name is Sydney	3	nothing but the truth?
l	4	Little. I'm the online video technician and court	4	THE WITNESS: I do.
l	5	reporter today representing Kentuckiana Court	5	COURT REPORTER: Thank you. Counsel, you may
l	6	Reporters, located at 730 West Main Street, Suite	6	begin.
l	7	101, Louisville, Kentucky 40202. Today is the 3rd	7	DIRECT EXAMINATION
l	8	day of March 2022. The time is 10:21 a.m. We are	8	BY MR. WEIL:
l	9	convened by video conference to take the deposition	9	Q Ms. Pisney, good morning. My name is Stephen
l	10	of Lisa Pisney, in the matter of Gregory Boyer as	10	Weil. I represent the plaintiff, as you've just heard.
l	11	Administrator of the Estate of Christine Boyer, and	11	Have you ever been deposed before?
l	12	on his own behalf versus Advanced Correctional	12	A No.
l	13	Healthcare, Inc., et al., pending in the United	13	Q I expect that your Counsel talked to you about
l	14	States District Court for the Western District of	14	how to sit for a deposition. There are several rules
l	15	Wisconsin, case number 20-CV-1123. Will everyone,	15	that make this different from a normal conversation. You
l	16	but the witness, please state your appearance, how	16	understand that you're under oath today; is that right?
l	17	you're attending, and the location you're attending	17	A Yes.
l	18	from, starting with plaintiff's counsel?	18	Q And your answers that you give at this
l	19	MR. WEIL: Good morning. My is Stephen Weil.	19	deposition will have the same effect, as if they were in
l	20	I'm with the firm Loevy & Loevy. I represent the	20	a court of law, do you understand that?
l	21	plaintiff. I'm attending via video from Chicago,	21	A Yes. I am I understand.
l	22	Illinois.	22	Q The perhaps the most important rule of the
l	23	MR. MCCAULEY: Good morning. I'm John	23	deposition is that, unlike normal conversations that you
l	24	McCauley, with the Hansen Reynolds law firm. I'm	24	have out in the world, this conversation is being taken
l	25	appearing by video from Madison, Wisconsin. I	25	down by a court reporter. That means that it's
İ		Page 7		Page 9
l	1	represent Monroe County and Stan Hendrickson,	1	important for the two of us not to talk over each other.
l	2	Shasta Parker, and Danielle Warren.	2	It's natural for people to anticipate answers and
l	3	MR. KNOTT: I'm Doug Knott from the law firm	3	questions. In normal conversation, that's not rude.
l	4	of Leib Knott Gaynor in Milwaukee. I represent	4	It's just something that happens, but a court reporter
l	5	Advanced Correctional Healthcare, Ms. Pisney, and	5	cannot take down two people talking at the same time. I,
l	6	Ms. Fennigkoh, and I'm at the Milwaukee County	6	therefore, ask that you wait until I'm finishing with my
l	7	Sheriff's Office in Sparta.	7	I've finished with my question before you answer it,
l	8	THE WITNESS: Monroe County.	8	and I'll do my best to wait for you to finish your
l	9	MR. KNOTT: What?	9	answer before I ask another question, does that make
l	10	THE WITNESS: You said Milwaukee. It's Monroe	10	sense?
l	11	County, right?	11	A Yes.
l	12	MR. KNOTT: Right. Okay.	12	Q The lawyers may object from time to time in
l	13	THE WITNESS: All right. Thank you very much.	13	this deposition. That's part of preserving legal rights
l	14	MR. KNOTT: I don't know what I said, but	14	in the case, but you must still answer the questions
l	15	we're all here.	15	that I ask you unless your lawyer instructs you not to,
l	16	COURT REPORTER: Ms. Pisney, please state your	16	does that make sense?
l	17	name for the record.	17	A Yes.
	18	THE WITNESS: Lisa Pisney.	18	Q Okay. You should keep your answers verbal and
	19	COURT REPORTER: Do all parties agree and	19	audible. Shakes of the head and uh-huh are hard to
	20	stipulate that the witness is, in fact, Lisa	20	record on a transcript, even though we do have a video,
	21	Pisney?	21	does that make sense?
	22	MR. KNOTT: Yes.	22	A Yes.
	23	MR. WEIL: Plaintiff stipulates.	23	Q Okay. You're entitled to take breaks during
	0.4			- 11:00 June 1:00 - 1:00 - 1:00 - 1:00 - 1:00 - 1:00 - 1:00 - 1:00 - 1:00 - 1:00 - 1:00 - 1:00 - 1:00 - 1:00 -

25 you please raise your right hand? Do you solemnly

24

COURT REPORTER: Thank you. Ms. Pisney, will

24 this deposition. It's not an endurance test. I would

25 ask that before you take a break, you answer any

	Page 10		Page 12
1	questions pending, does that make sense?	1	Christine Boyer had a serious medical condition, while
2	A Yes.	2	she was in the jail?
3	Q There are rules governing when you can talk to	3	MR. KNOTT: Object to the form of the
4	your lawyers during the course of a deposition. And I	4	question, vague as to time. Object to the extent
5	reserve the right to ask you about any discussions you	5	it calls for legal conclusion. It's also vague as
6	had with your lawyer during a break, does that make	6	to the phrase, "Serious medical condition."
7	sense?	7	Counsel, could you specify a time frame?
8	A Yes.	8	MR. WEIL: Just like I said, "While she was in
9	Q Do you have any conditions that might affect	9	the jail."
10	your ability to provide truthful and accurate testimony	10	A Not the entire time she was in the jail, I
11	today?	11	don't believe so.
12	A No.	12	BY MR. WEIL:
13	Q Any conditions affecting your memory or any	13	Q Okay. What at what time during the time
14	medications that you might be on, that might affect your	14	she was at the jail, did Christie Boyer have a serious
15	ability to provide truthful and accurate testimony?	15	medical condition?
16	A No.	16	MR. KNOTT: Same objections.
17	Q Where do you currently work?	17	A When when she coded. That was a serious
18	A I work for UnityPoint out of Waterloo and I	18	medical condition.
19	work at the John Deere Waterloo Works as their	19	Q Any other time?
20	occupational health nurse practitioner.	20	MR. KNOTT: Same objections.
21	Q What is UnityPoint?	21	MR. MCCAULEY: Joined.
22	A It's a health conglomerate that owns a	22	A Prior to that, I don't believe she I had
23	hospital in multiple places. They have	23	any indication that she had a more serious condition.
24	Q You said you work in I'm sorry. I broke	24	Q Sitting here today, do you believe that she
25	the rule already. Go ahead.	25	did have a serious medical condition, before she coded?

A That that would require me to know things now that I didn't know then.

14..17 Page 16 Page 14 1 MR. KNOTT: Yeah. Same objections as was called with an elevated blood pressure for her. We 1 2 previously stated. 2 treated her with medications for the elevated blood I mean, everyone else knows more in hindsight. pressure. I asked them to recheck her blood pressure in 3 3 I mean, I've gotten more information about her medical half an hour and call me back. That was done. They condition since the -- since her entry into the jail. then -- I then asked them to recheck again in an hour, 5 5 BY MR. WEIL: and if the blood pressure was above 160 over 100, to 6 6 7 give another medication. And then I believe they called And given the information you've received, 7 8 what do you believe now? 8 me later that day -- or that evening with some MR. KNOTT: Same objections. And vague as to complaints of chest pain. We talked about that. I gave 9 9 10 time. It's also irrelevant, but answer if you're 10 her aspirin, and asked them to recheck her blood 11 able. 11 pressure in a half an hour, and call me if it was Δ I still don't have all the information about elevated or if she continued to complain of chest pain. 12 12 her medical history. I mean, if -- it's obvious that if 13 13 And after that, I never received a call back. someone codes, that they had a serious medical 14 Is that all you remember from Christine 14 15 condition. 15 Boyer's time at the jail? Do you believe that Christine Boyer received 16 16 adequate medical treatment at the jail in December 2019? MR. KNOTT: Object. It's vague and overly 17 17 18 Α T do. 18 broad. Why is that? 19 ٥ 19 Q That was a yes? MR. MCCAULEY: Object to form. 20 Α That was yes. Yes. 2.0 21 I believe that we treated her appropriately 21 Okay. I want to go through events that you Α with the information that we had at the time. 22 described just now. The first thing you said was that 22 23 When you say we, who are you referring to? 23 you talked to Amber, the jail nurse, do you remember Myself, the other nurse, and the correctional 24 Α 24 officers. 25 Α I believe so. Yeah. I remember it as talking 25 Page 15 Page 17 1

Do you have an independent memory of Christine 2 Boyer? I understand that you never -- you never met 3 Christine Boyer, right? 4 Α Right. I never met her in person. No. I do remember. 5 6 Do you have an independent -- go ahead. I'm Q 7 sorry.

MR. KNOTT: She wasn't finished. 8 9 I'm sorry. I do remember the case. Okay. When I say independent memory, do you 10 understand that I mean, what you can remember without 11 12 looking at documents? 13

Α Yes.

14

15

16

17

18

19

20

21

22 23

So do you have an independent memory of the events involving Christine Boyer at the jail in December 2019?

Α I do.

What do you recall about those events? And I would ask you just to start from -- go chronologically.

Okay. I believe I talked to Amber, the jail nurse, about her intake, the fact that we were not able to get her medicines. She wasn't able to give us any information about the medications she took or her

24 complete medical history, that it was very vague what she gave during intake. And then later in the day, I 25

1 to Amber.

5

6

7

2 Q Do you remember when that conversation 3 occurred?

4 Α I do not.

Was it in the middle of the night or during 0 the day?

Α I believe it was during the day.

You're aware that Christine Boyer was at the 8 9 jail -- she came into the jail on December 21st in the evening, was there during the day on Sunday, December 10 22nd, and then coded shortly after midnight on Monday, 11 December 23rd? 12

13 I don't remember those specific dates, but Α 14 that correlates with the paperwork I've seen.

15 Okay. Without remembering the dates, you remember being contacted over the course of a fairly 16 short period about Christine Boyer, several times, 17 right? 18

19 Α Yes.

20 Okay. And so, again, your first memory, the first event you talked about was talking to Amber; is 21 22 that right?

Α Correct.

24 0 And that's Amber Fennigkoh?

25 Α Correct.

14

16

1

2

3

6

15

16

17

20

Page 21

Page 18 1 0 And do you remember that, that conversation 2 was during the day?

3 Α I believe so.

- Okay. Do you remember approximately what time 4 5 you had that conversation?
 - No. I don't have any memory of that.
- 7 You talked -- you said later in the day -- the 8 next thing after talking to Amber, what I have in my notes, is you said later in the day you received a call 9 10 about high blood pressure; is that right? That's what 11 you recall?
- Α 12 Correct.

6

- 13 So you would have spoken with the person you believed to be Amber, sometime before getting the call 14 about high blood pressure? 15
- Yes. 16
- 17 Okay. And there were -- was it two calls 18 about high blood pressure?
- Yes. I believe so. 19
- 20 Okay. Do you recall any other symptoms being 0 21 mentioned during those two calls?
- 22 No. I don't. Α
- 23 Okay. And then you received -- you recall
- 24 receiving one call later on about chest pain?
- 25 Α Correct.

- of those medications, according to the paperwork I --
- 2 I've seen.
- Is this an additional call, besides the call 3 with Amber Fennigkoh, is this is a separate call that you're referring to? 5
- 6 Α I don't know if Amber discussed those with me at that time, or if I received another call from one of 8 the correctional officers about okaying those medications. 9
- 10 Okay. So if I understand you right, you 11 recall receiving either one or two calls in -- before a call later in the day about high blood pressure; is that 12 13 right?
 - Α I mean, I only remember one call, but --
- 15 Q Okay.
 - -- it could have been two. Α
- Okay. It could have been -- it could have 17 been one call from Amber Fennigkoh or it could have been 18 a call from Amber Fennigkoh and somebody else -- and a 19 20 second call from somebody else?
- 21 MR. KNOTT: Wait a minute. I think you're 22 discussing different calls.
- 23 MR. WEIL: Yeah. I am. I'll get there, Doug. 24 I think I can clear it up.
- BY MR. WEIL: 25

Page 19

- What was -- after receiving that call about 1 2 chest pain, what was -- the next time you heard anything 3 about Christine Boyer?
- I -- the next day I did -- it was my day to 4 visit the jail on Monday and when I went in to see Amber 5 that day, I asked how she was doing. And that's when 6 7 Amber told me that she had coded, and was in the
- 9 Okay. So you physically went to the jail on Monday; is that right? 10
- Α Correct. 11

hospital.

8

- 12 Did you -- in the time that you recall 13 Ms. Boyer being at the jail, did you place any calls 14 relating to Ms. Boyer?
 - Α No.
- When you received the call in the -- well, to 16 back up real quick. I want to go to the first call you 17 18 recall speaking with Amber. You -- I have in my notes 19 here, you're saying two things. One is that you were 20 not able to get the meds -- that she was not able to get the meds for Ms. Boyer; is that right? 21
- 22 Right. So we -- she was unable to tell Amber what medication she was taking. At some point, someone 23 24 must have called and ran through the medications that she had on her person. And I okayed or denied the use 25

- So one call you remember is from Amber Fennigkoh, and one of the things that Am -- you recall Amber Fennigkoh telling you, is that she was unable to
- get a full list of medications from Ms. Boyer; is that 4 5 right?
 - Α Correct.
- 7 Okay. Do you recall being told about any medications that Amber Fennigkoh, or whoever called you 9 that morning, was able to -- that medication list that she was able to get? 10
- I don't recall that phone call, but I do see 11 12 on the paperwork that some of the medications were okay 13 to give and some were not. And so I'm assuming that 14 they called me, and got the -- that okay.
 - Right. So that's fair and I do want to talk to you about what's written on the documents, Ms. Pisney. Right now, I'm just trying to get your independent recollection. So setting aside the
- 18 19 documents.
 - Α Okay.
- I'm just trying to get your independent 21 22 recollection. So you -- again, to return, you recall
- receiving a phone call -- just I'm going back to this 23
- 24 phone call from Amber Fennigkoh that you recall
- receiving. And in my notes, I have two issues that were 25

10

11

Page 22

- 1 discussed in the call. One, was an inability to get a 2 full medication list or a prescription list. And the other was an inability to get a complete medical 3 history; is that right?
 - That is right.
 - Okay. And regarding that call, again, I just want to return to what do you recall in terms of inde -what independent recollection do you recall -- do you have of what medications were identified -- or what prescriptions were identified at that point?
- 11 I don't recall that at all.
 - Okay. And regarding the medical history, do you have any independent recollection of what medical history you did get on that call?
 - I do remember that I was told that Ms. Boyer had said she was -- she had some sort of cancer, and that she was told she only had a month to live, and that was really the only medical history that she relayed.
 - Those were the two things you recall receiving -- you reme -- those the two conditions that you recall?
- 21 Yeah. That -- in my independent recollection. 22 Yes.

5

6

7

8

9 10

12

13

14 15

16

17

18

19

20

1

5

14

15

16

17

20

- 23 Okay. And then I believe you said you may have received a second call -- again, I -- this is 24
- before the high blood pressure calls?

- Δ I don't recall.
- 2 Okay. In other words, to the best of your independent recollection, it may have been one single 3 call or it may have been two different calls; is that right? 5
- 6 Α That's possible. I only remember one.
- Okay. Do you remem -- do you have an 7 8 independent recollection of approving or denying 9 medications?
 - I don't remember doing that. But, again, that would have been my responsibility.
- Do you have an independent recollection of 12 13 learning about any medications that Ms. Boyer was found 14 with or that she told anyone about?
- 15 The medications that were on the MAR would have been the medications that were found on her person. 16
- And -- and I can't remember if I received that 17
- information before or after I saw Amber on Monday. So 18
- it's confusing in my memory, when I exactly learned 19
- about it. I'm assuming I learned about the medication 2.0
- she had on person, and approved those based on the 21
- 22 documents I've reviewed. But I don't remember that in
- 23 my independent memory.
- 24 Okay. So you don't -- you are dis -- you were 25 describing a medication list that you saw, but you don't

Page 23

- Α
- 2 You may have received a second call about a medication list or medications that were found with 3 Ms. Boyer; is that right? 4
 - MR. KNOTT: Object to form.
- 6 You can answer it.
- 7 That's correct because -- that's correct just
- because I've seen the -- the MAR, the medical 8
- administration. And there are some medications that 9
- were denied and some medications that were okayed, and 10 that would have been my responsibility to do that. 11
- 12 Understood. And, again, I don't want to --
- 13 I'm just trying to get your independent recollection.
 - Uh-huh.
 - So setting aside what you saw in documents, in preparation for the -- that you reviewed in preparation for this deposition, do you have an independent recollection of what was discussed on the second call
- 18
- 19 MR. KNOTT: Object to form.
 - No. No. I don't. Sorry. Α
- 21 Okay. And, again, the independent
- 22 recollection being not what you're looking at on
- 23 documents. But do you have an independent recollection
- 24 of this call number one, call number two being two
- 25 separate calls or one single call?

- Page 25 have an independent memory of reviewing or approving 1 2 those medications; is that right?
- 3 Α I do not.
- Okay. I want to go to the call that you 4
- 5 described about high blood pressure now -- and that you said it was just later. Do you have a recollection of 6
- 7 what time of day you received the call?
- I don't have an independent recollection, just 8 9 from the paperwork that I've reviewed.
- 10 Okay. And, again, an independent recol --
- your independent recollection. Do you have an 11
- 12 independent recollection of what conditions were
- 13 identified, on that first call about high blood
- 14 pressure?

- Α Just the high blood pressure.
- Okay. Do you have an independent recollection 16 of anything else -- any other symptoms being described 17 for Ms. Boyer? 18
- 19
 - Α Not during that call. No.
- 20 Okay. And you do have a recollection of a 21 second call about high blood pressure as well; is that
- 22 right?
- 23 In my independent recollection, I only
- 24 remember two calls. But in looking at the paperwork, it
- did bring up a memory of that second call about the 25

10

Page 29

Page 26

1 blood pressure.

21

22

25

- Q When you say, that you have a memory of only two calls, are you talking about over the whole course of the day or two calls about blood pressure?
- 5 A Two calls about symptoms that she had. One 6 about the blood pressure, and then the later call about 7 the chest pain.
 - Q Okay. All right, it sounds like then, you have an independent recollection of three calls. One about -- from Amber Fennigkoh first, a second call about blood pressure, and a third call about chest pain; is that right?
- 13 MR. KNOTT: I object. I think it misstates 14 her testimony. I think she said that review of 15 documents helped her.
- 16 MR. WEIL: Yeah. I -- yeah. I understand. 17 BY MR. WEIL:
- 18 Q I'm just trying to get your independent
 19 recollection, Ms. Pisney. I understand that the
 20 documents may have provided you more information. I'm
 21 just trying to get your independent recollection. So is
 22 that right, you have an independent recollection of
 23 three calls?
- MR. KNOTT: Object to the form of the question. It misstates her testimony.
 - Q Was your -- well, how many calls do you
- 1 Q Was your -- well, how many calls do you 2 independently recall receiving about Ms. Boyer while she 3 was at the jail?
- 4 A I do remember talking with Amber about her and 5 then the two calls from the COs about her symptoms, so 6 that --
 - Q And -- go ahead.
 - A -- would be three.
- 9 Q Okay. And one of those calls from COs was 10 about blood pressure and the second call was about chest 11 pain; is that right?
 - A Correct.
 - Q Okay. Going to the third call about chest pain that you have an independent recollection of, what do you recall being told about Ms. Boyer's symptoms -- what's your independent recollection about what you were told about Ms. Boyer's symptoms?
 - A They told me that she had complaints of chest pain, and I asked if she had any other symptoms such as diaphoresis, any shortness of breath. They told me she was not diaphoretic. She may have had some slight shortness of breath, and that's all I remember.
- 23 Q What is diaphoresis?
- 24 A Sweating.
 - Q So they -- you -- what you recall is they told

- 1 you about chest pain. You asked about other -- you
- 2 asked whether Ms. Boyer had diaphoresis and -- which is
- 3 sweating and they -- and you were told, no, correct?
 - A Correct.
- 5 Q And, again, this is all your independent
- 6 recollection. I'm not going farther than that right
- 7 now. And then the other thing that you independently
- 8 recall asking, is whether Ms. Boyer had shortness of
- 9 breath; is that right?
 - A Correct.
- 11 Q And your recollection is that -- I don't want
- 12 to put words in your mouth. What was your recollection
- 13 of the response to your question about shortness of
- 14 breath?
- 16 breath. They also would have -- they also gave me her
- 17 other vital signs besides her -- so blood pressure,
- 18 heart rate, oxygen saturation.
- $\rm 19~~Q~~Is~that~based~on~your~independent~recollection$ $\rm 20~~about~something~that~happened~or~is~that~based~on~your~}$
- 21 reading of the documents?
- 22 A No. That -- that would have been my
- 23 independent recollection.
- ${\tt Q} = {\tt Q}$ Okay. So you independently recall receiving
- 25 information about Ms. Boyer's blood pressure?

Page 27

1 A Ye

3

4

5

7

11

- 2 Q You independently recall receiving information
 - about Ms. Boyer's heart rate?
 - A Correct.
 - Q Okay. And you independently recall
- 6 information about oxygen saturation?
 - A Yes.
- 8 Q Okay. Anything else -- any other information
- 9 you in independently recall receiving, on that call
- 10 about chest pain?
 - A I do not.
- 12 Q What was Ms. Boyer's blood pressure reported 13 to you as?
- 14 A That I -- I couldn't independently recall. I 15 remember that it was slightly elevated, but not as
- 16 elevated as it had been previously in the day.
- 17 Q How about her heart rate, do you have an 18 independent recollection of what that was?
- 19 A I remember that being normal.
- 20 Q Okay. What's normal?
- 21 A In the 60 to 80 range.
- Q How about her oxygen saturation, what's your recollection of that?
- 24 A I also recall that being normal.
 - Q Okay. Do you have -- beyond the symptoms and

Page 32 Page 30 1 the vitals that we've just discussed, do you have a 1 And are those -- when you said you reviewed 2 independent recollection of anything -- other 2 the orientation paperwork, is that what you're referring information that you were provided, on the call about 3 3 to -- the documents that you retained? chest pain? 5 Α I do not. 5 Okay. And then in terms of the --Okay. You mentioned having a recollection of MR. KNOTT: To be clear, Counsel, you have 6 0 6 7 7 providing some instructions on that call; is that right? those. 8 8 MR. WEIL: Yeah. Α 9 9 Q What were the instructions that you recall MR. KNOTT: Okay. 10 providing, on that third call about chest pain? 10 BY MR. WEIL: 11 So during that call, I remember the CO saying, 11 In terms of the treatment paperwork that you could we give her some aspirin? And I said, yes. That reviewed, do you remember what -- can you describe what 12 12 13 would be fine, it wouldn't hurt anything. And that 13 paperwork you reviewed -- or the treatment documents you after they gave her the aspirin, to recheck her blood reviewed about Ms. Boyer? 14 14 pressure again in a half an hour since it was slightly 15 15 MR. KNOTT: Counsel, I could give you the elevated. And to call me if it was elevated, and also Bates numbers if you'd like? 16 16 MR. WEIL: Do you -- how about exhibit 17 to call me if she continued to have any complaints of 17 numbers? I guess Bates numbers, if you have stuff 18 chest pain. 18 that's not exhibits, that'd be helpful. Q Okay. So you -- I'm sorry, you recall -- I 19 19 20 was writing down. You recall having them check her MR. KNOTT: Yeah. 20 21 blood pressure in half an hour -- or asking them to 21 MR. WEIL: Either way is fine. 22 check? MR. KNOTT: Materials -- the -- yeah. She did 22 not review anything with exhibit numbers on them, 23 Α Yes. 23 24 Q Okay. Do you recall instructing the guards 24 but they were within the materials she did review about what measurement would constitute elevated blood 25 25 - or some exhibits were. Page 31 Page 33 1 pressure? 1 MR. WEIL: Okay. 2 Α I do not. 2 MR. KNOTT: The pages she was given to review 3 Okay. Okay. Do you recall any other 3 were Monroe County, 50 to 110. And Monroe County, 4 information or instructions that were exchanged on that 4 1088 to 1111. As well as the DOC report, 197 to 5 third chest pain call? 5 206. That third call was about chest pain, but the MR. WEIL: Okay. Is that all, Doug? 6 6 7 other calls weren't about chest pain. But, no. I do 7 MR. KNOTT: Yes. not remember any other instructions. 8 8 BY MR. WETT: 9 Okay. Tell me everything you did to prepare 9 Okay. Beyond reviewing the documents that for today's deposition? we've just discussed, Ms. Pisney, what else did you do 10 10 I looked over the records from the care of to prepare for this deposition? 11 11 MR. KNOTT: Mr. Weil, I need to pause you for Ms. Boyer. I got out my orientation paperwork from ACH. 12 12 a second. I think that we sent her the e-mail that That was -- that was it. 13 13 14 You reviewed -- the orientation work; what was 14 Shasta Parker testified about. And it was not in 15 that? 15 those materials, in the pages that I referenced. Just the training that I had at ACH, when I It's the 6:00 p.m. e-mail from Parker to Amber and 16 Α 16 first started with them. others. 17 17 Okay. And that was training that you received MR. WEIL: Okay. 18 18 19 in Peoria, Illinois? 19 MR. KNOTT: Yeah. 20 Α Correct. 20 BY MR. WEIL: And did you retain documents -- or, did you 21 Okay. Go ahead. Ms. Pisney, besides 21 Q 22 receive documents during that training? 22 reviewing the documents that we've just gone over, what 23 Α Yes. 23 else did you do to prepare for today's deposition? 24 Q Did you retain them? 24 Just meeting with my lawyer to talk about

12

Page 38

- 1 I don't recollect a lot about the specifics of 2 the conversation. She just was reassuring.
- What did you talk -- what do you recall 3
- talking about with Dr. Schamber? 4 5 I talked about the case, what I had done, and what he -- his impression of the care that was given. 6
- Was -- do you recall about when you had that 7 8 conversation with him?
- It was probably shortly after we found out 9 Α 10 that Ms. Boyer had passed away.
- 11 Okay. And was it a call that was -- did you understand why the call occurred, in the sense of why 12 13 Travis Schamber would be interested in talking with you?
- He was my supervising physician, and I called 14 15 him to get his take on the care that I gave the patient.
- Okay. Did you -- was it a call -- it was --16 17 so it was a call on the phone, right?
- 18 Α Yes.
- 0 Do you remember about how long it lasted? 19
- Α Not really. 2.0
- 21 Okay. One of the things I -- the instructions
- 22 I didn't give you, but I should have, is that a
- 23 deposition is not a memory test. I don't -- you know,
- 24 we don't expect you have a perfect memory. As we've
- 25 just reviewed, you remember fewer -- you have an

- Page 40 initiated those conversation -- that first conversation
- after Christine Boyer died because you were stressed 2
- 3 about that situation. And during your orientation, you
- had been told that Melissa Caldwell would be a person at
- ACH you could talk to if you were stressed; is that 5
- 6 right?
- 7 Α Yes
- 8 0 Okay. And that was the reason for the call, 9 correct?
- 10 Α Correct.
- 11 Q Okay. The call with Dr. Schamber, did you initiate that call or did he? 12
- 13 Α I believe I did.
 - 0 Okay. And I guess initiate is a little
- 15 inaccurate. I mean, it may have been, he said, hey,
- let's set up a call, and then you call in. But do you 16
- 17 remember how that call was set up?
- 18 I don't. I had access to Dr. Schamber any
- time I needed it. So I may have called him and just 19
- 20 wanted to discuss the case.
- 21 Okay. Besides speaking with Dr. Schamber and 22 Melissa Caldwell, have you spoken with anybody else at
- 23 ACH about Christine Boyer?
 - Α No.
- Okay. You did what -- I'll create another 25 0

Page 39

- independent recollection of fewer calls than the papers
- indicate that you got, right?
- 3 Α Correct.

1

2

4

5

7

14

- Okay. So it's not a memory test, but I am
- entitled to your best recollection, and also your best
- estimate. So can you estimate roughly, how long the 6
 - call with Dr. Schamber may have gone?
- MR. KNOTT: No. Counsel, I -- you shouldn't 8
- 9 be instructing the witness, particularly if it's
- inaccurate. So she answers to the best of her 10 ability. You're not entitled to estimates, if she 11
- 12 doesn't have an independent basis for that. so I
- 13 object to the form of the question. I'm going to
- let the witness answer to the best of her ability. I would say no more than five or ten minutes. 15
- BY MR. WEIL: 16
- 17 Q Do you recall reviewing any documents with
- Dr. Schamber on that call? 18
- 19 Α No.
- 20 Okay. Other than the call with Dr. Schamber,
- do you remember discussing with any and I -- well, to 21
- 22 back up. It sounds like -- we just discussed your
- 23 conversations with Melissa Caldwell; is that right?
- 24 Α Yes.
 - Q And if I understand you correctly, you

- Page 41 exception of that. You did you -- I think you testified 1 2 earlier, you did speak with Amber Fennigkoh on the --
- 3 Monday the 23rd, right?
 - Α Yes. Yeah.
- 5 Okay. So besides those three people, you
- don't recall speaking with anybody else about Christine 6
 - Bover at ACH?
 - Α
- 9 Did you receive any -- did you speak with anybody else, be it the county, or the department of 10 corrections, or anybody else about Christine Boyer? 11
 - Α No.
- 13 Okay. Has -- do you recall anybody asking you 14 questions, talking to you, e-mailing you in some sort of 15 formal capacity, like an investigation, about Christine
- 16 Boyer?
- 17 MR. KNOTT: Again, you're asking for her independent recollection. She has not looked at 18 19 any records, as of this point in the deposition.
- 20 Α No. I don't remember that.
- BY MR. WEIL: 21
- 22 Okay. Or do -- setting aside your independent
- 23 recollection, did any documents you reviewed in
- 24 preparation for this deposition, indicate you'd spoken
- with anybody else about Christine Boyer? 25

$\overline{}$				
1	А	Page 42 Not that I can remember.	1	Page 44 has a hierarchy of education and is able to assess,
2	Q	Okay. Do you know who Stan Hendrickson is?	2	diagnose, and prescribe medications for the treatment of
3	A	Yes.	3	illnesses of patients.
4	Q	Did you ever speak with him about Christine	4	Q When you say just when you say assess,
5	Boyer?	Did you ever speak with him about thistine	5	diagnose, and prescribe, can you just tease out what you
6	A	Not that I not that I remember. No.	6	mean by assess?
7	Q	Okay. How about Jeffrey Spencer, do you know	7	A Evaluate, perform physical evaluations,
8	who that		8	physical exams, everything you need to be able to
9	A	I do not.	9	diagnose a patient.
10	Q	Okay. When did you first learn about this	10	Q Okay. How about diagnose? What does that
11	lawsuit?		11	refer to?
12	A	It would have been some time last year.	12	A Putting together the symptoms that a patient's
13	Q	Okay. And have you spoken with anybody about	13	having along with their physical exam to come up with a
14	-	suit, besides your lawyers?	14	possible cause for their symptoms and yeah, symptoms
15	A	My family.	15	Q And then prescribe I think it's fairly
16	Q	Who did you talk to in your family?	16	self-explanatory. You have the privilege of prescribing
17	A	Just my husband and my daughter.	17	medication; is that right?
18	Q	What did you say to your daughter about the	18	A Correct.
19	-		19	Q And that's different than a nurse, correct?
20	A	Just that I was being deposed about a case	20	A Correct.
21		5 -	21	Q Okay. Now, after receiving your nurse
22	Q	Have you ever been sued before?	22	practitioner degree at UCCS, what did you do after that?
23	A A	No.	23	A Let's see. My first job as a nurse
24	Q	Where did you grow up, Ms. Pisney?	24	practitioner was at an independent occupational health
25	A	Mostly in Wisconsin.	25	clinic in Virginia.
23	11	robely in wideolibin.	25	cimic in viiginia.

Page 46 1 in Rochester, Minnesota. 1 Q Okay. So office hours? 2 How long did you work -- what was your job at 2 Α Yes. 3 the Mayo Clinic? 0 Okay. And that was both at the outpatient and I, again, worked in gastroenterology and at the hospital? 4 Yes. 5 hepatology with them. 5 Α How long did you have that job? 0 Okay. And is it -- since 2001, you took the 6 0 6 job, were you working at the Deere plant? Α Seven years. 7 8 So I'm doing math here, 2000 -- I guess, we're 8 Α 2021. Yes. 0 in 2010 to 2017; is that right? 9 I'm sorry. 2021. Yes. Sorry. And that is 9 Q 10 Α That's correct. 10 your full-time job. as of today? 11 Okay. What did you do after that? 11 Α I got a job at Gundersen in La Crosse, in 12 Q And then you have a part-time job with ACH, 12 13 gastroenterology and hepatology. 13 right? Okay. And how long did you work for Correct. 14 14 Α 15 Gundersen? 15 How many jails do you -- have you serviced for 0 I worked there from 2017 to 2021. ACH? 16 16 That -- I think you described your job with In total three. But I did -- I did some 17 17 Α ACH is -- I guess, as something of a part-time job; is 18 18 coverage for other providers at times. All right. One jail was Monroe County. When that right? 19 19 Α 20 did you service Monroe County? 2.0 Correct. 21 And so -- between 2017 and 2021, your full-21 Α I started there in 2019 to 2021. time job was to work at Gundersen? 22 You started working with ACH, I believe, 22 23 Α Yes. 23 somewhere around May 2019; is that right? 24 Okay. And what -- you said you worked in 24 Α gastroenterology there? 25 Okay. And then -- so you, the ja -- is it --25 0 Page 47 1 Α Correct. 1 2 And that was in La Crosse? 2

Page 49

3 Α Yes. What does that job entail? I saw patients that came to the outpatient 5 clinic with any gastroenterology or hepatology 6 7 complaints. 8 Q Okay. So you're working at an outpatient 9 clinic there? Correct. I also worked some inpatient 10 hospital patients. 11 12 Okay. And that -- there's a -- it does --Gundersen is -- I'm not from this -- I'm not from 13 14 Wisconsin. Is Gundersen a health network with multiple 15 physical locations? Α 16 Yes. Okay. And some of those locations are 17 Q outpatient, I guess; is that right? 18 19 Α Yes. 20 0 Okay. And there is also a full hospital in La Crosse; is that right? 21 22 Α That's correct. 23 What hours did you work at Gundersen, what was 24 your schedule during this period? Monday through Friday, 8:00 to 5:00. 25

what are -- I'm sorry. Just -- what other counties did you work for besides Monroe County? 3 Well, while I was with Monroe County, it was -- my job was Monroe County. I did cover some other 4 counties, when -- when other practitioners were gone. I 5 don't remember exactly which ones. The ones I cover now 6 7 are Clayton County in -- Clayton and Crawford County. One is in Wisconsin and one is in Iowa. 8 9 Okay. The Monroe County job was -- I'll just call it, a steady position, as in you were there over an 10 11

extended period -- you had that job over an extended 12 period; is that right? 13 Α That's correct.

14 And the Clayton and Crawford Counties, those 15 are -- you're filling in for folks?

No. Those are my steady jobs now, too.

They're smaller jails and require less time. 17

Okay. And so is that job similar to the job -18 19 - the manner in which the job is performed is similar to 20 the job at Monroe County, in the sense that you're on

call for most the time, and then there's some period 21

22 where you physically go to the jail?

> Α That's correct.

24 Okay. Any other counties besides those two?

25 Not as my -- my main job. No. Α

16

     for ACH?
                                                                    5
                                                                        Board of Nursing.
               Currently, I am required to be at the jail one
                                                                    6
                                                                             0
                                                                                  Are those governmental appointments, any of
 6
          Α
 7
     hour every other week, for both the counties that I'm
                                                                    7
                                                                        them?
8
              And then I'm on call for them, whenever they
                                                                    8
                                                                                  The nurses -- the Wisconsin Board of Nursing
     serving.
                                                                             Α
                                                                    9
9
     need me.
                                                                        is.
10
               How about Monroe County, how long were you
                                                                   10
                                                                             0
                                                                                  How did you come to be appointed in that
11
     required to be in Monroe County Jail?
                                                                   11
                                                                        position?
               Two hours a week.
12
                                                                   12
                                                                             Α
                                                                                  I applied, and was accepted, and appointed by
13
          0
               Okay. Why did you stop working in Monroe
                                                                   13
                                                                        Governor Evers.
     County Jail?
                                                                   14
                                                                                  How long did your tenure last?
14
15
          Α
              I moved to Iowa.
                                                                   15
                                                                             Α
                                                                                  I think it typically lasts four years or three
               Okay. And in all these jails, whether working
                                                                        years, but I had to leave early because I was moving to
16
                                                                   16
     in Monroe County or these two, Clayton or Crawford
17
                                                                   17
                                                                        Towa.
18
     Counties, the on-call requirement is -- doesn't require
                                                                   18
                                                                             Q
                                                                                  Was that a competitive process to become a
     you to work any particular hours, it just requires you
                                                                        member of that board?
19
                                                                   19
20
     to be available, right?
                                                                   20
                                                                             Α
                                                                                  Vec
21
              That's correct.
                                                                   21
                                                                                  Did you receive -- how -- was there a campaign
22
               Would you -- can you estimate how many calls
                                                                   22
                                                                        to become part of it or was it just an application, or
     you get a week, in that on-call capacity?
23
                                                                   23
                                                                        many applications, or do you know why you were selected?
               MR. KNOTT: Object to form.
                                                                                  Just an application and I don't know why I was
24
                                                                   24
              With the two jails I'm serving now, it's --
25
                                                                        selected. Just at the discretion of the governor.
         Α
                                                                   25

                                                                                                                          Page 53
1
     how many? Maybe five times a week.
                                                                    1
                                                                             0
                                                                                  Why did you want that job -- or that position,
 2
               Okay. How about --
                                                                    2
                                                                        I should say?
 3
          Α
               Monroe County was -- go on.
                                                                    3
                                                                                  I -- I'm interested in advancing the rights of
          0
               Go ahead.
                                                                    4
                                                                        nurses, taking care of nurses, and advancing the rights
                                                                        of nurse practitioners in the State of Wisconsin, making
 5
          Α
              Monroe County was more often. I received at
                                                                    5
                                                                        sure that the patients in Wisconsin are well-taken care
     least one call a day from them.
6
                                                                    6
 7
              MR. WEIL: Okay. How about we take a quick
                                                                    7
          break? We can come back at 11:30?
                                                                                  What types of things did the board do to make
8
                                                                    8
 9
              MR. KNOTT: Sure.
                                                                    9
                                                                        sure that the patients in Wisconsin were well-taken care
              THE WITNESS: Sure.
                                                                   10
10
                                                                                  We review complaints against nurses, and
              MR. WEIL: Okay, great.
                                                                   11
11

done or not?

1

- 2 Α Yeah. I'm trying to think of the word to use, 3 but discipline -- discipline.
- Okay. Where did you conduct? Was that done 4 in hearings, or was it all on paper, or how would that 5 6
- 7 Δ We met monthly and discussed the cases. We 8 each took three months, where we were more in depth in hearing the cases. We met with the lawyers and for the 9 10 -- for Wisconsin, for Board of Mursing and discussed the 11 cases. We looked over the documentation from each case and made decisions. There was usually another nurse 12 13 pract -- or nurse that was on those calls. And we decided together on whether we should proceed with any 14 discipline, whether no discipline was necessary. And 15 then we brought that back to the board as a whole. 16
- 17 Was this discipline oversight, was that nurses 18 and nurse practitioners?
 - Α Yes.

19

5

12

14

15

16

17

18

19

20

21

23

24

25

- 20 Okay. Do you ever recall receiving 21 disciplinary complaints about nurses who'd ignored chest 22
- 23 Α I don't recall any.
- 24 Okay. Do you recall receiving any complaints 25 about nurses who ignored signs of a heart attack?

Page 56 asked to speak about nursing? Like do you do any public 1 2 speaking or anything of that sort?

- Not in relation to the board of nursing, but I 3 4 have given talks in relation to my expertise in
- gastroenterology and hepatology. 5 6 Okay. And that's your specialty within your LPN field? Is that --
 - Α I'm a nurse practitioner.
- 9 Q I'm sorry. I apologize. Your nurse 10 practitioner field?
- 11 Α That's what I've done most of my career in. 12 Yes.
- 13 0 Where have you given talks or -- in what 14 forums?
- Conferences, usually -- nursing conferences. 15 Α Nurse practitioner conferences. 16
 - Okay. Anywhere else?
- 18 Α No. Not that I can remember.
- Very quickly. Just returning to the 19 20 disciplinary issues that you were involved in on the
- 21 Wisconsin Board of Nursing. In terms of discipline for
- -- disciplinary issues involving nurse practitioners, do 22
- you ever recall discipline for failure to diagnose? 23
- 24 Α
- 25 Okay. Going back to your schedule with ACH 0

Page 55

- I don't have any specific recollection. 1
- 2 Do you remember any cases, complaints or otherwise, with the Wisconsin Board of Nursing that 3 involved heart attacks? 4
 - I do not specifically. No. Δ
- Okay. Do you have a general recollection that 6 7 there were some?
- 8 Α No.
- 9 Okay. Did you -- once you were on the board, were you involved in reviewing applications by 10 additional nurses to join the board? 11
 - Α No.
 - Okay. It's an impressive accomplishment, at least from this outsider's view, to be on this board. What were the other nurses like on the board? What were their accomplishments?
 - The chair of the board is a certified registered nurse anesthetist, who is a professor of nurse anesthetizing or whatever. There's another professor on the board at the school of nursing, I believe, in perhaps Madison. I'm unsure. There are several members that are RN representatives. There's at least one general member of the board that is not a
 - Once you're appointed to the board, were you

and I'll just direct you to your time in Monroe County. 1

- I understand that you're now working somewhere else. As
- 3 we discussed, you're available -- when you're working
- 4 from Monroe County or at Monroe County, you're available
- 5 during the week to receive calls, and then you go in one
- 6 day a week to the jail; is that right?
 - Α Yes.
- And that was -- I believe you said earlier, 8 9 that that day was typically Monday; is that right?
 - That's correct.
- Okay. And why are you going to the jail 11 12 physically, one day a week? What's the purpose of those 13 visits?
- 14 Α I had signed off on paperwork from the week, and I also saw patients that we were having any problems with or that wanted to see a provider. 16
- 17 Okay. So when you're saying you sign off on paperwork, what does that refer -- what paperwork are 18 19 you signing off on?
- 20 The MARs for patients, the -- typically if a patient wants to be seen by the nurse, they'll fill out 21
- 22 a form. And then the nurse sometimes will call me with 23 those forms and ask my opinion, ask for any med changes,
- anything that needs a provider. And then I would sign 24
- off on that. So any orders or anything that I'd given 25

nurse. There's an LPN representative.

19

20

21

23

24

25

Okay. And in terms of seeing people who wanted to see a nurse practitioner, how would that work? Do you go to a -- sort of, logistically?

So there's a nursing office in the jail. Amber 5 typically would set patients up for me to see, ones that 6 7 had, you know, complications with any wounds, any 8 injuries, any questions, complaints, wanting to talk about their medications. They would be called down to 10 be seen. Sometimes a CO would come with them, sometimes 11 not. They would come into the nurse's office. Amber would do their vital signs and take the chief 12 13 complaints. Then I would talk to them about their complaints, do any assessment that was necessary, give 14 15 my opinion, and any plan for their care.

Okay. I'm assuming as these folks are coming down, you're reviewing whatever medical history they have?

Α Whatever we have. Yes. 19

20 0 Right. And as I understand it from discovery 21 in this case, every detainee at the jail has a medical 22 file, be it just a few documents or many; is that right? 23 As best you know?

Α That's correct.

Okay. And that includes an intake sheet where

themselves. 1

2 Okay. And this is a -- just physically, it's 3 like a folder with loose paper in it, or how does that

5 Yes. Yeah. During my time at Monroe County, they did get electronic paperwork, but that was later on 6 7 during my time there.

8 Q And when you say electronic paperwork, what do 9 you mean?

10 Or electronic medical records. So instead of 11 physically signing off on the papers, I would still do some of that, but I would sign off on things that were 12 13 in an electronic database.

Okay. I have two versions of electronic files 15 in my mind. One is just a bunch of paper that's scanned and, you know, it's something you maybe hand wrote on 16 17 and that just gets scanned and that's the electronic, 18 and maybe there's a bunch of like handwritten stuff or typed out -- just scanned paper in a file. Another 19 20 version would be like, you know, computer entry forms, 21 like access database, something you'd be familiar with from like a modern hospital. Is that a distinction that 22 23 makes sense to you?

> Α Yes.

Which version are you talking about, in terms 0

Page 59

that's filled out when they're they come in, right?

2 Α I don't -- I don't see those intake sheets, 3 normally.

Are those in the medical file? 0

> Δ I'm not sure they are.

Q Okay. Have you ever seen one in your work at 6 7 the jail?

I've seen one for this case, but I'm not sure I've ever seen them before. I think that's all part of the jail paperwork, and I don't typically see the jail side of the -- of why they're there, their charges, all that kind of stuff.

When you're looking at a medical file of a detainee, just -- literally, physically, it's a paper file, like with an envelope -- like a manila envelope or that kind of thing?

MR. MCCAULEY: Object to form.

We have files for the patients. Yeah. Typic -- it would include like any request for a nurse visit in it. Not sure if it includes their intake evaluation or not. It might. I just can't remember. If we'd have any outside records, it would include that. There is a form that they fill out when they come in, that they answer questions about medical history, and that --

1 of at Monroe County?

It would've been -- it would've been after

this case that we got the electronic medical record and 4 that would've been, because I put my notes in into it

electronically -- the nurses' notes were entered 5

electronically. It wasn't scanned documents. 6

Okay. So this is -- you're doing computer entry into -- are they sort of electronic forms like -or is it a -- but what is it?

10 Yes. It's an electronic form that looks very similar to the paperwork I would fill out previously. 11

12 Q Okay. And roughly, when did that switch occur 13 to the electronic forms?

MR. MCCAULEY: Object to form. Foundation.

That was just shortly before I left. It

wasn't -- just a few months before I left.

Okay. And so previously you'd been writing stuff down on paper, and then it switched over to doing entry on a computer?

> Α Yes.

21 Okay. So turning away from your time when you 22 were actually physically at the jail, in terms of your being on call, can you tell me how the call -- the on-23 24 call call works, when you're called off-site, What the 25 procedure is?

that's typically filled out by the -- the inmate

19

Page 65

Page 62

1 A I would just receive a call from either the 2 nurse or the correctional officer with questions about a 3 patient or -- or whatever they had an issue with.

Q Is your availability something like -- I'm picturing doctors with a pager or something like that. Is there a procedure that you have to keep a phone on you at all times? Or are there times where you were definitely available, and then other times where it might be somebody else who's on call?

10 A Unless we asked for time off, we were always 11 on call. There was always a backup provider though, if 12 they couldn't contact us.

Q Okay. And so you then could just be doing anything, you're just going about your life, and you would take a call?

A That's true.

Q Okay. Did you have a place at home or anything of the like -- an office where you'd typically sit down and take these calls when they came in?

A No.

17

18 **19**

20

21

22

Q Okay. Did you have any medical reference literature that you'd use, when you took calls from the jail?

24 A Yeah. I had Epocrates that I use a lot for 25 making sure I'm giving the correct dose of medication $$\operatorname{\mathtt{Page}}\ 64$$ 1 been produced and several other things, without getting

2 into it. My understanding is that you are a

3 practitioner, and then as a nurse practitioner, you

practice under a doctor; is that right?

5 A In collaboration with a physician in 6 Wisconsin, we do. It just depends on the state you work 7 in. In Iowa, they have independent practice.

Q Okay. And how is it in Wisconsin?

9 A Currently, we work in collaboration with the 10 physician.

Q Okay. And the collaboration physician I saw in the documents was Dr. Schamber when you were at ACH, at Monroe County; is that right?

14 A It was during part of the time I was there. 15 Dr. Schamber left ACH at some time, and I had another 16 collaborating physician after him.

Q When Ms. Boyer was at the jail, was your collaborating physician Dr. Schamber?

A Yes

Q In terms of your working relationship -- or working interactions with a collaborating physician, what interaction do you have on a day to day with a collaborating physician, in this role at ACH?

24 A I -- I didn't speak to him every day. I spoke 25 to him if I had any questions. There was regular

Page 63

1 for the -- for the disease processes.

Q I'm sorry. I didn't understand that word. You 3 just said Epocrates?

A Epocrates. Yeah. It's an app on my phone.

5 Q Okay.

6 A It's a medical app.

7 Q How do you spell that?

8 A E-P-O-C-R-A-T-E-S.

9 Q Okay. Besides the Epocrates app, did you have 10 any other sources of literature available when you took 11 a call?

A I mean, I have my own library of -- of medical books for assistance. Typically, they weren't right at my hand when someone would call, and I don't remember specifically picking up a book, and looking at it for any particular questions. Typically, they were something that I just knew from my education and experience.

Q I believe as a nurse practitioner it's referred to as a mid-level practitioner; is that right?

A A what?

Q Mid-level practitioner?

23 A That's what some people call us. Yes.

Q Meaning, as I understand it, you know, the contract between -- well, your employment agreement has

rage 05

1 $\,\,$ evaluation of my notes to make sure that I was

2 following, you know, appropriate medical care of the

3 patients.

4

5

Q Okay. And when you're talking about notes, where would you be recording those notes?

A At the time of the Boyer case, they were handwritten notes. When I would see a patient.

8 Q Sure. It was a poorly phrased question. Would 9 you be recording notes only when you were visiting the 10 jail, or would you be recording them as well when you 11 took calls off-site?

12 A No. Only when I would visit the jail and see 13 a patient in person.

Q Okay. And so the collaborating physician is reviewing your notes that you may enter, when you're in the jail. And then I believe the other thing you said, is that you might contact the collaborating physician for a medical question; is that right?

19 A Yes. If I had questions or concerns, I could 20 call them.

20 call them.
21 Q So if that would -- in my mind that sounds

22 like you get a question from the jail, you say, well,

23 I'm not quite sure what the right answer is medically.

24 I'll call the collaborating physician and talk about it 25 with them; is that right?

14

15

16

17

18

19

20

25

Okay. How often do you recall having conversations like that with the collaborating physician?

I didn't call often. I think I maybe call Α Dr. Schamber -- especially when I first started, I called him a little more often if I was unsure. But then as time went on, I had to call him less. He was very familiar with treating inpatients -- or inmates. So maybe once or twice a month, I'd give him a call.

Do you recall calling anybody, a collaborating physician or anybody else in Ms. Boyer's case?

15 MR. MCCAULEY: It's vaque and overly broad. But you can answer. 16

I didn't call them during the time I was 17 18 treating her. No.

Okay. We talked a bit ago about the difference between a nurse practitioner and a nurse. And you talked about assessment, diagnosis, and prescription. Can you describe how the diagnosis process works?

24 You take into consideration the symptoms that the patient is having, their physical exam. There are 25

0 And what is something you don't want to miss?

2 Α Something that could lead to a serious medical 3 condition.

Okay. And so just go back -- you were saying, 0 there are certain red flags that you are seeking to identify in a differential diagnosis; is that right?

7 Sure. So for low back pain, a red flag might 8 be a person's age, their history of cancer, those sort 9 of things.

Is differential diagnosis, is there sort of a multi-step process that you go through together?

No. Differential diagnosis -- differential 12 13 diagnosis are, okay. I have this symptom. It can be caused by this, this, this, or this. So making a 14 diagnosis is an art. It is some -- to me, it is like 15 solving a mystery. 16

> Q How so?

Α You have to look for clues, and you have to fit those clues into the different diagnoses, rule out certain diagnoses because of the clues, and rule some in. So, much like solving a mystery.

22 When you -- described -- working forward, the differential diagnosis, I think you said begins when 23 someone comes and presents to you with symptoms; is that 24 25 right?

Page 67

several differential diagnoses for symptoms and physical 1 exam findings that you take into consideration.

> You said differential diagnosis? Q

Α Correct.

5 Is the purpose of differential diagnosis to look for a cause of patient's signs or symptoms?

7 Yes. Yeah. It gives you a number of different options that those signs or symptoms could be 8 9 indicative of.

Okay. What do you mean by it gives you a bunch of different options?

12 Α You know, certain symptoms could be indicating many different diagnoses. 13

Okay. And when a symptom indicates many different diagnoses -- why don't we just -- let me back up for a minute. Is the goal of differential diagnosis to identify the cause of a patient's signs or symptoms without missing something that could cause a danger to the patient?

MR. MCCAULEY: Object to form.

There are certain things -- oh, I didn't hear. 21 22 There are certain things that are red flags that you would want to be aware of. 23

24 Q What does a red flag mean?

> Something that you don't want to miss. Α

1 Α

> 2 And so the first step in a differential 3 diagnosis is to gather information about those symptoms; 4 is that right?

Α That's correct.

So that would be their subjective symptoms, 0 correct? What they're telling you?

Yes. And objective. You use subjective and 8 Α 9 objective data.

Right. So subjective is, if I understand it 10 correctly, that's what someone is telling you about what 11 12 they're experiencing; is that right?

> Α That's true.

14 Okay. And then objective is, what you observe 15 about the person?

Yes. 16 Α

Okay. 17 Q

> Α Yes.

19 And when someone presents you with symptoms, 20 part of what you're gathering is also their medical

history, right? 21

> Α Yes. That's part of the subjective. Yes.

And it's important to gather the medical

24 history for a person, in order to understand what might

be causing their symptoms; is that right? 25

5

6

15

16

17

22

23

25

1

2

3

7

12

Page 70 That's --Δ MR. KNOTT: Vague and overly broad. Go ahead. I think she answered. That's true.

5 Okay. Once you've gathered the symptoms, the objectives, observations, the subjective observations, 6 and the history, what's the next step in the 7 8 differential diagnosis process?

You know, using your knowledge to put those subjective and objective data together to make a diagnosis.

Q Are you trying to identify potential causes for symptoms, given the information about their history, what -- the objective and subjective observations you're making?

You're trying to come up with a diagnosis for the -- the bunch of symptoms and objective data that you 17 have. And then based on that diagnosis, a plan for their care.

20 So let me see if I understand how this would 21 work. I give an example of say someone who comes in 22 with a abdominal pain, right? And you gather the information from this case, they're saying, I have 23 severe abdominal pain. And once you've gathered that 24 25 information -- this is a very simple case. I'm not

Α That's true.

2 0 Once you've gathered -- and you're trying to make an exhaustive list of potential symptoms; is that 3 right? Or a potential causes for symptoms?

Yeah. That's what a differential diagnosis Α is. Correct.

7 Ω Okay. Once you've identified potential causes 8 for the symptoms, the next step in the differential diagnosis, if I understand it, is that you'd want to 9 10 prioritize symptoms within that. So you'd want to, you 11 know, in the list, in your mind on paper, wherever, you'd want to say, well, tumor is serious, but maybe not 12 emergent, right? So that would go a slightly higher 13 priority on your list, correct? 14

So you try to whittle down or narrow down the differential diagnosis based on the symptoms that you're given and the history.

18 Right. And if a symptom has a potentially 19 very benign cause, that goes on the list, right? 20 Something like gas, in our abdominal pain example, 21 correct?

Α

Q And then if a symptom has a potential very serious cause like appendicitis or a tumor, that would 24 go on the list as well, right?

Page 71

providing a bunch of history. You would say, okay --1

you said it's like solving a mystery. The next thing --

the next step in the differential diagnosis would be to 3

say, well, I'm going to make a list in my mind, on

5 paper, wherever -- I'm going to make a list of all the

potential causes for that symptom of abdominal pain, 6

7 right?

8

9

10

11

12

1

2

3

9

10

11

12

13

14

15

16

18

19

That's correct. Α

And that's an important step in the differential diagnosis process, because you don't want to miss a potential cause, right?

MR. KNOTT: It's vague and overly broad.

13 Yeah. And any symptom can have multiple 14 So the differential diagnosis is that list of multiple causes that it could be. 15

Right. So we'll stick with my example of 16 abdominal pain. You know, one of the causes could just 17 be gas, right? 18

19 Α

20 Another could be something more serious, like a tumor, right? 21

22 It's possible. Α

23 Okay. And then you could have something else, 24 like appendicitis that could be another potential cause

25 of abdominal pain, correct?

Page 73 MR. KNOTT: Object to form of the question.

It's vague. Overly broad.

Α Yes.

Okay. The next step, once you've made that 5 list, is that you want to rule out or treat any potential cause that would pose a danger to the patient 6

before it can hurt them; is that right?

MR. KNOTT: Vaque. Overly broad. 8

9 Α I mean, you want to rule out the serious causes first --10

So --11 Q

> Α Benign or --

13 0 Go ahead. I'm sorry. Go ahead. I didn't 14 mean to interrupt you.

15 Α The benign can take longer and not be as 16 serious, I quess.

Okay. And so in my abdominal pain example, 17 and we'll just have, you know, in our example, we have 18 19 three potential causes that we're just going to say. I

20 suspect you're aware of many more given your specialty,

but we'll just say there's three potential causes. One 21 22 is gas, one is a tumor, and one is appendicitis. Are

you with me in our hypothetical here? 23

24 Α Yes.

25 Okay. And so a gas is a benign cause for

Page 77

Page 74

abdominal pain, or at least one that doesn't need to be

ruled out or treated immediately, right?

A True.

3

4

5

6 7

8

- Q A tumor is a serious cause. But one that wouldn't be necessarily emergent, where it would have to be ruled out, you know, in a very short time; is that right?
- A Depends on the tumor, I guess.
- 9 Q Sure. I guess, you know -- of course, I guess 10 we're speaking in a matter of days or hours versus a 11 matter of weeks, right?
- 12 A Uh-huh.
- Q Okay. So some -- fair enough. But then something like appendicitis would be a very serious cause, that would have to be ruled out very quickly; is that right?
- 17 MR. KNOTT: Form. Vague. Overly broad.
- 18 MR. MCCAULEY: Joined.
- A Appendicitis is serious and you want to make sure you don't miss it. That's true.
- Q And the reason you want to -- and the way you don't miss it is by ruling it out or treating it, correct?
- 24 MR. KNOTT: Object. Vague. Overly broad.
- 25 A Correct.

1

2

3

23

24

25

Page 76
where the equipment or procedures are available to rule
out that dangerous cause; is that right?

MR. KNOTT: Object. Vague and overly broad.

- 4 A That would depend on how -- how likely you 5 feel that might be the issue.
- 6 Q Is it your -- so if you feel that a 7 potentially dangerous cause is unlikely, there's no need 8 to rule it out?
- 9 MR. KNOTT: Object. Misstates the testimony.
 Vague and overly broad.
- 10 Vague and overly broad. 11 A If it's unlikely, then you may not have to 12 rule it out. There are certain rules for when you do or
- don't need an x-ray. If you suspect there could be a fracture, there are certain indications that the x-ray
- 15 is not necessarily needed. There are many things that
- 16 you take into consideration, including the history, the
- 17 age of the patient, their family history, social
- 18 history. I mean, there's a lot of things that go into 19 making that diagnosis.
- Q You just mentioned x-rays for fractures; is that right?
 - A That's true.
- 23 Q Are you -- what were you referring to you
- 24 there -- what injury or suspected condition were you
- 25 referring to?

22

2

7

9

10

22

23

Q Okay. And the reason you want -- it's important, whatever your list of potential causes you come up with, it's important to rule out or treat any

4 potential cause that can harm the patient, before it has

5 an opportunity to harm the patient, right?

MR. KNOTT: Vague. Overly broad.

A I mean, in your first -- of course you don't want to miss anything that could harm the patient.

9 Q Okay. And to make sure you don't miss it, you 10 want to rule it out; is that right?

11 MR. KNOTT: Object to vague. Overly broad.
12 MR. MCCAULEY: Joined.

13 A So you -- I mean, you can't always rule it 14 out. There's -- I mean, many times there can be more 15 than one diagnosis that fits.

Q Okay. Is that -- you mean, there might be, for -- again, in our abdominal pain case, there might be multiple causes for the same condition?

A For the same symptoms. You know, you have to -- and you have multiple ways of ruling things out, like, you know, imaging, and lab work, and different things that are not always immediately available.

Q Okay. And so if something isn't immediately available to rule out a dangerous cause, it's the job of the nurse practitioner to get the patient to a place

1 A Just if someone comes in with ankle pain and,

you know, there are -- there's these conditions called

3 Ottawa rules. That if they don't have a pain in this

4 certain place or this certain finding, then the

5 likelihood of a fracture is low and you don't need to 6 get an x-ray.

Q Okay. Would do the Ottawa rules also cover --

what do they cover?

- A Usually fractures.
- Q Okay. Anything else? Any other conditions?
- 11 A No. Not as far as I know.
- 12 Q A fracture would be different than something 13 like appendicitis, in the sense of the harm it could 14 cause to you; is that right?

15 A It can still leave lasting damage. I mean, 16 appendicitis undiagnosed could cause serious a medical 17 problem, too. But an undiagnosed fracture can lead to 18 serious medical complications as well.

19 Q Okay. The important -- can an undiagnosed 20 fracture -- it sounded like an undiagnosed fracture of 21 an ankle was an example you gave, right?

- A Yes
 - Q Is that something that can kill you?
- 24 A In certain circumstances, I suppose it could.
- 25 Not usually.

```
Page 78
                                                                                                                         Page 80
 1
               Those would be pretty -- yeah. Not usually,
                                                                    1
                                                                       hours; is that correct?
 2
     right? Can an undiagnosed heart attack kill you?
                                                                    2

13
     undiagnosed heart attack can kill you within a matter of
                                                                   13
                                                                             Α
                                                                                  It's possible, but not always.
     minutes or a matter of hours, correct?
                                                                                  MR. MCCAULEY: Ms. Pisney, did you answer?
14
                                                                   14
15
               MR. MCCAULEY: Objection.
                                                                   15
                                                                             Α
               MR. KNOTT: Yeah. It's vaque.
                                                                                 What was your answer? I didn't get it.
16
                                                                   16
                                                                             Q
               There are heart attacks that can kill
17
                                                                   17
                                                                             Α
                                                                                  Possible, but not always.
                                                                                  Okay. So sometimes it can kill within minutes
     immediately, and then there are heart attacks that lead
18
                                                                   18
                                                                             Q
                                                                        or hours and sometimes it won't; is that right?
     to some damage and don't necessarily bring death.
19
                                                                   19
20
               Okay. But many heart attacks do bring death;
                                                                   20
                                                                                 That's true.
                                                                             Α
21
     is that right?
                                                                   21
                                                                                 MR. KNOTT: Object to the form of the
               MR. MCCAULEY: Same objection.
                                                                   22
                                                                             question. It's vaque. And it's incomplete
22
                                                                             hypothetical, therefore lacked foundation. You can
23
          Α
               I don't know if I would say many.
                                                                   23
24
               I'm sorry.
                                                                   24
25
          Α
               I said, I don't know if I would say many. I
                                                                   25
                                                                                 Yes. You can -- it can happen quickly. It
                                                                             Α

                                                                        question, Ms. Pisney. If it's possible for a heart
13
     likely than death from a broken ankle?
                                                                  13
14
               MR. KNOTT: I object to the form of the
                                                                   14
                                                                        attack to kill you within minutes or hours of the
15
          question.
                                                                   15
                                                                        manifestation of symptoms, you have to rule it out or
               It's -- I'm sure it would be more likely to be
                                                                        treat it, before it has the opportunity to kill the
16
                                                                  16
     death from a heart attack than a broken ankle.
                                                                        patient; is that right?
17
                                                                  17
               Okay. And death from a heart attack can occur
                                                                                 MR. MCCAULEY: Object to form.
18
                                                                   18
19
     in a short period of time, meaning minutes or hours; is
                                                                   19
                                                                                 It would be important to make a diagnosis of a
20
     that correct?
                                                                   20
                                                                        heart-related condition from symptoms. But -- I mean, I
               MR. KNOTT: Object to the form. Asked and
                                                                        -- people complaining of chest pain, complain of chest
21
                                                                   21
22
          answered. Vaque. Overly broad.
                                                                   22
                                                                        pain for many different reasons.
                                                                                  Is one -- okay. Is one of those reasons, that
23
               The faster it could be diagnosed, the better.
                                                                  23
24
               That wasn't my question. My question was,
                                                                   24
                                                                        they're actually experiencing chest pain?
     death from a heart attack can occur within minutes or
25
                                                                   25
                                                                                 Any pain of the chest is chest pain. It

10
               That is one of the symptoms. Yes.
                                                                   10
                                                                                  Okay. I will zoom in a little and hopefully
11
               That's one of the causes of chest pain; is
                                                                   11
                                                                        that'll allow us to discuss this. One of the -- the
                                                                        first sign that's indicated is, "Pain or discomfort in
     that right?
12
                                                                   12
                                                                        the chest," do you see that?
13
               MR. MCCAULEY: Object to form.
                                                                   13
              Is -- is -- cardiac related is a -- is a cause
                                                                             Α
                                                                                  I do.
14
          Α
                                                                   14
                                                                                  Another sign is, "Nausea, or vomiting, or
15
     of chest pain. Yes.
                                                                   15
               Okay. And one of the cardiac related causes
                                                                        lightheadedness," do you see that?
16
                                                                   16
17
     of chest pain is the onset of a heart attack; is that
                                                                   17
                                                                             Α
18
     right?
                                                                   18
                                                                             Q
                                                                                  A third is, "Jaw, neck, or back pain," do you
              MR. MCCAULEY: Same objection.
                                                                        see that?
19
                                                                   19
              It's possible.
                                                                   20
                                                                             Α

                                                                    9
                                                                             Α
               And you want to rule out the most serious
                                                                                  Would you agree that heart attack -- that
10
                                                                   10
     potential diagnosis first, in a time frame before it's
                                                                        those signs and symptoms that we just discussed can come
11
                                                                   11
12
     able to kill the patient; is that right?
                                                                   12
                                                                        and go, when someone is having a heart attack?
13
               Yes. You don't want to kill the patient.
                                                                   13
                                                                                  MR. KNOTT: Object to vaque and overly broad.
14
               Just bear with me, Ms. Pisney. I'm going to
                                                                   14
                                                                                  They -- they can.
15
     show you a document.
                                                                   15
                                                                                  Okay. And so the fact that the symptoms have
              MR. WEIL: I believe we are on Exhibit 28. And
                                                                        dissipated momentarily is not a sign that someone is not
16
                                                                   16
          this is -- so we'll mark this as Exhibit 28, and
                                                                        having a heart attack; is that right?
17
                                                                   17
          for the court reporter, Sydney, what we're doing
                                                                                  MR. MCCAULEY: Object to form.
                                                                   18
18
19
          is, we are just continuing with the exhibits from
                                                                   19
                                                                                  Let me rephrase that. The fact that someone's
20
          the prior depositions and using those as static
                                                                   20
                                                                        -- those, the signs that we were just reviewing, one of
                                                                        more of them may have dissipated momentarily, that does
21
          numbers, so...
                                                                   21
```

23

24

25

People can have a heart attack with no signs

not rule out the possibility that someone is still

having a heart attack; is that right?

or symptoms as well.

COURT REPOTER: Okay. Thank you.

This is an infographic provided by the

              Does one of the things that -- these signs,
2
    however, are clues that someone is more likely to be
3
     having a heart attack, right?
               MR. MCCAULEY: Object to form.
 5
               Clues that it's possible.
 6
              And if someone's exhibiting one or more of
     these signs and symptoms, it's important to rule out the
7
8
     possibility that they're having a heart attack; is that
9
10
               MR. MCCAULEY: Same objection.
11
              MR. KNOTT: Object. It's vague and overly
          broad. Incomplete hypothetical.
12
13
               I wouldn't say that one symptom would be
     indicative of a heart attack. There's many -- I mean,
14
15
     if someone came to me with nausea and vomiting, that's
     not the first thing that I would think of.
16
     BY MR. WEIL:
17
18
          Q
               Okay. If someone's having chest pain, pain in
     the shoulder, shortness of breath, nausea and vomiting,
19
20
     would those be symptoms that someone might be
21
     experiencing a heart attack?
22
               MR. MCCAULEY: Object. Incomplete
23
          hypothetical. Vague.
               MR. KNOTT: Join.
24
25
              It's possible.
         Α
1
     BY MR. WEIL:
```

```
And those questions would be designed to rule
out the possibility of heart attack, right?
    Α
          Yes.
    Ω
         Okay. And it would be important to rule out
the possibility of a heart attack in someone
experiencing the conditions we just discussed, because
heart attacks can kill within hours or minutes; is that
right?
         MR. KNOTT: Object to the form of the
    question. It's vague. Overly broad. It's also
    been asked and answered three times.
         I did say that that could be one of the
    Α
symptoms. But -- or -- yeah. But I've answered it.
         MR. KNOTT: Stop. Stop. Can you ask the
    question again? She clearly didn't have the
     question in mind.
         MR. WEIL: If you could read it back, Sydney.
          COURT REPORTER: Just one moment, please.
         AUTOMATED VOICE RECORDING: Recording in
     progress.
          COURT REPORTER: Sorry. One moment.
                (REPORTER PLAYS BACK REOUESTED
```

I'd be asking a lot more questions about any

drugs that they might have done recently, any cardiac

history, any family history.

Page 87

If given that it's possible, is a heart attack something that it would be important to rule out if you're providing medical care to that person?

MR. MCCAULEY: Same objection.

MR. KNOTT: Same objection. It's asked and answered. Vaque. Overly broad. And incomplete hypothetical.

You know, every -- every patient is different. Every patient has a different history. Every symptom is expressed differently. So it's all very individual. BY MR. WEIL:

If different individuals were experiencing the same symptoms that I just described to you, is there one for whom you would not try to rule out heart attack?

There are certain individuals where a heart attack would be extremely unlikely. A 20-year-old is unlikely to be having a heart attack.

Okay. And so if a 20-year-old were experiencing pain or discomfort in the chest, nausea or vomiting, discomfort in the shoulder or arm, in the left shoulder, and shortness of breath, you would not attempt to rule out a heart attack at that point?

24 MR. KNOTT: Vague. Overly broad. Incomplete 25 hypothetical.

TESTIMONY)

Page 89

So as I said before, it's possible that it can happen quickly, happen never, happen slowly. There are many people that have heart attacks that are undiagnosed at the time and they are diagnosed afterwards.

I don't believe you answered my question, Ms. Pisney, because it had to do with whether it was important to rule it out because it's possible for a heart attack to kill within hours or minutes?

9 10 MR. KNOTT: Object to form. Compound question. Facts not in evidence. 11

Α It's important to rule out a cardiac cause of chest pain.

14 Okay. And it would be even more important to rule out -- chest pain is number one on this list, 15 right? The first heart -- that little blue heart, 16 right? 17

Α Yes.

19 0 So even chest pain on its own, it would be 20 important to rule out a heart attack for chest pain on its own, right? 21

22 MR. KNOTT: Objection. Mischaracterizes.

Not every chest pain is a heart attack.

Right. But it's important to rule out that it's not a heart attack in the differential diagnosis;

     is that right?
2
               MR. MCCAULEY: Asked and answered.
3
               MR. KNOTT: Same objections.
               Ms. Pisney, there's a question pending. Do
 4
 5
     you need me to ask it again?
          Α
              Yes.
 6
7
               Okay. If a person exhibited just that first,
8
     the little number one blue heart, pain or discomfort in
     the chest, you would want to rule out -- it would be
9
10
     important to rule out a heart attack, even if they just
11
     had that one symptom; is that right?
               MR. KNOTT: Object. It's vaque. Overly
12
13
         broad. And incomplete hypothetical.
               It would depend on the person.
14
15
               Okay. What kind of a person would you not
     feel the need to rule out heart attack, if they
16
     presented with pain or discomfort in the chest?
17
              MR. KNOTT: The same objections.
18
              MR. MCCAULEY: Vaque.
19
              I believe I answered that previously, when we
2.0
          Α
21
    had the discussion about the 20-year-old.
22
               Okay. So it would be a 20-year-old where you
     wouldn't feel the need to rule out heart attack as a
23
     cause of chest pain?
24
               MR. KNOTT: Object. Vague. Overly broad.
25
                                                      Page 91
```

Every -- every patient that presents with

Not necessarily. There are other causes.

Okay. Is that something you would want to try

Yes. That would be a serious thing that you

you know, heart attack is one cause of chest pain.

in your differential diagnosis list, it's the most

MR. MCCAULEY: Object to form.

MR. KNOTT: Same objections.

can think of that would be maybe more emergent.

MR. KNOTT: Same objections.

MR. MCCAULEY: Object.

serious and the most emergent; is that right?

hypothetical.

Α

BY MR. WEIL:

heart attack?

to rule out as well?

would want to rule out.

24

25

chest pain is not someone that is having a heart attack, so many different things go into that diagnosis. And, 3 4 Right. And in the list that you're making --5 6 7 8 MR. KNOTT: Object -- that -- completely void 9 of any context. Vaque. Overly broad. Incomplete 10 11 12 13 Other causes even more deadly and severe than 14 15 16 17 It's very -- I mean, there are so many causes 18 of chest pain. I mean, there's aortic aneurysm is one I 19 20

Page 92 Okay. If you ruled out aortic aneurysm, you'd still want to rule out a potential second cause like chest pain; is that right? MR. KNOTT: Object. Vaque. Overly broad. And incomplete hypothetical. Asked and answered. I believe I answered before that chest pain is

a serious complaint that needs to be investigated. It needs to be ruled out, correct? Or 0 treated?

MR. KNOTT: This is going on -- I'm going to start -- I'm going to have a real problem with the asked and answered nature of this. You've been at differential diagnosis for an hour and five minutes, and so, object to form --

MR. WEIL: Okay. Doug, you're making -- I just want to note for the record, you're making really frivolous asked and answered objections. The question that you just objected to as asked and answered was, if you've ruled out aortic aneurysm, you'd still want to rule out chest pain? It's the first time aortic aneurysm has been mentioned in this deposition. So it's just not possible that it's been asked and answered. I'm just trying to get clear answers from this witness on this topic and move forward. That's all I'm trying to do

here. Okay?

Page 93

MR. KNOTT: Yeah. Don't interrupt me. And the problem is, you say you're looking for clear answers. You get the clear answer 15 or 20 times, and you keep doing it, and it becomes harassment, and abuse of the process. And you think you're the only one who can talk and speak during these depositions, and you're wrong. I have to protect my witness from harassment. And, Steve, I think you're a nice guy. But I think you try to beat these witnesses with repeated questioning, until you get exactly the words you want, and that's not what this process is about. So, you know, I'm going to protect her. You ask the questions and that's how we'll go.

MR. WEIL: Okay.

So heart attack would be one of the things Α that you want to rule out.

BY MR. WEIL:

21

22

23

Okay. Would you agree with me, Ms. Pisney, that someone having high blood pressure is a risk factor for having a heart attack?

Not necessarily. Α

24 0 What's that? Not necessarily. 25 Α

KENTUCKIANA

Page 94 1 0 Is it possible? 1 2 MR. MCCAULEY: Object to form. 2 3 There are many people that have high blood 3 pressure that have never had a heart attack. It's not a 4 5 risk factor for a heart attack. 5 MR. WEIL: I'm showing you now, what we'll 6 6 7 mark as Exhibit 29. This is a publication by the 7 8 US Department of Health and Human Services. It's 8 four pages long. I'll scroll through it with you. 9 9 10 BY MR. WEIL: 10 11 Can you see it on the screen, Ms. Pisney? 11 (EXHIBIT 29 MARKED FOR IDENTIFICATION) 12 12 13 Α I can see it, but I can't read it. 13 14 That's fine. We'll get to reading it. Do you 14 see here on the first page of Exhibit 29, it says, 15 15 "Major risk factors for a heart attack you can control, 16 16 include smoking, overweight and obesity, high blood 17 17 pressure, cholesterol, diabetes, an unhealthy diet, and 18 18 lack of physical activity," do you see that? 19 19 20 Α I do. 20 21 Do you agree? 21 I think that that's --22 22 Α 23 Q Go ahead. 23 I think that's as -- overall. I mean, you 24 Α 24 have a risk factor if you smoke, if you're overweight, 25 25 Page 95

Page 96 to be a risk factor for a heart attack? MR. MCCAULEY: Object to form. Some basis, some family history, some personal history, some -- I mean, just -- there are many, many people that have high blood pressure. Of those people that have high blood pressure, there's a very small portion of them that have a heart attack. If someone had high blood pressure and congestive heart failure, would that put them at greater risk for a heart attack? MR. KNOTT: Object to the form of the question. It's vaque. Incomplete hypothetical. A history of congestive heart failure is multifactorial as well. You can have a history of congestive heart failure from -- that resolves and is a normal -- it's hypothetical and I can't answer. Okay. Is a -- let me ask you a nonhypothetical question, which is congestive heart failure a risk factor for a heart attack? MR. KNOTT: Object to form. MR. MCCAULEY: Join. It can be a residual of a heart attack. Depends on the congestive heart failure. Okay. If someone were to present to you -well, strike that. I'm sorry, Ms. Pisney. Let me put

1

2

3

4

7

13

16

21

```
if you have high cholesterol, and high blood pressure,
1
2
    and diabetes, and an unhealthy diet, and don't exercise.
3
    I mean, that's just unhealthy.
```

Are you -- so maybe we should clarify something. I'm not saying that every person with high blood pressure has a heart attack, but is it a risk -is high blood pressure a risk factor for having a heart attack?

Α Not on its own.

4

5

6

7

8 9

10

11

12

13

18

24

25

Okay. Are you suggesting -- are you reading this passage to mean that a person must have all of these conditions, in order for them to amount to a risk factor for a heart attack?

14 No, no. Diabetes is considered a risk factor on its own. But I wouldn't say that just high blood 15 pressure on its own would be a risk factor for a heart 16 attack. 17

Q Okay.

19 Α I think that someone that hasn't taken their 20 blood pressure medicines have a risk for high blood 21 pressure.

22 Okay. So you don't think that high blood 23 pressure is a risk factor for a heart attack?

Α Not on its own.

Okay. What would it need to be combined with

Page 97 this Exhibit 28 back up. After the first page that we

were just looking at, you see what is a heart attack and who is at risk, right? Do you see that, Ms. Pisney?

5 0 Okay. The next page of Exhibit 28 says, "Know the symptoms of a heart attack," do you see that? 6

Α

8 And it describes -- I'm going to zoom in here. 9 If you want to read more of the document, that's fine.

Just let me know. You see on the left hand column, it 10 says, "Know the symptoms of a heart attack," do you see 11

12 that?

> Α Yes.

14 Okay. The first symptom of a heart attack is 15 chest pain or discomfort, do you see that?

Yes.

MR. KNOTT: Object to the form of the 17 18 question.

19 Do you agree that chest pain or discomfort is 20 a symptom of a heart attack?

It can be. Α

22 A symptom -- and just so we're clear, a 23 symptom doesn't mean you definitely have something or 24 you definitely don't. It means it's a symptom, as in, a

possible cause of a symptom is the underlying condition, 25

Page 98 which in this case we're talking about a heart attack,

2 right?

1

6

12

13

14

7

14

15

17

18

25

- 3 It can be a symptom of a heart attack. Yes.
- Okay. So that's -- one of the symptoms of 4 heart attack is chest pain or discomfort; is that right? 5
 - Α Correct.
- 7 Okay. The next sentence, it says, "Most heart 8 attacks involve discomfort on the center or left side of the chest." Would you agree with that? 9
- 10 It would -- it just depends on the person, but 11 I quess, that's a common symptom.
 - Okay. The next sentence says, "The discomfort usually lasts for more than a few minutes or goes away and comes back," do you see that?
- 15 Α I do.
- Would you agree with that? 16
- 17 Yes. Very fleeting episodes of chest pain 18 usually are not cardiac in nature.
- Okay. If someone has chest pain and it goes 19 20 away, does that mean that -- at a particular time, does 21 that mean that they're no longer at risk for heart 22
- 23 MR. KNOT: Object. Vague. Overly broad. 24 Incomplete hypothetical.
- 25 Let me ask a different question, Ms. Pisney.

1 MR. KNOTT: Object to form.

- 2 Again, we're -- that's hypothetical. This Α
- 3 case, she had chest pain once.
- 4 If -- okay. Another symptom of chest pain listed here is, "Upper body discomfort," do you see 5
- 6 that?

11

18

25

3

4

9

- 7 Α That's a symptom of a heart attack that they 8 list.
- 9 Okay. And one of the symptoms is, "Pain in Q 10 the shoulders," do you see that?
 - Α Yes.
- 12 Q Would you agree with that, as a symptom of a heart attack? 13
- Sometimes chest pain radiates to the shoulder, 14 Α 15 as a symptom of a heart attack.
- Okay. Another symptom that this publication 16 identifies is, "Shortness of breath," do you see that? 17
 - Α I do.
- 19 0 Okay. And it says that, "This may occur" --20 referring to shortness of breath as a symptom of a heart
- 21 attack. "This may occur, be your only symptom, or it
- 22 may occur before or along with chest pain or
- 23 discomfort," do you see that?
- Α 24 Yes.
 - 0 Would you agree that shortness of breath that

Page 99

- 1 Given the chest pain or discomfort associated with a
 - heart attack can go away or come back. If a person is
- 3 experiencing chest pain and then at a particular point
- in time, thereafter, they're not. Does that mean that 4
- 5 they are no longer at risk for heart attack?
- MR. KNOTT: Object to form. 6
 - MR. MCCAULEY: Join. Incomplete hypothetical.
- It could mean that it wasn't a symptom of a 8 9 heart attack or it -- if it comes back, then it would be more serious. But if it goes away for hours at a time
- 10 and doesn't come back, then I'd be less likely to 11 12 suspect a heart attack.
- 13 Okay. You need to know that it was -- had
 - gone away for hours at a time; is that right? I mean, if it's -- it's unknowable.
- What do you mean by that, Ms. Pisney? 16
- I don't -- I mean, if someone has chest pain and it goes away, that could be they had gas. And if it 19 never comes back, then it's unlikely to be cardiac.
- 20 Okay. You mean, "It never comes back," any point, thereafter, right? 21
- 22 I don't know if -- I mean, chest pain separated by years wouldn't necessarily lead me to think 23 24 that people were having a heart attack.
 - How about chest pain separated by a few hours?

Page 101 occurs before or along with chest pain or discomfort, is 1 2 a symptom of a heart attack?

- Α It could be.
 - Meaning that it's a symptom of a heart attack,
- that as a potential -- that's a symptom indicating that 5
- it's a potential cause the -- strike that. When you say 6
- 7 it could be, you mean that's a cause of that symptom

heart attack causing the symptom; is that right?

- that you would need to rule out because it's a potential 8
- I -- if someone presented to me with shortness 10 of breath, that's not the first thing that I would think 11
- 12 about. No. 13 0 How about if -- okay. So just -- if it was
- 14 shortness of breath that occurs before chest pain, is 15 that, to you, a symptom of a heart attack that would
- want -- cause you to want to rule out heart attack, as a 16
- cause for those symptoms? 17
- In a person with asthma? No. I'd be more 18 19 likely to -- to think it's related to the asthma, could
- 20 also be related to anxiety, panic attack.
- Okay. That'd be a possibility, right? 21 Q
- 22 Α
- 23 And would that be something you'd want to rule
- 24 out?
 - Α The panic attack or the asthma?

16

17

22

25

1

2

3

4

5

6

7

8

9

10

11

12

17

18

19

Page 102 1 Sure. Well, let me put it this way. If 2 someone has asthma, that's potential shortness of breath followed by chest pain. Are you saying that -- are you 3 -- let me back up. We're referring just here to shortness of breath, right? So if you're saying -- if I 5 understand you correctly, you're saying that shortness of breath could just be a sign of asthma, right?

8 Α Could be, in a -- especially in a person that 9 has asthma. 10

Okay. And if there's shortness of breath, that's followed by chest pain, is that a symptom of asthma?

13 It depends. I mean, they -- albuterol can cause you to have racing heart. If you've taken 14 15 albuterol for your shortness of breath, that could be associated with some chest pain, I suppose. 16

Would another cause of shortness of breath followed by chest pain, be a heart attack?

It's possible.

6

7

11

12

17

18

19

3

4

5

6

7

8

9

10

11

12

13

14

25

20 Is that a possibility that you would want to 21 rule out in your differential diagnosis?

22 MR. KNOTT: Vaque. Overly broad. Incomplete 23 hypothetical.

There are -- it's -- I -- you know that you 24 25 can't just throw some symptoms at me, and have me make a 0 What do you mean by that?

2 Α There are so many options for these symptoms to show up and in dealing with patients, you have to 3 take each patient individually, give the information that you have at that time, and then make a decision. 5

6 If you received a call saying, this patient has chest pain be -- well, this chest patient has chest 7 8 pain, before that they had shortness of breath and 9 that's the call you received. What else would you want 10 to know, in order to rule out the possibility of heart 11 attack?

Α I would want to know how old they were, when 12 13 the chest pain occurred, were they at rest, were they in activity, did they have any other symptoms, what were 14 their vital signs, what medications were they on? 15

Would any of the things that you just listed rule out the possibility of heart attack?

Usually chest pain at rest is not a cardiac in 18 Α 19 nature.

20 Is it possible that it's cardiac in nature, if 0 21 someone's having a heart attack?

> Be less likely. Α

Can people at rest have a heart attack? 23 0

I suppose they could. 24 Α

> Okay. So the fact that a person was at rest 0

Page 103

diagnosis based on those, without a specific patient and 1 2 the -- everything that goes along with that patient.

If a patient presented to you with shortness of breath, followed by a heart attack, would you want to rule out -- or -- I'm sorry, strike that. If a patient presented to you with shortness of breath followed by chest pain, and that was their medical history, would you run to rule out heart attack, as a potential cause for those symptoms?

Those are symptoms of a heart attack. They could also be other -- symptoms of something else.

Okay. And if they are symptoms of a heart attack, you would want to ensure that you had ruled it out, correct?

15 MR. MCCAULEY: Object to the form of the questions. Vaque. Overly broad. And incomplete 16 hypothetical. 17

You can't always rule everything out 18 19 immediately.

20 BY MR. WEIL:

Okay. Would you want to attempt to rule it 21 out? 22

MR. MCCAULEY: Vaque. Overly broad. 23

24 Incomplete hypothetical.

Again, it depends on situation that you're in.

Page 105 -- and experiencing the symptoms of shortness of breath followed by chest pain, the fact that they were at rest would not rule out a heart attack; is that right?

MR. KNOTT: Object to form.

I would be less likely to think of heart Α attack as a potential, if it happened at rest.

Okay. Is it one of the conditions that you Q would make to sure you'd want to rule out, though?

MR. KNOTT: Object to form.

When -- I've answered this previously, the chest pain is a symptom of heart attack, and you'd want to rule out a heart attack.

13 Sure. We're talking here, you said, if 14 someone was at rest and experiencing these symptoms, you 15 think a heart attack would be more likely, so I'm asking about that. So if someone's at rest --16

Α Less likely.

> Q Less likely-

> > MR. KNOTT: Did you hear her?

20 Yes. All right. If I understand you 21 correctly, if someone's at rest, and you are alerted

22 that they have shortness of breath followed by chest

23 pain. If I understand you correctly, you think it would

24 be less likely that they would have a heart attack than

if they'd been active; is that right? 25

```
Page 106
                                                                                                                        Page 108
1
         Α
              Yes.
                                                                       for whom you believed a heart attack was less likely,
                                                                   1
2
              Okay. Nevertheless, is heart attack a cause
                                                                   2
                                                                       correct?
    of those symptoms that you would want to rule out in
                                                                                 MR. MCCAULEY: Object to form.
3
                                                                   3
    your differential diagnosis?
                                                                   4
                                                                                 MR. KNOTT: Can I -- asked and answered,
              MR. KNOTT: Vague. Overly broad. Incomplete
 5
                                                                   5
                                                                            multiple times.
         hypothetical. Go ahead.
                                                                                 You have to take everything into consideration
 6
                                                                   6
                                                                       when you're deciding, and chest pain at rest is less
                                                                   7
              I answered that previously.
8
              Do you remember the rule to be laid out at the
                                                                   8
                                                                       likely to be cardiac in nature.
    beginning of this deposition. Which is if, unless your
                                                                       BY MR. WEIL:
9
                                                                   9
10
    lawyer instructs you not to answer a question, you're
                                                                  10
                                                                                 Does that mean that you would not rule out
11
    obligated to answer it. I'm asking you to please answer
                                                                  11
                                                                       heart attack for someone who is at rest?
    that question.
                                                                                 MR. KNOTT: Object to form.
12
                                                                  12
13
              MR. KNOTT: And --
                                                                  13
                                                                                 MR. MCCAULEY: Object to the form of the
             And I said --
                                                                            question. Vague. Incomplete hypothetical.
14

                                                                   8
9
    likely that they were experiencing a heart attack in
                                                                   9
                                                                            break fairly soon. We've been at it a long time.
    your mind, correct?
                                                                                 MR. WEIL: Sure. We can take a break right
10
                                                                  10
              MR. KNOTT: Object to form.
                                                                            now. Would we like to do lunch?
                                                                  11
11
12
              MR. MCCAULEY: Vague. Speculative.
                                                                  12
                                                                                 MR. KNOTT: Let me talk to the witness
13
              That is what I said. Correct.
                                                                  13
                                                                            briefly.
14
              Okay. And my question to you was,
                                                                  14
                                                                                 MR. WEIL: Okay.
15
    nevertheless, would you want to rule out heart attack as
                                                                  15
                                                                                 THE WITNESS: Like a half hour.
                                                                                 MR. KNOTT: Yeah. I think like 20 minutes to
    a potential cause of the -- those two symptoms of
16
                                                                  16
    someone who you learned was at rest?
                                                                            a half hour would be good.
17
                                                                  17
              MR. MCCAULEY: Same objection.
                                                                                 MR. WEIL: Let's let's come back at 1:30.
18
                                                                  18
19
              MR. KNOTT: Same objections. Asked and
                                                                  19
                                                                                 MR. KNOTT: Okay.
20
         answered, multiple times.
                                                                  20
                                                                                 MR. MCCAULEY: All right.
              As I said, shortness of breath and chest pain
                                                                                 MR. KNOTT: Sounds good.
21
                                                                  21
22
    symptoms of a heart attack and you would want to rule
                                                                  22
                                                                                 MR. WEIL: Okay.
23
    out a heart attack. I've said that many times.
                                                                  23
                                                                                 COURT REPORTER: We're off the record. The
24
    BY MR. WEIL:
                                                                  24
                                                                            time is 1:00 p.m.
25
                                                                                        (OFF THE RECORD)
              Even for someone at rest, who you believed --

                                                                   18
                                                                             Q
                                                                                  Where are you, Ms. Pisney?
     shortness of breath bullet, it says, "Other possible
                                                                                  The beginning of the --
19
                                                                   19
                                                                             Α
20
     symptoms of a heart attack." Do you see that?
                                                                   20
                                                                                  Sure. Go ahead. I'm sorry.
                                                                             0
                                                                                  At the beginning of the paragraph.
21
          Α
                                                                   21
                                                                             Α
22
               Okay. So nausea is another possible symptom
                                                                   22
                                                                                  Okay. You're up here with, "Not all heart
                                                                             Q
     of a heart attack; is that right? According to this
23
                                                                   23
                                                                        attacks," up here?
                                                                                  Right. And then -- I see where you're talking
24
     document?
                                                                   24
                                                                        about the first bullet.
25
         Α
              Yes.
                                                                   25
                                                     Page 111
                                                                                                                        Page 113
                                                                                  Right. I'm talking about this first bullet.
1
               Would you agree that you should pay attention
                                                                    1
2
     to nausea as another possible symptom of a heart of a
                                                                    2
                                                                        So it says in the first bullet, "Heart attacks can start
                                                                        slowly and cause only mild pain or discomfort," do you
3
     heart attack?
                                                                    3
 4
          Α
               Yes. But also symptom of many other things.
                                                                    4
                                                                        see that?
5
               Okay. One of those things could be a heart
                                                                    5
                                                                             Α
                                                                                  Yes.
          0
     attack, correct?
                                                                                  Would you agree with that?
                                                                             Q
6
                                                                    6
7
          Α
                                                                             Α
                                                                                  It's possible.
               Especially if it were combined with other
                                                                                  It's possible you agree, or it's possible that
8
                                                                    8
                                                                             Q
     symptoms like chest pain, or discomfort, or shortness of
9
                                                                    9
                                                                        that is a course of symptoms of a heart attack?
     breath; is that right?
                                                                                  It's possible that that might be a symptom of
10
                                                                   10
                                                                             Α
               It's one of the possibilities.
11
                                                                        a heart attack.
                                                                   11
12
               And in the differential diagnosis, that would
                                                                   12
                                                                             Q
                                                                                  Okay. The second sentence says, "Symptoms can
13
                                                                   13
```

be all the more reason to exclude heart attack as a cause of such a symptom?

15 MR. KNOTT: Object to the form of the question. Vague. Overly broad. Lacks foundation. 16 Incomplete hypothetical. 17

MR. MCCAULEY: Answered.

19 It would be part of the things that I would 20 take into consideration.

BY MR. WEIL: 21

14

          Α
               It's possible that symptoms may come and go
                                                                    1
                                                                             0
                                                                                  Is aspirin a way of treating a heart attack?
2
    over several hours.
                                                                    2
                                                                             Α
                                                                                  It's one of the medications given.
3
               Turning you to the third page of Exhibit 29.
                                                                                  Is it an effective means to treat a heart
                                                                    3
                                                                             0
     You see this column on the left says, "Quick action can
                                                                    4
                                                                        attack?
 4
     save your life. Call 911"?
                                                                    5
                                                                                  MR. MCCAULEY: Object to form.
 5
          Δ
               Yes
                                                                    6
                                                                                 It wouldn't be the only treatment.
 6
                                                                             Α
               I'm interested in the third bullet down where
                                                                    7
                                                                                 Okay. So aspirin alone would not be
7
                                                                             Ω
8
     it begins, "The 911 operator," do you see that?
                                                                    8
                                                                        sufficient to treat a heart attack; is that correct?
               I see something, but I can't read it.
                                                                    9
                                                                                  MR. KNOTT: Object to form of the questions.
9
10
          0
               Okay. I'll zoom it in. Does that help you?
                                                                   10
                                                                             Vaque. Overly broad. And incomplete hypothetical.
11
          Α
                                                                   11
                                                                                  You would need to do more, if you were having
                                                                       a heart attack.
12
          Q
               Can you read it now?
                                                                   12
13
          Α
               Pull it out a little bit. Yep.
                                                                   13
                                                                             0
                                                                                  Going to show you now a document we'll mark as
14
          0
               Okay. Says -- just take a look at this
                                                                  14
                                                                        Exhibit 30. This is a publication by Healthline and
    bullet, and then I have a question about the last
15
                                                                  15
                                                                        I'll page through it real quickly for you, Ms. Pisney.
     sentence
                                                                        It's five pages long it's titled, "Blood Pressure
16
                                                                  16
          Α
                                                                        Changes During a Heart Attack." I'm interested in the
17
              I read it.
                                                                  17
18
               Okay. It says, "Aspirin taken during a heart
                                                                   18
                                                                        line here, in the second paragraph. Can you read it
                                                                        Ms. Pisney or should I zoom in a little?
     attack can limit the damage to your heart and save your
19
                                                                  19
20
     life," do you see that?
                                                                   20
                                                                                        (EXHIBIT 30 MARKED FOR IDENTIFICATION)
21
         Α
                                                                   21
                                                                                 MR. KNOTT: I think you need to zoom in.
22
               Okay. And the next bullet is in bold, where
                                                                   22
                                                                                  Zoom in.
                                                                             Α
23
     it says, "Every minute matters," do you see that?
                                                                   23
                                                                             Q
                                                                                 Okay. Is that any better?
24
          Α
                                                                   24
                                                                             Α
                                                                                  Yes.
25
               Okay. To back up real quick, would you agree
                                                                   25
                                                                                  Okay. It says, "Any blood pressure changes
          0
                                                                             0
                                                     Page 115
                                                                                                                        Page 117
     that aspirin taken during a heart attack can limit the
                                                                        that may occur during a heart attack are unpredictable,
1
                                                                    1
2
     damage to your heart?
                                                                        so doctors generally don't use them as a sign of a heart
                                                                        attack," do you see that?
3
         Α
               It can help.
                                                                    3
               Okay. In the next bullet down it says, "Every
                                                                                  Yes, I do.
 4
                                                                    4
                                                                             Α
5
    minute matters. Never delay calling 911, to take
                                                                    5
                                                                             0
                                                                                  Would you agree that blood pressure changes
     aspirin, or do anything else you think might help," do
                                                                        during a heart attack are unpredictable?
6
                                                                    6
7
     you see that?
                                                                    7
                                                                             Α
                                                                                 I would.
                                                                                  Would you agree that blood pressure changes
8
         Α
               Yes.
                                                                    8
                                                                             Q
9
               Would you agree that one should never delay
                                                                    9
                                                                        shouldn't be used to rule in or rule out a heart attack?
                                                                                 MR. MCCAULEY: Object to form.
     calling 911, to take aspirin, or do anything else that
                                                                   10

     they think might help, when they're experiencing the
                                                                                  That's true. That's what I've said
11
                                                                   11
12
     symptoms of a heart attack?
                                                                   12
                                                                        previously, that not everybody with high blood pressure
                                                                        has a risk for heart attack. Some people with heart
13
              MR. KNOTT: Object to vaque. Overly broad.
                                                                  13
14
          And incomplete hypothetical.
                                                                   14
                                                                        attacks will have low blood pressure.
              That would be, if you knew you were having a
15
                                                                   15
                                                                                  Right. And so this is -- this -- do you read
    heart attack.
                                                                        this sentence as referring to, blood pressure changes
16
                                                                  16
17
               Okay. If you believed that -- well, if
                                                                        during a heart attack?
                                                                   17
     someone was exhibiting the symptoms of a heart attack,
                                                                            Α
18
                                                                   18
                                                                                  That's what it says. Yes.
19
     would aspirin be a way to treat those symptoms and --
                                                                   19
                                                                                  Okay. And so a doc -- you agree that during
20
     therefore, in the differential diagnosis?
                                                                   20
                                                                        -- while someone's experiencing symptoms that are --
               You can use aspirin to help with the -- slow
                                                                   21
                                                                        that may be a heart attack, you would not rule out a
21
22
     the blood clotting and that would help in a heart
                                                                   22
                                                                        heart attack by using blood pressure measurements?
23
     attack. But you can also use aspirin as an anti-
                                                                   23

 6
                                                                   7
7
     documents this time. And just --
                                                                            Α
                                                                                 Yes.
8
          Α
                                                                   8
                                                                                 Does that refresh your recollection at all, as
              Okav.
               -- go over the course of events there. So do
                                                                       to any conversation you might have had about Ms. Boyer,
9
                                                                   9
10
     you -- well, we'll get there. I was going to ask your
                                                                   10
                                                                       in that first set of calls before -- call or calls
11
     lawyer to show you some documents -- or if he has any,
                                                                   11
                                                                       before the high blood pressure call?
    but we'll wait. We've done that in the last deposition,
                                                                                 MR. MCCAULEY: Object to form.
12
                                                                  12
    but we don't need to yet. The first document I want to
                                                                                 That would've been --
13
                                                                  13
                                                                            Α
     show you, Ms. Pisney, is Exhibit 3, and it's the intake
                                                                                 MR. MCCAULEY: Yeah.
14
                                                                  14
15
    medical screening report. I believe it's a document
                                                                  15
                                                                                 That would've been my instructions to them, to
     that you reviewed in preparation for your deposition.
                                                                       get more information. We weren't able to get her
16
                                                                  16
                                                                       medicines from the pharmacy because they were closed,
17
     I'm going to pull it up on the screen right now, and you
                                                                   17
     tell me if you've seen it before. So can you see a
18
                                                                  18
                                                                       and we didn't have any reliable medical history. So I
     document in front of you?
                                                                       had instructed them to get her medical records, so we
19
                                                                  19
               MR. KNOTT: I'm going to give her a paper
                                                                       could get that.

                                                                            Α
2
              I did. I did -- I did review it. Yes.
                                                                   2
                                                                       this in verbatim to me. No.
3
               Okay. I want to direct you to the first call
                                                                   3
                                                                                  Would -- when you say verbatim, what do you
                                                                            0
 4
     that you remember receiving about Ms. Boyer. And I
                                                                    4
                                                                       mean?
5
    believe you said it was before there were the calls
                                                                   5
                                                                                 They don't go through every one of these
                                                                            Α
     about high blood pressure. Okay?
                                                                       questions and tell me what she answered.
6
                                                                   6
7
          Α
               Yes.
                                                                   7
                                                                                 Okay. I want to take you to the first page of
                                                                            0
               You -- I believe you told me, that you
                                                                       Exhibit 3.
8
9
     received a call about someone with medical issues and --
                                                                   9
                                                                            Α
     sorry. I'm just looking back at my notes here. It said
                                                                                  It said -- you recall someone reporting that
10
                                                                  10
                                                                            Q
     she was -- the call was that she was unable to tell
                                                                       Ms. Boyer said she had a month to live, do you remember
11
                                                                   11
12
     Amber Fennigkoh what all the meds she was on, and it --
                                                                  12
                                                                       that?
13
     she was unable to provide a reliable medical history. Do
                                                                  13
                                                                            Α
                                                                                 Yes.
14
     you remember that from this morning?
                                                                   14
                                                                                 Do you see number two here -- item two, "Are
15
          Α
               Correct. Yes.
                                                                  15
                                                                       you sick or injured in any way?" And this document
               Okay. When -- would your practice have been
                                                                       says, "Some doctors say I have a year to live," do you
16
                                                                  16
     to gather all the information that you could at that
                                                                       see that?
17
                                                                  17
     point, about the person?
                                                                            Α
                                                                  18
                                                                                 Yes.
18
19
          Α
              Yes.
                                                                  19
                                                                            0
                                                                                 Is that what you might have been told is
20
               Okay. Do you remember asking -- or would you
                                                                  20
                                                                       report -- what might have been reported to you?
    have -- let me ask you this, that you also recall being
                                                                                 MR. MCCAULEY: Object to form. Calls for
21
                                                                   21
22
     called either during that call or possibly in a separate
                                                                   22
                                                                             speculation.
     call about medications that she might be on?
                                                                                 I --
23
                                                                   23
                                                                            Δ
```

25

I must have. Although, I don't remember that.

Okay. I'm looking down here at the bottom of

24

25

Α

MR. KNOTT: Object to form. Foundation.

Speculation. And the question's vague, as to time.

Page 125

Page 122

Q Sure. I'm talking about this first call that
you got, before the calls about high blood pressure.

3 $$\rm A$$ I seem to remember someone telling me that she 4 had said a month to live, but...

5 Q Okay. When you get a call like that, what is 6 your practice, in terms of trying to gather information 7 from the caller?

MR. MCCAULEY: Object to form.

9 Q Well, you get calls all the time from people 10 -- well, I think you said multiple times per week for 11 Monroe County, correct?

12 MR. MCCAULEY: Object to form.

13 A Sure.

8

14 Q And I believe it was -- I had one call per 15 day, roughly, from Monroe County Jail, right?

16 A At least one call per day.

17 Q And you're getting those calls -- typically 18 those calls would be coming from correctional officers. 19 Is that right?

20 A No. Most of the calls I got were from the 21 nurse.

22 0 Okav.

A And then occasionally, the nighttime calls would've been from correctional officers.

25 Q Okay. And the weekend calls as well?

1 A Yes.

2

3

4

5

7

8

9

16

25

Q Okay. And when you got calls from correctional officers, they may have had -- to your knowledge, they would've had some medical training, but maybe not as much as a nurse?

6 A Yes.

Q Okay. Did you have a technique to elicit relevant medical information from officers as they called?

10 A Yeah. I asked them questions about any 11 symptoms, or the patient that they were calling me 12 about.

13 Q Do you typically ask the person who's calling 14 you to read off any notes about the person's medical 15 history or medical conditions?

A I sometimes will ask that. But not always.

Q Okay. Would you want to know anything important that had been written down about a person?

19 A Yes. But I don't always know what they deem 20 important.

Q Yeah. That was a vague question. I'm sorry.
Anything important medically -- would you want to know
anything important medically, that's been written down
about a patient?

A I would. But I can't be sure that I always

1 get it.

Q Okay. And so what -- given that you can't be sure that you're always getting what's medically important. What's your technique in terms of asking guards to report medical information, that's been written down about a patient?

7 A Usually, I just ask them questions that I want 8 to know in making a judgment.

9 Q Would you start with a question, is there 10 anything written down about the patient?

A No

11

17

18

22

5

6

7

12 Q Okay. So you wouldn't -- would you ask them, 13 do you have a medical history for this patient?

14 A For this patient in particular, I wouldn't 15 have. Because I've been told previously that we didn't 16 have her medical history.

Q Do you have any idea why you were called about a patient who had no medical history?

19 A They called to let me know that she'd been 20 admitted. And that this call must have been asking me 21 about her medications that she had on person.

Q Okay.

A And then they told me that they did not have a medical history and they did not know her medications. And I that's when I told them to get that information.

Page 123

1 So we were in the process of trying to get that

2 information.

3 Q Okay. What you recall her -- them telling 4 you, is that she reported she had a month to live?

A Yes.

Q Would that prompt you to try to gather as much medical information you could about this person?

8 A It made me skeptical about the reality of that 9 statement. But I didn't have any information to base it 10 on.

11 Q When someone expresses that they're very ill 12 or sick, do you -- are you -- do you have a way of 13 ruling out that they're malingering or exaggerating 14 their symptoms?

15 A That's why I ask them certain things about, 16 you know, when the symptoms started, any other symptoms 17 that go along with it, to see if it makes sense 18 medically.

19 Q And when you are remote and it's a guard 20 calling, you're typically not able to ask the patient 21 themselves, right?

A No. I don't speak with the patient.

Q Okay. So do you try to gather as much information like that, about their symptoms and their history from the guard?

3

7

12

13

14

15

Page 126

Α I do.

1

2

3

4

7

8

9

10

11

14

15

16

2

3

11

18

25

Okay. And so when you're trying to gather that information, do you ask the quard if there's anything written down about the person or symptoms?

No. I'm just assuming they're telling me 5 everything there is to know. 6

Okay. So you don't say when some -- when a guard reports that someone says something like, I have a month live, you would ask -- do you know -- it'd be your practice to say, well, do you know anything else about this person, right?

I probably would've said, why -- why did she 12 Α 13 say that -- why? Did she give a reason?

Okay. And would you also want to say, just tell me what you know about this person's medical history -- or what she said about her medical history?

They've already told me that they didn't know 17 her medical history. She wasn't able to give a clear 18 medical history. 19

20 Would someone with this form who'd written 21 down exhibit -- you went over Exhibit 3 in preparation for this deposition, right? 22

I did. 23 Α

24 Okay. Would someone on this form -- look at, 25 if you would, at page 3, which I have up on the form

she had congestive heart failure. 1

Okay. Do you have any reason to think that a person calling you about Ms. Boyer's medical history would not have provided you with that information?

5 MR. KNOTT: She just answered that question. She told you her recollection. 6

I -- that wasn't what my question asked.

8 As I said, they don't read that verbatim to me. They tell me what they think is important, and what 9 10 the high points are, but they don't go through 11 everything verbatim.

Do you think any person reading this form would not think the congestive heart failure is important to let you know about?

MR. MCCAULEY: Object to form.

MR. KNOTT: Foundation and speculation --16 17 foundation and speculation.

I -- I don't recall them ever telling me she 18 had congestive heart failure. 19

BY MR. WEIL: 20

21 My question was different. Do you think any 22 person who read you this form, and was trying to provide you medical information about Ms. Boyer's medical 23 history, would not think the congestive heart failure 24 25 was something important to tell you?

Page 127

1 here, under the notes. It says, "She states she has multiple medical issues due to cancer," do you see that?

Α

4 So that's a medical condition, however vaguely described, that someone who had this form would know 5

6 Ms. Boyer expressed, right?

7 Α Yes. I do remember them saying that she said 8 she had cancer.

9 Okay. And right after, it says she's on chemo -- or it says, "Chemo/radiation," right? 10

Α Vec

12 So that would be another piece of medical 0 13 information that the person who had this form would 14

15 Α I'm assuming. Yes.

And the next line says, "Also states she has 16 congestive heart failure," do you see that? 17

> I do see it. Α

19 So that's another piece of information that 20 this person would have, right?

It's written. 21 Α

22 Okay. And I guess, again, do you have any 23 reason to think that when you got a call, the person who 24 called you didn't provide you this information?

I don't remember ever getting information that

Page 129 MR. KNOTT: Foundation. Speculation about the 1 2 frame of mind of specific correctional officers.

3 I don't -- I mean, I have no idea why they 4 wouldn't tell me, but I don't remember them telling me 5 that.

6 Q You don't remember one way or the other, 7 right?

I don't --8 Α

9

MR. KNOTT: She's answered the question.

I specifically don't remember them saying that 10 Α she had congest heart failure. 11

12 Q Do you remember, one way or the other, whether 13 they told you that?

14 I remember them telling me that she said she had a month to live, that she'd had cancer, but I don't 15 remember anything about congestive heart failure. 16

Okay. Ms. Pisney, I'm going to showing you 17 another document. I'm going to try to make it a bit 18 19 more manageable. This is Exhibit 18. Do you recognize 20 this document as something you reviewed in preparation

for this deposition? 21

Yes.

MR. KNOTT: Take a second to get her a paper

24 -- paper copy.

MR. WEIL: Sure. That'd be great, Doug. Thank

22

23

Page 130 1 you. 2 Α I have it.

BY MR. WEIL: 3

- Okay. Let me -- just real quickly, Ms. 4 5 Pisney, I want to close out Exhibit 3, just a couple more questions. We talked about congestive heart 6 failure. So we're looking at Exhibit 3 again. The --7 8 on page 2 of Exhibit 3, you see line 14. It also says -- it lists a bunch of conditions. One of them is high 9 10 blood pressure, and one of them is asthma?
- 11 Α Yes.
- You see that? 12 0
- 13 Α Yes.

3

4

5

6

7

8 9

10

11

12

13

15

20

21 22

23

- 14 Do you have any reason to think that a guard 15 calling you to report on Ms. Boyer's medical history, would not have reported that Ms. Boyer had been treated 16 17 for high pressure and asthma?
- 18 MR. KNOTT: Object to form.
- I don't remember them telling me those, 19 Α 20 either.
- 21 Okay. And again, I think you said when you 22 heard that Ms. Boyer reported that some people had said 23 she had a month to live, your practice would be to try to gather as much information as possible from the 24 25 person calling, right?

Page 132

Page 133

- 1 Again, do you have any reason to think that a 2 person calling you, if they were reading from this form, would not have informed you about these reports of high 3 blood pressure and asthma?
- 5 MR. MCCAULEY: Object to form.
- MR. KNOTT: Object to the form -- object to 6 7 the form of the question. She's told you her 8 recollection.
- I don't know if they were reading from this 9 Α 10 form or not.
- 11 BY MR. WEIL:

14

- Okay. But if they were, do you think they 12 Q 13 would've told you these things that were circled?
 - MR. KNOTT: Foundation. Speculation.
- MR. MCCAULEY: Join. 15
- All I can say is what I remember, and I don't 16 remember being told that. 17
- 18 Okay. Turning you back to Exhibit 18, I 19 believe you have in front of you. I'm looking at the 20 top line, which is for, Oxycodone. Do you see that?
- 21 Α
- 22 And the medication instructions are in the second column of the sheet, correct? 23
- 24 Α
- 25 Okay. And it says, "One tab, four times daily 0

Page 131

- That's why I asked them to get her medical 1 2 records and her prescriptions.
 - Would you ask -- and I think you also said that one of the things you would do, is ask the person to provide any medical information that they were aware of at the time that was written down; is that right?
 - No. I never specifically asked that. I assumed that when they're calling me, that they're going to give me the information that they have.
 - So if someone -- if a guard calls and reports that this patient who's come and says, I have a month to live. Would you the guard, did the patient say why? Would that be a question you'd ask?
- 14 MR. MCCAULEY: Object to form.
 - That's possible. I likely did that. Yes.
- Okay. And is it also likely that you would've 16 said, well, did the patient identify any medical 17 problems they have? Is that something you would've 18 19 asked or, you know, something along those lines?
 - They're calling me with their medical problems and they're telling me that they did not get a clear medical history from her. She did not know her medications. She said she had a month to live and that
- 24 she'd had cancer. And that's really all I remember from that conversation. 25

2

- for pain," do you see that? 1
 - I do.
- 3 Does that indicate to you that -- I understand 4 that there's a, "Not approved," sign here, do you see 5 that?
- 6 Α Yes.
- 7 For the oxycodone. Does this indicate to you, however, that there was at least a written prescription 9 for the oxycodone that was found with her?
- 10 There -- yes. I believe so, because otherwise they wouldn't have known how she was prescribed it. 11
- 12 Okay. The second line is a drug -- I'm going 13 to call it Zofran. I tried several times to pronounce 14 it yesterday. But what's this drug here, Ms. Pisney? It's on line two. 15
 - Α Ondansetron.
- 17 Ondansetron? And that's commonly referred as 0 Zofran; is that right? 18
- 19 Α Yes.
- 20 0 Okay. And here in this column, it says, "As
- 21 needed for nausea from chemo/radiation," do you see
- 22 that?

- 23 Α Yes.
- 24 Again, I'm assuming just as these things are read, that would indicate to you that was a written 25

Page 134

1 prescription for this Zofran drug; is that right?

2 A I would assume so, since there's an indication

- 2 A I would assume so, since there's an indication 3 or an instruction for their taking of it.
- When -- you said that you recall earlier being called about the medications that had been found with Ms. Boyer; is that right?
- 7 A I -- I don't remember being called about the 8 medications, but I must have been.
- 9 Q Okay. And is that -- are you saying you must 10 have been, because part of your role at the jail was to 11 -- as the provider, would be to approve medications like 12 this?
- 13 A Yes.

17

2

- Q Okay. And so -- and this would be -- this medication list would be medications that you were called about, that Ms. Boyer had on her person, right?
 - A Yes.
- 18 Q Okay. And so among other things, in approving 19 this list, you would've learned that she'd been
- 20 prescribed Zofran for nausea from chemo; is that right?
- 21 A Yes
- 22 Q Or radiation, correct?
- 23 A Yes.
- 24 Q Chemo and radiation are treatments that are
- 25 typical provided for a person suffering from cancer; is

1 line two?

25

- A Yeah. Yes.
- ${\tt Q} \qquad {\tt Can \ you \ tell \ me \ what \ that \ means, \ that \ that}$
- 4 65862391 --
 - A I do not.
- Q -- and a 10. You don't know?
- 7 A No.
- 8 Q Would this indicate to you it was possible
- 9 that Ms. -- this line from the Zofran, would that
- 10 indicate that it was possible that Ms. Boyer was
- 11 suffering from cancer, at the time she was booked into
- 12 the jail?
- 13 A It's possible.
 - Q Okay.
- 15 A She did -- I mean, that's one of the things 16 that she said, that I was understanding, that she said 17 she had cancer.
 - Q So this prescription would corroborate her statement that she had cancer; is that right?
- 20 A If that was a current prescription. I don't 21 -- in looking at her medical records from the hospital,
- 22 I don't see any indication that she was being treated
- 23 currently for cancer, but an old history of cancer. But
- 24 that's -- I found that out afterwards.
- 25 Q Okay. At the time that you would've been

Page 135

- 1 that correct?
 - A Yes.
- 3 Q Okay. So, would that indicate to you that
- 4 Ms. Boyer had this prescription because she was 5 suffering from cancer?
- 6 A It's possible. I don't know how old that 7 prescription was.
- 8 Q You approved this medication; is that right?
- 9 A I did
- 10 Q Would that indicate to you that when this 11 prescription was communicated to you, that it was
- 12 current?

- 13 MR. KNOTT: Foundation. Speculation.
- 14 A No. Not necessarily. These were the 15 medications found on her person.
- 16 Q Would you have approved an out of date 17 medication, like Zofran?
- 18 A Zofran is as needed for nausea. So if she had 19 nausea, then we could use it.
 - Q Okay.
- 21 A So I don't -- I have no way of knowing what
- 22 date it was. They usually tell me if they have a
- 23 prescription bottle, what date it was filled, though.
- Q Would that be over here, in this little line right here (indicating), on to the left of exhibit -- or

- Page 137

 1 called about this prescription here, the prescription
 - 2 for nausea, for chemo and radiation, would've
 - 3 corroborated Ms. Boyer's statement that she was
 - 4 suffering from cancer in your mind; is that right?
 - A Yes. If it was a current prescription.
 - 6 Q Okay. And are you saying that you couldn't -- 7 you can't tell from this line, whether or not it was a
 - 8 current prescription?
 9 A I cannot.
 - 10 Q So it was possible that it was a current 11 prescription?
 - MR. KNOTT: Foundation. Speculation.
 - A Possible it was, possible it wasn't.
 - 14 Q Okay. The next exhibit I'm showing you is 15 Exhibit 20.
 - MR. WEIL: Doug, I don't know if you want to get this document for Ms. Pisney or not.
 - MR. KNOTT: Actually, I think that was marked first, yesterday. And I'm on the road, so I don't have paper copies of that.
 - MR. WEIL: Okay. Doug, are you referring to -- there's two versions of this, right? There's one that, like, was entered at an earlier time. I can use that one if you have that document

Page 140

Page 141

Page 138
 1
               MR. KNOTT: Right. Exhibit 7 is the one that
                                                                        understanding. And again -- I'm sorry, I'm going to
                                                                    1
2
         has the Eastern Time Zone.
                                                                    2
                                                                        violate Doug's rule and repeat the question. You do
               MR. WEIL: Okay. Well, I'll just -- I'll pull
                                                                        recall reviewing this document before your deposition
 3
                                                                    3
          up Exhibit 7.
                                                                        today, correct?
 4
     BY MR. WEIL:
 5
                                                                    5
                                                                             Α
                                                                                  Yes. I did see this before.
              Okay. Ms. Pisney, do you have in front of you
                                                                    6
                                                                                  Okay. So it begins, "Hello. Christine Boyer,
 6
          0
     a document -- the same document that's up on the screen
7
                                                                    7
                                                                        as you know, has a number of medical issues," do you see
8
     now, Exhibit 7?
                                                                    8
                                                                        that?
                                                                    9
9
         Α
                                                                             Α
10
               Okay. Is this a document that you reviewed in
                                                                   10
                                                                                  Okay. And it says, "This afternoon, she
11
     preparation for your deposition today?
                                                                   11
                                                                        started complaining of feeling hot and sweaty and not
              I did see this. Yes.
                                                                        being able to breathe, " do you see that?
12
                                                                   12
13
               Okay. This is an e-mail from Shasta Parker.
                                                                   13
                                                                             Α
                                                                                  Yes.
     Do you know who that is?
                                                                   14
                                                                             0
                                                                                  Okay. "She asked to take -- to have her blood
14
                                                                        pressure taken and it was 177 over," and it says, "I
15
          Α
               Yes.
                                                                   15
               Who is that?
                                                                        can't remember this bottom one at the moment, but it is
16
                                                                   16
                                                                        on the MAR. It was really high. And we called Lisa,"
17

9
     up here that says, "December 22nd, 7:26 p.m."?
                                                                    9
                                                                        blood pressure. I don't remember them telling me that
          Α
              Yes.
                                                                        she had complained of being hot, and sweaty, and not
10
                                                                   10
                                                                        being able to breathe.
11
              Okay. And then it says, "EST," afterwards?
                                                                   11
12
          Α
                                                                   12
                                                                             Q
                                                                                  Okay. You don't remember one way or the
13
               We are figuring it out. But what we believe
                                                                   13
                                                                        other?
14
     is that refers to Eastern Standard Time. And
                                                                   14
                                                                                  I don't remember them telling me that. I just
15
     Wisconsin's Central Time, right?
                                                                        remember about the blood pressure.
                                                                   15
         Α
              Correct.
                                                                                  Okay. Any reason to think they wouldn't have
16
                                                                   16
              And so there's another document that is
                                                                        told you that?
17
                                                                   17
     identical in terms of its text, but it refers to
                                                                             Α
                                                                                  No. I just don't remember them saying it.
18
                                                                   18
19
     6:27 p.m. So an hour before. So I think we believe
                                                                   19
                                                                                  Okay. The next line after, "We called Lisa,"
20
     that this was written at 6:27 p.m.
                                                                   20
                                                                        says, "She said, give one dose of 0.2 milligrams of
                                                                        clonidine, and then do a blood pressure check at 3:45
21
          Α
              Okay.
                                                                   21
22
          0
               Okay.
                                                                   22
                                                                        p.m.," do you see that?
23
               MR. KNOTT: Thank you.
                                                                   23
                                                                             Α
                                                                                  Yes.
24
               Okay. So, I'll refer to Exhibit 7, just so
                                                                   24
                                                                                  Is that consistent with your recollection of
    we're all looking at the same document, with that
                                                                        this first call about high blood pressure?
25
                                                                   25

24

25

8 Okay. And so I'm assuming this means that 9 there was a second call that was made to you, to recheck 10 it again. Is that how you read that?

Yeah. So they called me at 3:45 to tell me the recheck, and it was coming down, so I wanted them to check it again in an hour before we did anything else, so we didn't drop it too much. And then if it was above the 160 over 100, to give her another dose of clonidine.

Let me slow you down and take that in some pieces. So -- is what you just testified, is that your independent recollection or is that what you're inferring from this document?

No. That's my recollection. I do -- I do Α remember them calling me about her blood pressure. I always thought it was one call, but obviously, from the paperwork and this e-mail, it was two calls, actually.

Okay. And so your practice here was when you reported high blood pressure, give some medication, call

Page 144 0.1 was likely to work. I didn't instruct them to recheck our blood pressure. No.

Is there any reason you would not want them to 3 4 check and confirm, that last 0.1 milligrams of clonidine was successful in actually reducing her blood pressure? 5

I didn't -- I didn't instruct them. It's 6 7 typical that it looked like it was working. So another 8 0.1 would make it drop even further. And I think that 9 would've been in the normal zone. So I didn't instruct 10 them to check, but if she'd had symptoms, they would've 11 rechecked her.

Q What are the symptoms of high blood pressure, besides high blood pressure?

Well, she was complaining and feeling hot, and sweaty, and not feeling right, or being able to breathe when she asked it for it to be checked, originally. So she had a symptom, and she asked that her blood pressure be checked.

0 Was there any protocol for someone complaining of high blood pressure and having -- being hot, and sweaty, or not being able to breathe at the jail?

Α

23 Okay. So were you -- why -- it sounds like 24 you assumed that the guards would know when to identify 25 concerning symptoms, after this 0.1 milligram of

Page 143

back in a half hour, if it's still high, right? 1

3 Okay. And So there's a call at 3:45 p.m. And 4 it's 169 over 106, right?

5 Α Yes.

6 Okay. And then the next line is, "Lisa said, 7 recheck it in an hour. And if the bottom number is still over 100, or a blood pressure reading such as 8 9 169/100, then go ahead and give her another 0.1 milligram of clonidine," do you see that? 10 11 Α Yes.

Okay. Okay. Did you provide any further instructions after that, about what to do after an hour?

14 Well, I told them if it was over that -- that amount, then give her another 0.1 Of clonidine. 15

> Right. Q

her blood pressure?

But no. Other than that, no. 17 Α

Is there a reason that you didn't instruct them to see if that last 0.1 milligram of clonidine -so just to back up. After instructing them to say, give them that one last 0.1 milligram of clonidine, you didn't instruct them to check her blood pressure again, to see if that quantity had been successful in reducing

No. The 0.2 clonidine was working, so another

1 clonidine?

8

15

16

17

20

21

25

2 Α I mean, typically, we're not doing vital signs 3 on every inmate at any certain time.

4 Is -- was there any reason not to just ask the 5 guards to check again, and see if that last 0.1 milligrams of clonidine and had been successful in 6 7 actually lowering her blood pressure?

MR. KNOTT: That's been answered.

9 I -- doesn't -- it doesn't appear that I asked them to recheck. I don't -- it was working, and I 10 assumed that the next dose would drop it even further, 11 12 and get it her into the normal zone.

13 0 And you weren't asking the guards to confirm 14 your assumption?

> I was not. Α

Why not?

MR. KNOTT: Asked and answered.

I didn't judge it to be necessary. 18 Α

19 0 Why not?

> It was my judgment. Α

Well, how did you reach that judgment?

22 MR. KNOTT: It's been asked and answered.

As I said, the -- the first dose helped and 23 24 the second dose, I assumed, would help as well.

Were you positive?

Page 148 Page 146 1 MR. MCCAULEY: Form. 1 0 Is there a way we could -- were you taking off 2 No one's ever positive. 2 work that week? Α 3 Okay. Do you remember what you were doing on 3 Α I can't remember. Sunday, the 22nd of December? Okay. Your day job, at that point, would've -- your full-time job would've been at Gundersen Health; 5 Α I was home. 5 You were home all day? 6 is that right? 6 0 7 Δ Yes Α Yes. 8 0 Were you getting ready for Christmas? 8 0 Is there a way you could go back and identify I could have been. I don't remember exactly 9 Α 9 whether you were taking that week off? 10 what I was doing, but I know I was home all day. 10 No. I no longer work at Gundersen so -- I 11 Okay. Do you attend church services in the 11 mean, Sunday I wasn't at work. Monday was the 20 -- no. It would've been the 23rd. I don't know if I worked morning -- is it your habit to attend church services in 12 12 that day beforehand. I probably did, before I went into 13 the morning? 13 Α the jail that night -- that evening. I usually work 14 14 that day and then that evening, went into the jail. 15 Okay. Do you recall having any plans around 15 the Christmas season, that you might have been doing on MR. KNOTT: Referring to the 23rd? 16 16 the 22nd of December? THE WITNESS: Yes. 17 17 18 Α No. 18 Okay. Again, I may have asked this and I apologize if I have. Where -- do your adult children 0 Were you having any family over, on the 19 19 20 evening of the 22nd of December? 20 live close by, where they might be coming over for 21 Α I don't remember. 21 dinner on the weekend during Christmas time? Could we look at -- if you did, who would that No. My daughter lives in Iowa and my son 22 22 23 be? 23 lives in Virginia. 24 I -- it could have been my family, my 24 Okay. Do you recall anybody coming in to husband's family. I don't know. 25 visit you that weekend -- or you and your husband that 25 Page 147 Page 149 weekend for Christmas? Was it your habit to celebrate around the 1 1 2 Christmas season with family? 2 I don't remember. I don't know if we had 3 Α 3 family over or not. 4 0 Your habit to have them over to your house, 4 Is there a way we could tell? Do you maybe for dinner? typically e-mail with family, we might be able to tell 5 5 Sometimes. But -who was coming over, if anybody? 6 Α 6 7 0 Is there a -- go ahead, I'm sorry. 7 Α No. We don't e-mail. We sometimes go to other family members' If someone was --8 Α 8 9 9 Not that anybody remembers two years ago. If someone was coming in from out of town --10 Q Is it possible that on the 22nd of December, 10 you were over at someone else's house? would you have possibly exchanged e-mails to set that up 11 11 12 No. I was home. 12 or just arrange things? Α 13 0 Okay. Do you remember anybody who was home 13 Α No. 14 with you that day? 14 Q Do you keep a personal calendar at all, 15 I'm sure my husband was. 15 Ms. Pisney? Α You mentioned you have a daughter as well? No. Not really. I have a calendar on my 16 Q 16 phone, but I don't put personal things in it, other 17 Α 17 Q than, like, hair appointments and things like that. Does she live at home with you? 18 18 19 Α No. 19 0 Is that -- how long have you had your phone? 20 0 Okay. Any other children? 20 Α Several years. No. My children are grown. Okay. Would you -- do you have the same phone 21 Α 21 22 Okay. Would anybody have been -- any of your 22 you had in December 2019? 23 children have been visiting you on that weekend before 23 Α I think so. 24 Christmas? 24 Okay. Do you have it with you? I don't believe so. MR. KNOTT: No. We're not going there. 25 Α 25

 1
               MR. WEIL: Okay.
                                                                             the deposition of Lisa Pisney being conducted by
                                                                    1
 2
               MR. KNOTT: We're not going there. That's not
                                                                    2
                                                                             video conference. My name is Sydney Little. Today
          a requirement for a deposition. A deposition is
                                                                             is March 3, 2022. And the time is 2:41 p.m.
 3
                                                                    3
          question and answer. If you want to do discovery,
                                                                    4
                                                                       BY MR. WEIL:
          we can talk about it, but we're not going down that
 5
                                                                    5
                                                                                 Ms. Pisney, did you have a chance to look at
          road.
                                                                        your phone?
 6
                                                                    6
 7
     BY MR. WEIL:
                                                                    7
                                                                             Α
                                                                                  I did. There's nothing on my calendar that
                                                                       day.
 8
               Okay. Is there anything -- beyond your
                                                                    8
     lawyer's instructions, is there anything to stop you
                                                                    9
                                                                                  Okay. That day you're referring to is 22nd of
 9
                                                                             Q
10
     from just picking up your phone, and looking if you had
                                                                   10
                                                                        December 2019, right?
11
     anything scheduled on December 22, 2019?
                                                                   11
                                                                             Α
                                                                                  Yes.
          Α
                                                                             Q
                                                                                  Okay. Did you happen to see any indication of
12
               No.
                                                                   12
               MR. WEIL: Okay. Doug, are you instructing
13
                                                                   13
                                                                        whether you were otherwise on vacation that week,
          the witness not to -- we can just take a break --
                                                                  14
                                                                        understanding that you went into the Monroe County jail?
14
               MR. KNOTT: No. I'm instructing her --
15
                                                                   15
                                                                             Α
                                                                                  No. No indication.
               MR. WEIL: -- for 20 minutes and just have
                                                                                 No indication one way or the other?
16
                                                                   16
17
          her --
                                                                   17
                                                                             Α
                                                                                 Correct.
18
               MR. KNOTT: I'm instructing you to -- well,
                                                                   18
                                                                             Q
                                                                                 Okay.
                                                                                 MR. KNOTT: And for the record, her calendar
          I'll talk to her at the next break. But I'm
19
                                                                   19
          instructing you, that we're going to follow the
                                                                   20
                                                                             -- her visual calendar showed to 2019. Her

21
          rules of civil procedure and you can ask questions.
                                                                   21
                                                                             appointments don't go back to 2019.
          But we don't perform tracks, and we don't do
                                                                                 The -- there was no dot on that day, but it
22
                                                                   22
                                                                             Α
          research during a deposition for you.
                                                                        wouldn't show me anything for on 2019. It only went to
23
                                                                   23
               MR. WEIL: Okay. How about we just take a
24
                                                                   24
                                                                        2020.
25
          quick break and you can talk to your client about
                                                                       BY MR. WEIL:
                                                                   25
                                                                                                                        Page 153
                                                     Page 151
 1
     it. And we can come back and at 2:40?
                                                                    1
                                                                                  Okay. So a dot would indicate some sort of an
 2
          MR. KNOTT: What is your question?
                                                                    2
                                                                        appointment, even if you couldn't tell what it was?
                                                                    3
 3
          MR. WEIL: I want to -- I'm trying to figure
                                                                             Α
                                                                                  Correct.
     out what she had scheduled on December 22, 2019.
 4
                                                                    4
                                                                             0
                                                                                  Okay. There were dots in December 2019 or
     The reason being, that -- well, that's -- I'm
                                                                    5
                                                                        thereabouts, but just none on the 22nd?
 5
     trying to figure out what she had scheduled, if
                                                                    6
                                                                             Α
                                                                                  Yes.
 6
 7
     anything.
                                                                    7
                                                                                  Okay. I won't belabor this much longer. Does
                                                                             0
          MR. KNOT: Bearing in mind -- bearing in mind,
                                                                        your family typically -- do you celebrate Christmas? Is
 8
                                                                        that a festive time for your family? I know all
 9
     that she testified that she was home all day.
                                                                    9
                                                                        families are different.
          MR. WEIL: I believe she doesn't exactly --
10
                                                                   10
          MR. KNOTT: (inaudible)
                                                                             Α
                                                                   11
11
12
          MR. WEIL: Sure. She doesn't exactly recall
                                                                   12
                                                                                  Okay. And do you typically celebrate it with
     if -- her phone may be a blank and there be may be
13
                                                                   13
                                                                        -- I believe it was your -- you have adult children? Do
14
     no answer one way or another. I'm just asking for
                                                                   14
                                                                        you celebrate it with them, typically?
     her to just take a minute, and look at her
                                                                   15
                                                                                  Sometimes. My daughter's a nurse, so she has
15
     calendar, and just tell me. If there's anything on
                                                                        to work holidays occasionally. And my son is in
16
                                                                  16
     there, there's something on there. If there's not,
                                                                        Virginia, so we don't get together with him very often.
17
                                                                  17
     there's not. That's all I'm asking.
                                                                                 Okay. I believe you said that you and your
                                                                  18
18
19
          MR. KNOTT: We'll take a break.
                                                                   19
                                                                        husband had family around where you live?

18

Page 157

Page 154

Onalaska. That's in Wisconsin?

2 A Yes.

- Q Okay. I am going to show you now, what's been marked as Exhibit 19 in this case, Ms. Pisney. I think I remarked as I report, I believe. This is the -- it's called a illness report, I believe. Do you have a copy of that handy?
- 8 A Yes.

9 MR. KNOTT: I'll get it.

Q Now, before we start talking about this
particular document, Exhibit 19. You -- often, when you
were called -- wait, let me back up a second. ACH
produces a number of -- they're referred to as protocols
or illness reports, it's a standardized form with

15 various prompts for a guard to fill in information; is

16 that right?

17

25

3

5

12

17

Α

Yes.

Q Are -- a lot of the calls that you get after hours. I understand nurses call you, but when a guard is calling you after hours or on the weekend, is it often in conjunction with them having filled out a form for a particular patient at the jail?

23 A Sometimes they do. I don't know if they do 24 all of the time.

Q Okay. Referring you to Exhibit 19, which you

Page 156
you about the symptoms and the history of the patient

who's experiencing chest pain?

A As best I can.

MR. KNOTT: (coughs) Excuse me.

5 Q Do you find the form -- the various prompts on 6 Exhibit 19 to be helpful, in gathering relevant 7 information for your assess of a patient with chest

8 pain?

9 A I don't have this form with me usually, when I 10 talk -- talk to the jail.

11 Q Sure. I understand. Maybe I can clear this
12 up. In terms of the subject matters that this form
13 prompts the guard to fill out, is that -- are these
14 subject matters and the information that's gathered
15 through this form, is this helpful for you to -- is this
16 helpful information for you to assess a patient's
17 complaint of chest pain?

A It would be if -- if it was all relayed to me.

19 Q Okay. When a guard calls you and says, I have 20 a patient here who's complaining of chest pain, is it 21 your practice to ask the guard whether they filled out 22 this chest pain form?

23 A No.

Q Okay. You don't ask the guard, one way or the other, whether they filled out the chest pain form?

Page 155

have in front of you, is this a document that you saw
before preparing for your deposition in this case?

A I did.

4 Q When did you see it?

A Just when it was given to me by the lawyers.

Q Okay. But contemporaneously with all this occurring, this is not something that you received, say, on the evening of December 22, 2019?

9 A No

Q Okay. Was there -- when you were on call, was there a way to e-mail you or fax you medical documents?

A No.

13 0 Was that ever done?

14 A No.

15 Q Is it done now at the other ACH jails that you 16 service and having -- having left Monroe County Jail?

A No.

Q Okay. When -- you testified this morning, that you recall receiving another call in the evening of the 22nd about Ms. Boyer experiencing chest pain; is that right?

22 A Yes.

Q Is it your practice to gather -- when you receive information like that, is it your practice to gather as much information from the guard who's calling 1 A No. I do not.

Q Okay. Do you ask the guard to describe the information that they have available to them on the describe them on the

5 A No. I typically would ask them some 6 questions.

Q Is there any reason that you would not be given -- I believe, you said -- let's go through this. The first question asks the detainee history of -- then it goes into this -- I'll back up, I'm sorry. The first section is S, right?

A Yes.

12

15

19

23

Q Do you have an understanding of what S means in the context of this form?

A Subjective.

Q Subjective is what the patient is telling a care provider about the symptoms they're experiencing; is that right?

A Yes

Q Is that important information for you to gather, in the event of someone who says they're experiencing chest pain?

A Yes.

Q Okay. Are the topics listed on S, on Exhibit 19, important pieces of information for you to

Page 160

Page 161

Page 158

1 understand for someone who's experiencing chest pain?

2 A Yes. They're -- they're typically things we'd 3 like to know.

- Q Okay. It's important for you to understand the history of the disease, whether you have elevated blood pressure, and whether you're on any medications; is that right?
- 8 A Yes.

4

5

6

7

4

5

6

7

8

15

16

17

18

- 9 Q It's important for you to know -- this 10 information is important for you to be able to perform 11 the differential diagnosis that we were discussing 12 earlier; is that right?
- 13 A Yes.
- MR. MCCAULEY: Form. Vague. Overly broad.
- 15 Q So it's important for the differential 16 diagnosis to understand the history -- the detainee's 17 medical history, to the extent they can give it, right?
- 18 A It is.
- 19 Q Okay. It's important -- so if a detainee gave 20 a history of having a history of heart disease, that'd 21 be very important for you to know, correct?
- 22 MR. KNOTT: Form.
- 23 A It would be.
- 24 Q Okay. Do you remember whether the -- do you
- 25 remember -- do you have an independent recollection of

1 would've. No. Because I --

- Q You would not have -- okay. I'm sorry. Go ahead.
- A I -- I understood that we did not know her medical history, that we did not have the specifics of her medical history, nor any of her medication that she
- 7 normally took.
- 8 Q Okay. So you didn't say, has the -- you did 9 not attempt or ask, whether this person had provided any 10 additional medical history in the 24 hours since they'd 11 arrived at the jail?
- MR. KNOTT: Misstates her testimony.
- 13 A I -- I did not ask if there was new 14 information about her medical history. No.
- Q Okay. One of the first step in performing a differential day is to gather as much information as you can; is that right?
 - A That is correct.
- 19 Q So would you have attempted to gather any 20 information that you could?
- 21 MR. KNOTT: Object. It's vague. Are we 22 talking about this call? Are we talking about a 23 generality? Vague -- vague time --
- 24 BY MR. WEIL:

18

25

2

16

20

23

Q When presented with a call from someone

Page 159

- what you were told by the guard, when you were called about this chest bank complaint, on the evening of Sunday the 22nd?
 - A The things I remember are that she was complaining of chest pain, that she was at rest, that there was no diaphoresis or sweating, and that she had some shortness of breath. I don't recall all of this information being relayed to me.
- 9 Q Do you have any reason to doubt -- do you have 10 any recollection one way or another?
- 11 MR. KNOTT: She just answered that.
- 12 MR. WEIL: No.
- 13 A I said I don't recall them telling me this --14 all this information.
 - Q Okay. Do you mean -- okay. Do you recall whether or not the guard who called you, related that Christine had told the guard that she had a history of congestive heart failure?
- 19 A I don't remember them telling me that. No.
- 20 Q Would you have asked the guard, did this 21 patient who claims to be suffering from chest pain, did 22 they tell you anything about their medical history? Is
- 23 that question you would have asked?
 24 A Since we had discussed the same patient
- 25 multiple times during the day, I don't believe I

1 telling you that they had chest pain?

A As I said, that this person we had talked

3 about multiple times during the day, and they had been

4 -- they had told me that we did not know her full

5 medical history. She was unable to give it, and we did

6 not know her medication. So I did not ask again, have

7 we found out anything new? Because it was Sunday, and

8 we weren't able to get any new information.

- 9 Q That was a person who told you, that the night 10 before Christine Boyer had come in, she was not able to 11 give a complete medical; is that right?
- 12 A I don't know if it was the same person talking 13 to me. No.
- Q Well, was it Amber Fennigkoh who was talking to you this evening?
 - A No.
- Q Okay. Evidently, Ms. Boyer was able to report that she was suffering from chest pain; is that right?
- 19 A That's why they called me. Yes.
 - Q Right. That's just -- that's something that
- 21 somebody has to say, right? It's a symptom that they
- 22 have to report?
 - A Correct.
- 24 Q Okay. Did you understand that Ms. Boyer had
- 25 come in intoxicated the night before?

```
Page 162
                                                                                                                         Page 164
                                                                        reason she was being given ondansetron, right?
1
          Α
              I don't remember them telling me that, either.
                                                                    1
2
               Okay. Did you see no reason to check and try
                                                                    2
                                                                                  MR. KNOTT: Foundation. Speculation.
     to determine whether Ms. Boyer might know something else
3
                                                                    3
                                                                                  Yeah. I would assume that was written on
     or have remembered something else about her medical
                                                                    4
                                                                        there because that was written on the MAR, but I don't
     history, given that she was experiencing chest pain?
                                                                        know that for sure.
5
                                                                    5
              I had talked to them twice before with her
                                                                    6
                                                                                  So all that would indicate to you, sitting
6
 7
     high blood pressure, and they didn't relay any
                                                                        here at 8:09 p.m., that Ms. Boyer did have some
                                                                    7
8
     additional information at that time.
                                                                    8
                                                                        knowledge about her medical conditions, right?
               You didn't -- you told me, that you didn't ask
                                                                    9
9
                                                                             Α
10
     for any additional information; is that right?
                                                                   10
                                                                             0
                                                                                  Okay.
11
               I -- I rely on the officers to tell me the
                                                                   11
                                                                             Α
                                                                                  I mean, other than -- no.
     pertinent information.
                                                                                  You recall that the prescription list that
                                                                   12
12
13
               Okay. You don't -- a guard -- the guards
                                                                   13
                                                                        Ms. Boyer had, that we went over earlier, also had
     typically don't have medical degrees, right?
                                                                   14
                                                                        aspirin on it; is that right?
14
15
          Α
                                                                   15
                                                                             Α
                                                                                  Yes.
               In gathering information, since you're not
                                                                                  Is aspirin something that people with heart
16
                                                                   16
17
     there, you have to rely on the guards to gather
                                                                   17
                                                                        disease or high blood pressure take as a form of
18
     information for you, right?
                                                                   18
                                                                        treatment?
              That is correct.
         Α
                                                                                  MR. KNOTT: Asked and answered.
19
                                                                   19
20
               And often you have to direct the guard in
                                                                   20
                                                                             Α
                                                                                  It can be. But it can be taken for other
21
     gathering information because you do have medical
                                                                   21
                                                                        things as well.
22
     training, whereas they do not; is that correct?
                                                                   22
                                                                             0
                                                                                  Okav.
                                                                                  I don't -- that one I think was not a
23
               ask them specific questions. Yes.
                                                                   23
                                                                             Α
               Okay. In performing a differential diagnosis
24
                                                                   24
                                                                        prescription.
25
     -- the first step in performing a differential
                                                                   25
                                                                                  Right. Aspirin is not prescribed, right --
                                                      Page 163
                                                                                                                         Page 165
    diagnosis, when someone presents with a symptom like
1
                                                                    1
                                                                        typically?
2
     chest pain, is to attempt to gather any information you
                                                                    2
                                                                             Α
                                                                                  Well, it can be.
3
     can about their medical history; is that right?
                                                                    3
                                                                                  Sure. But if someone's told to take aspirin
```

MR. KNOTT: It's been asked and answered, at 4 5 least five times. I did ask them questions --Α 6 7 Okay. Did you ask --0 -- in relation to her chest. 8 9 Okay. Would you have -- Ms. Boyer was able to relay the day before that she had cancer, right? 10 That is one of the things she said. Yes. 11 12 And that was corroborated by the prescriptions 13 that she had in her bag; is that right? 14 MR. KNOTT: Asked and answered. Argumentative. 15 Misstates her testimony. The only thing that corroborated that was an 16 order ondansetron from -- I don't know when, so... 17 Right. Ondansetron for someone who's 18 19 experiencing chemotherapy, right? 20 MR. KNOTT: Asked and answered. That's what it said, but I don't know that --21 22 that's a fact. I mean, people are given ondansetron for 23 other reasons.

by their doctor for high blood pressure or for a heart 5 problem, they can just go and get aspirin and take it, 6 right? 7 Α They can. And people can take it just because they think it's good for them, too. 9 Right. One of the reasons that people might 10 be taking aspirin, is because they've been told that it's important for high blood pressure or for a heart 11 12 condition; is that right? 13 MR. KNOTT: Foundation. Speculation. Overly 14 15 That could be one of the reasons they're told to take it. They could also take it for headaches, body 16 aches, all kinds of things. 17 So a possible indication of taking aspirin is 18 19 that someone as a heart problem; is that right? 20 MR. KNOTT: Asked and answered. Along with all the other indications. 21 Α

22

23

24

25

But what we talked about was that a

prescription and bottle would have said, that was the

24

25

Okay. In performing the differential

points of medical history that you would want to put as

a possible indication that a person had a heart problem,

diagnosis that we talked earlier, that's one of the

Page 166

right?

1

5

12

16

- 2 Just because they were taking aspirin wouldn't Α necessarily tell me that they had a heart problem. 3
 - Right. It's a possibility, right?
 - Along with a multitude of possibilities. Yes. Α
- 6 So when you were called by this person saying
- that Ms. Boyer is complaining of chest pain, your 7
- 8 testimony is that you did not ask any questions about
- Ms. Boyer's any -- whether Ms. Boyer told the guard 9
- 10 anything about her medical history; is that right?
- 11 MR. KNOTT: Misstates the testimony.
- 13 didn't, because I had talked to them multiple times
- about that same patient, that same day. 14
- 15 Okay. When Ms. Boyer reported the symptom of

Yeah. I -- I've said many times that I

- chest pain, did you ask the guard whether she had reported how long the chest pain was there? I'm looking 17
- at the first line here, the first star, under S. Did 18
- you ask the guard that? 19
- 20 No. Usually, they call me when she complains
- 21 of chest pain. So if she complained of chest pain, then
- they call me. 22
- 23 You have -- this is just not a question you
- 24 ask, you don't ask the guard to report to you how long
- 25 the person has said they had chest pain?
- Page 167
- Usually, if someone has chest pain, they will 1 2 report it. I -- and the -- and the jailer would call me
- 3 with the complaint of chest pain.
 - Okay. So if I understand you correctly, you
- 5 don't attempt to figure out how long they have chest
- pain because you assume that they would've reported it 6
- 7 immediately?

4

11

12

14

21

22

25

- If they were having a heart attack and were 8
- 9 having chest pain, then, yes. I would assume they'd
- report that immediately. 10
 - If they were having a heart attack and having chest pain, you assume that they would report it
- 13 immediately?
 - You said that chest pain is the only reason
- people -- only reason people have chest pain is because
- of a heart attack, and that that's their symptom, and 16
- that you should rule it out right away. So -- yes. I 17
- would assume that if someone had chest pain, they would 18
- 19 report that right away. 20
 - Okay. When someone -- when a guard calls in with chest pain, you don't attempt to determine how long the person has had chest pain?
- 23 No. I'm assuming that they call me when the 24 person complains of the chest pain.
 - Right. And that person may have complained --

- Page 168 it's possible that the person had the chest pain a
- while, then decided there must be a problem, and told
- the guard after they'd been experiencing it for a while; 3
- is that right?
- I would -- I would assume that that wouldn't 5
- be hours at a time, only minutes. 6
- 7 Is it a possibility you want to exclude that
- 8 the person had been experiencing chest pain for some
 - time, and had decided to report it?
- 10 I think I've answered that multiple times,
- 11 too.

9

12

- Q I don't -- can you just answer the question,
- please? 13
- When they call me with the complaint of chest 14 Α
- pain, I assume that they've just complained to the 15
- officer of the chest pain, and that's why I'm being 16
- called. So I don't assume they've been having chest 17
- 18 pain all day, and then just suddenly decided, you know
- what, maybe I'll report this now. So -- no. I assume 19
- that's a pretty recent complaint. 20
- 21 Okay. So do you think this how long has it 22 been there is a completely superfluous question on this
- 23 chest pain chart?
- 24 MR. MCCAULEY: Form.
- 25 For other types of pain, I would think that Α

Page 169

- would be pertinent. But for chest pain, that's usually 1
- 2 something that people would report right away.
- 3 Okay. So if you were editing this chest pain chart, you would strike this line, "How long has it been 4
 - there"?

5

6

7

8

- MR. KNOTT: Form. Hypothetical.
- Α These are the typical questions you ask
- anybody with any complaints of pain. But that's --
- 9 Well, any complaints of -- go ahead. I'm 10 sorry.
- Any complaints of pain, it's a pain -- pain 11 Α
- 12 questionnaire, basically.
- Well, this isn't just a questionnaire about 13 14 how are you feeling. This is a questionnaire that's
- 15 designed to help a practitioner detect whether someone's
- having a heart attack; is that right? 16
- That's what it's meant to do. But they're --17
- I mean, these are questions I would ask someone if they 18
- 19 had a pain in their toe. I mean, it's not -- chest pain
- 20 is usually something that people would report right
- 21 away.

23

- 22 0 If you were editing --
 - I'm assuming that --Α
- 24 0 Go ahead.
 - I'm assuming that when they complain of the Α

```
Page 170
                                                                                                                        Page 172
    chest pain, it's a recent development, and the officer's
                                                                       think is useful in determining and helping you conduct a
 1
                                                                   1
2
    calling me with that recent development of chest pain.
                                                                   2
                                                                       differential diagnosis of chest pain, would you strike
              Okay. So if you were editing this chest pain
                                                                       this line from the form because it's not useful?
3
                                                                   3
    chart, you would strike that question as irrelevant and
                                                                   4
                                                                                 MR. KNOTT: Ms. Pisney, you may answer again,
 4
                                                                   5
5
    not helpful; is that right?
                                                                            or you may stand by your prior answers
              MR. KNOTT: She's answered that question
                                                                   6
                                                                                 In this case, I didn't find it useful.
6
7
              Protocols -- or these forms are -- they're not
                                                                   7
                                                                                 Ms. Pisney, I'm asking you about what you
8
    individualized. So it depends on the individual. It
                                                                   8
                                                                       would do if you were editing this form. Would you
    depends on what I want to get at, but that's not
                                                                   9
9
10
    something that I ask them.
                                                                  10
                                                                                 That's a hypothetical question and I -- that's
11
              My question was, if you were editing this form
                                                                  11
                                                                       a hypothetical question and I don't feel I can answer
    to help a practitioner detect chest pain -- detect heart
12
                                                                  12
13
    attack as a result of chest pain, is, "How long has the
                                                                  13
                                                                                 It is a hypothetical question. Why can't you
    chest pain been there," a line that you would delete
                                                                  14
                                                                       answer it? If you were controlling -- if you were
14
15
    because it's just not helpful in assessing whether
                                                                  15
                                                                       editing this form, I'm asking what you would do, if you
    someone is suffering from a heart attack? I would like
                                                                       were editing a chest pain form to help a practitioner --
16
                                                                  16
                                                                                 MR. WEIL: Doug, if we're going to do this --
17
    you to answer that question.
                                                                  17
                                                                                 MR. KNOTT: This has --
18
              MR. KNOTT: It's been asked and answered.
                                                                  18
              MR. WEIL: No. It has not been answered,
                                                                                 MR. WEIL: -- we're going to mark the
19
                                                                  19
                                                                  20
                                                                            transcript and I'll just move to compel. Okay? So
2.0
         Doug.
21
              MR. KNOTT: It's been asked and --
                                                                  21
                                                                            it's your choice.
              MR. WEIL: Doug, it has not been answered.
                                                                  22
                                                                                 MR. KNOTT: This has reached the point -- this
22
23
              MR. KNOTT: It's been asked and answered,
                                                                  23
                                                                            has reached the point of harassment. You're --
24
          three times.
                                                                  24
                                                                                 MR. WEIL: Okay.
              MR. WEIL: No. It has not.
25
                                                                  25
                                                                                 MR. KNOTT: You -- this is well past the point
                                                                                                                        Page 173
                                                     Page 171
              MR. KNOTT: Don't interrupt me. It's been
                                                                            of harassment, so I'll protect her. I'm not going
1
                                                                   1
2
          asked and answered -- it's been asked and answered.
                                                                   2
                                                                            to let you keep brow beating her and harassing the
 3
              MR. WEIL: Are you going to instruct the
                                                                   3
                                                                            witness over --
 4
          witness not to answer this question. Because
                                                                   4
                                                                                 MR. WEIL: Okay.
5
          otherwise, I'd just like to get an answer from her?
                                                                   5
                                                                                 MR. KNOTT: And what pertinence does it have,
              MR. KNOTT: She's answered it three times. You
                                                                            if she was -- all -- she was editing a security
6
                                                                   6
7
         get one more shot at it, then we're moving on.
                                                                   7
                                                                            document?
              I don't write these forms. So I wouldn't edit
                                                                                 MR. WEIL: Doug, don't coach the witness, A.
8
                                                                   8
9
                                                                   9
                                                                            B, this isn't a security document, right? This is
    BY MR. WEIL:
                                                                            created by ACH.
10
                                                                  10
              If -- the question is, if you were editing it,
                                                                                 MR. KNOTT: Yeah. I don't know.
11
                                                                  11
12
    ma'am. If you were editing this form, is this a line
                                                                  12
                                                                                 MR. WEIL: Okay. Well, listen. Doug, I'm
13
    that you would strike from it?
                                                                  13
                                                                            going to ask the question, and then you can make
14
               MR. KNOTT: Okay. You've asked it five times.
                                                                  14
                                                                            your record --
15
         This is it. Steve, we're not doing this all day.
                                                                  15
                                                                                 MR. KNOTT: Get to it.
             The -- So I talked to this -- about this
                                                                                 MR. WEIL: -- and we'll mark this part of the
16
                                                                  16
    person multiple times during the day. None of those
                                                                            transcript. Okay?
17
                                                                  17
    times did she complain of chest pain previously, even
                                                                       BY MR. WEIL:
18
                                                                  18
19
    though on this form she says that -- or they say, that
                                                                  19
                                                                                 Ms. Pisney, we've been talking about this
20
    she had it on and off all day. She did not complain to
                                                                  20
                                                                       line. How long has the chest pain been there, right?
    anyone about chest pain on and off all day. It is not
21
                                                                  21
                                                                            Α
                                                                                 Correct.
22
    one of the questions I asked. So I didn't feel it
                                                                  22
                                                                                 Your testimony is, that it's not your practice
    pertinent and I did not ask about it.
23
                                                                  23
                                                                       to inquire into that matter because you assume that any
24
              My question is about you editing this form.
                                                                  24
                                                                       chest pain has been reported immediately; is that right?
    Okay? If you had control of this form, and what you
                                                                                 Or within a short amount of time. Correct.
25
                                                                  25
```

Page 176 Page 174 1 Okay. And so if you were editing this chest Α Did not specifically complain of chest pain at 1 2 pain form, you would -- would you strike that line from that time, though. 2 the chest pain form as useless, in performing a Okay. She just complained that she could not 3 3 0 differential diagnosis? breathe? MR. KNOTT: Object to the form of the 5 5 MR. KNOTT: Asked and answered. question. Asked and answer. Ms. Pisney, you may Her oxygen saturation was normal. 6 6 Α answer again or you may stand by your prior 7 0 Did you take an oxygen saturation measurement 8 8 in the afternoon -responses. I didn't find it pertinent, at the time. 9 9 Α Α I --10 BY MR. WEIL: 10 0 -- when she said she could not breathe? 11 Q Okay. And my --11 Α I believe they did, but I'm -- can't be My -- so I can -certain. 12 Α 12 Did you -- do you have any -- did you see any 13 0 Okav. 13 Q Α As -- in my professional judgment, I can 14 document preparing for this deposition, indicating in 14 15 decide if something is pertinent or not, and ask that 15 the afternoon when there was a call about Ms. Boyer question. I didn't find it pertinent, so I did not ask having extremely high blood pressure and not being able 16 16 that question. There are many questions I could ask, to breathe, that any sort of oxygen saturation test was 17 17 but I did not find it pertinent, at this time, to ask 18 18 done? that question. Α I -- I thought there was, but perhaps they 19 19 20 Okay. And I believe that you said when Ms. didn't. 0 20 21 Boyer had reported high blood pressure earlier, and she 21 Q Okay. had prompted the guard to take her blood pressure, you Α I don't know. Did she ever receive her -- her 22 22 also didn't ask whether she had any other symptoms; is 23 23 inhaler? 24 that right? That was your testimony, right? 24 Do you -- the next line is, "What caused 25 No other symptoms were reported to me. 25 pain," do you see that? Page 175 Page 177 1 And you didn't ask if she had any other 1 Α 2 symptoms, did you? 2 Is that a question you'd want to know the 3 Lord. 3 answer to? MR. KNOTT: Object to the extent, it misstates 4 4 Α I don't think that the patient would be able prior testimony. to answer that. 5 5 I didn't recall. Okay. Well, a patient who might say something Α 6 6 7 Okay. If those symptoms had been reported to 7 like, well, I bumped into something and I'm having chest you before, you would have learned that around 3:00 pain after having bumped into something. That would 9 p.m., Ms. Boyer had -- felt like she could not breathe, 9 help you exclude the possibility or reduce the and had a blood pressure of 177 over something very likelihood, that this -- the pain that they were 10 10 high, right? experiencing was caused by a heart attack; is that 11 11 12 Α 12 right? 13 And you agree that shortness of breath 13 Α I believe that the jailer would've relayed 14 followed by chest pain is a sign of a heart attack; is 14 that information to me. that right? 15 15 So you wouldn't ask that information? That was five hours previous. So I wouldn't God. If the jailer called me and said, this 16 16 have considered those to be in the same realm, at all. person fell into a chair and now they're having chest 17 17 0 pain --18 Okav. 18 19 Α I -- I didn't -- they were not associated. 19 Okay. 0 20 Do you agree that the symptoms of chest pain 20 Α I -- they tell me those things. can go on and off for hours? 21 Would -- the next line is, "Any similar 21 22 MR. KNOTT: Asked and answered. 22 symptoms before, " do you see that? 23 Yeah. We did talk about that previously. It 23 Α Yes.

24

25

can be minutes or hours.

Right. Right.

Q

24

25

the patient who's coming to you with chest pain?

Is that a question that you would want to ask

Page 180

Page 181

Page 178 1 Α Yes. 1 Q Okav. 2 0 Okay. And is that a question that you would 2 -- I would ask. Α ask the quard, to relay any information about? 3 3 MR. KNOTT: Don't interrupt. I -- I didn't specifically ask that question. Okay. You said diaphoretic? 4 0 You didn't ask that question, either? 5 Q 5 Α Yes. Α I did not. 6 0 And shortness of breath? 6 7 7 Okay. "Does the pain come and go," do you see Δ 8 that question? The last star under S. 8 0 You didn't attempt to gather any information 9 about her medical history? 9 Α 10 Is that an important question to ask a person, 10 Α 11 who's complaining of chest pain? 11 You didn't attempt to gather any information It could be. about whether she'd been experiencing chest pain 12 Α 12 13 Okay. Is that a question that you would've 13 throughout the day? asked the guard to relay any information about to you, MR. KNOTT: Asked and answered. 14 14 I did not at that time. No. 15 if you'd gotten it? 15 I don't have this questionnaire memorized. I You didn't attempt to gather any information 16 16 asked what I feel is pertinent at the time, in my 17 17 about whether the pain came and went; is that right? MR. KNOTT: Asked and answered -- asked and 18 judgment, and in knowing the -- the information about 18 the patient. answered. 19 19 20 20 Α I did not. Q What information do you attempt --21 Α Every --21 Did you ask her -- did you ask the guard to 22 Okay. Go. I'm sorry. Go ahead. 22 inform you what the chest pain felt like? Every patient is different. I had talked to I may have asked them that. 23 23 them multiple times about this patient, so I felt that I 24 24 Okay. And would you expect the guard to have had an understanding of what we knew about the patient. 25 25 reported that it was, achy, stabbing, and "I'm not Page 179 They had called me before and told me she had chest -right"? 1 1 2 or she had high blood pressure. We were treating her 2 Α 3 high blood pressure, that was improving. They called me 3 said, I'm not right. 4 many, many hours later and said she'd had a complaint of 4 chest pain. We talked about that. Her blood pressure 5 5 was still a little elevated, so I thought perhaps the 6 you that? 6 7 blood pressure could be leading to some of the chest 7 pain. We gave her aspirin because I didn't think that 8 8 answered that. 9 could hurt anything. And then I asked them to recheck 9 MR. WEIL: No. She didn't. I don't -her blood pressure in half an hour, and call me if it 10 10 was elevated, and also to let me know if she continued 11 11 to have chest pain. They never called me back, so I 12 12 assumed that she -- her blood pressure was fine, her 13 13 14 chest pain resolved, and she was resting comfortably. 14 the reason. 15 When you say, "They called me with chest 15 MR. WEIL: Yeah. I know. pain," I wrote down you said, "We talked about that"; is 16 16

that right? 17 Α We did. I asked --18 19 0 Okay.

20 -- were there any other symptoms associated with the chest pain? Was the chest pain at rest? Was 21

22 she diaphoretic? Did she have shortness of breath?

Those are --23

24 Q Did you --

25 -- the typical questions --Α

I do not remember them ever saying, that she

Given that that's written down on the form, is there any reason you think that the guard would not tell

MR. KNOTT: She just -- that's -- she just

MR. KNOTT: Yes. She did. She just -- she told you what her recollection is and you keep asking is there any reason when she just told you

BY MR. WEIL:

I'm just asking if there's -- you have any 17 reason to think that they didn't also tell you, "I'm not 18 19 right," as -- since she reported that symptom.

MR. KNOTT: She just answered it.

I don't recall them telling me that. Α

22 Okay. Do you -- would you have asked about 0 whether she had nausea or vomiting? 23

24 I would not. That's not something I typically 25 think about as a -- as a symptom of chest pain. But, as

20

Page 184

Page 185

```
Page 182
    we've gone through the American Heart Association's
 1
2
    typical symptoms, that's what they did give. I did not
3
     ask about nausea and vomiting.
               Okay. And you didn't ask whether she was
5
     dizzy?
 6
         Α
              No.
7
          0
               Okay. And you said that you asked whether she
8
     was short of breath, right?
9
          Α
10
               Okay. And she reported that she was -- that's
11
     what the guard reported?
               As some shortness of breath.
12
          Α
13
               Okay. So she had some shortness of breath,
     along with chest pain?
14
15
          Α
               Yes.
               Did you ask the guard whether Ms. Boyer
16
17
     reported being on any medications at all?
18
              No. Because I was under the understanding
     that we did not know her medications.
19
20
               And that's based on a conversation that
21
    Ms. Boyer had on intake that --
               Earlier that day.
22
         Α
23
              Well, the day before, right?
24
          Α
               It was my conversation, earlier that same day.
25
              You understood that Ms. Boyer had been brought
                                                      Page 183
1
     in the night before?
```

```
2
              And I think, as we've talked about today, on
     all those times, you told me that you did not ask
 3
     whether she had any other symptoms beside high blood
 5
     pressure, right?
 6
               MR. KNOTT: Object. Misstates the testimony.
 7
              The -- the officers typically will tell me the
 8
     symptoms that the patients are complaining of.
 9
               So in other words, they would have told you
10
     before that she was complaining that she couldn't
11
     breathe before, right?
              MR. KNOTT: Foundation. Speculation. All
12
13
          right. Yeah.
              I -- my testimony isn't going to change. I
14
          Α
     just -- I just told you what I recalled.
15
              Yeah. Okay. If the officers typically tell
16
     you the symptoms that someone's complaining of, they
17
18
     typically would've told you about all the symptoms that
     are listed here under S; is that right?
19
20
               MR. KNOTT: Well, that's -- that's
21
          speculation. Foundation. And she's testified to
          her memory of the calls. I -- this -- this
22
          constant asking what the officers would do after
23
          she tells you her memory of it is I think --
24
25
              MR. WEIL: Doug, she just described her --
```

day and no new information was given to me.

```
particular, but I can't -- it's not in my recollection,
 3
 4
     but --
 5
               Okay.
          0
               -- now I know she had been brought in the
          Α
 6
 7
     night before.
               However long the time that elapsed, would you
 8
 9
     want to exclude the possibility that she might have more
     information about her medical condition or her medical
10
     history, in the time that had elapsed since she'd been
11
12
    brought in?
13
               I would've thought that if she was on other
14
     medications for her blood pressure, when she -- they
     called to tell me she had high blood pressure, they
     would've told me that.
16
               My question was different, Ms. Pisney. I'm
17
     asking, if you would've wanted to exclude the
18
19
     possibility that she might have recalled more about her
20
     medical condition, given that she was complaining about
     chest pain? Is that something you would've wanted to
21
22
     make sure you could explore any information that you
```

Yes. I -- I don't know that I knew that in

2

23

24

25

```
1
          what --
 2
              MR. KNOTT: I think is not --
 3
               MR. WEIL: -- officers typically do. I'm just
          off -- asking what officers typically do. Okay?
5
          So if someone --
               They typically do not read this verbatim to
6
7
     me, and I've never had an officer give me this much
     detail about a patient, ever.
8
9
     BY MR. WEIL:
              The line under, "Location of chest" --
10
              MR. KNOTT: It's in exhibit -- just -- I just
11
12
          need, when she said this, it's referencing Exhibit
13
          19.
14
              MR. WEIL: Yeah.
15
              MR. KNOTT: Right?
               THE WITNESS: Yes. Correct.
16
              MR. KNOTT: Yeah.
17
     BY MR. WEIL:
18
19
          0
               So regardless of whether it's read verbatim,
20
     what about -- would you expect that officers would
     typically read in substance the conditions that someone
21
22
     -- that a patient had complained about?
23
               They tell me that she's having chest pain.
```

24

25

I had talked to them multiple times during the

MR. KNOTT: Form.

could gather about that?

They answer any questions that I have. They typically

tell me their vital signs. If something that I ask

2

6

7

8

9

10

11

12

8

9

10

11

12

20

Page 186

- hasn't been answered by the patient, then sometimes they 1 will go back to the patient and ask them that question.
- 2
- 3 Okay.
- But --4
- 5 So I've -- down here under neck -- pain in
- neck, shoulder, arm, would you ask -- would it be your 6
- practice to ask the guard, to tell you what the patient 7
- 8 has told you about what the location of the pain is -
 - the chest pain?

9

14

- 10 I do typically ask about where they're --11 where in the chest they're having pain.
- Okay. And this says, "Underneath the left 12 13 shoulder," do you see that?
 - Α Yes. I do.
- And that's a sign that is consistent with a 15 Q heart attack; is that right? 16
- It was on the AHA sheets that you showed me. 17
- 18 And you agreed that -- you agreed with -- that it was consistent with heart attack, right? 19
- Α It can be. 2.0
- 21 Okay. It makes it more likely; is that right?
- Also makes shoulder pain more likely, so... 22
- Okay. And given -- in the differential 23
- diagnosis, you would -- if you learned that someone has 24
- 25 chest pain and they have pain underneath their left
 - Page 187
 - shoulder, you would want to exclude, absolutely, the
 - possibility that they have a heart attack; is that
- right? 3

1

2

- 4 MR. KNOTT: Foundation. Incomplete
- 5 hypothetical. Vague. Overly broad.
- This -- this lady was 41 years old, which is 6 7
- typically not a postmenopausal woman. I didn't know that she had any history of heart disease. Typically, a 8
- 9 premenopausal woman is not likely to have a heart
- attack. Many times in the jail, they're complaining of 10
- chest pain, shortness of breath, when they're anxious. 11
- This is the first time she's ever been in the jail. 12
- Anxiety was a more likely diagnosis than cardiac, in my 13
- 14 judgment.

15

16

17

- So anxiety would be a relatively benign diagnosis of a chest pain condition, right?
- It -- yes.
- Another diagnosis -- another possible cause of 18 19 chest pain, particularly pain under the left shoulder, 20
 - is heart attack; is that right?
- MR. KNOTT: It's been asked and answered, many 21
- 22 times.
- 23 In a 41-year-old woman with no known history 24 of heart disease, as far as I knew, it's unlikely to be
- cardiac in nature. 25

- 0 Okay. Is --
- In my judgment --Α
 - Go ahead. 0
- In my medical judgment, it was not high on the Α differential, that this was cardiac. 5
 - By high on the differential, you mean the list that you make in your mind of possible causes of the symptoms that's being reported?
 - The likelihood of those being the cause.
 - So even a lower likelihood cause -- I'm sorry. I didn't mean to interrupt you. Go ahead, Ms. Pisney.
 - So in my judgment, in my experience in
- 13 treating patients in the jail -- in my professional
- judgment, I didn't feel that cardiac was high on the 14
- list of differential. We had been treating her blood 15
- pressure and having good responses to the medications. 16
- Clonidine is also helpful in use -- in helping with 17
- anxiety, and withdrawal, and her blood pressure was 18
- improving. It was up a little bit when they called me 19
- with the chest pain, so that's why I wanted them to 2.0
- 21 check again in a half an hour, and also to let me know
- if she'd had any continued chest pain. From the 22
- observations that the officers made after that time, 23
- they rechecked her blood pressure. It was not elevated. 24
- She did not continue to complain of chest pain, and she 25

Page 189

was resting comfortably throughout the night. 1

2 When you say it's not high on your list, in

- your judgment, you're not free to just knock potentially 3
- deadly causes of a symptom off your list, right? You 4
- 5 have -- in the differential diagnosis, you must rule out
- or treat a deadly symptom that could kill a person 6
- 7 within hours; is that right? A deadly cause --
 - - MR. KNOTT: Foundation --
 - -- of a symptom that could kill a person within hours?
 - MR. KNOTT: Foundation. Vague. Overly broad.
 - Α Yeah. That's -- I -- there's no, you have to
- 13 do this, you have to do this, you have to do this.
- 14 There's there's none of that. People complain of
- 15 headaches and it can be an aneurysm, but you don't get
- an MRI on everybody that has a headache. 16
- 17 If someone's complaining of chest pain,
- they're nauseous or -- and they're complaining of chest 18 19 pain under the left shoulder, your judgment is that
 - heart attack does not have to go very high on the list
- of potential causes of those symptoms? 21
- 22 There's a whole list of things that you take
- 23 into -- into making a diagnosis. Again, I talk about 24 this 20-year-old male that comes to you with chest pain
- and left shoulder pain. He's more likely to have a 25

Page 190 Page 192 rotator cuff tear than he is to be having a heart 1 Α I did not. 1 2 attack. So a 41-year-old, premenopausal woman, with no 2 0 Did you ask -- I believe you did ask, where heart history, as far as I know, who's in the jail, not Ms. Boyer was experiencing the pain -- where on her 3 3 happy to be in jail, anxious about being in jail, is body? more likely to be having an anxiety attack than to be 5 5 Α Correct. having a heart attack. In my professional judgment, I 6 0 Okay. And --6 That's my memory, anyway. 7 didn't feel that she was having a cardiac event, and Α 8 that anything else needed to be done besides what I was 8 0 Okay. And what -- it says on this form, on doing. I was treating her. I was monitoring her, and Exhibit 19, "Underneath left shoulder," are you looking 9 9 10 she did not have any further symptoms. 10 at 19? 11 What question did I ask you that you were 11 Α Yes. answering? Okay. Is that consistent with the 12 12 13 Α You said that -- you asked me if I was able to 13 recollection about what you were told in response to take chest pain off the list of the differential 14 that question? 14 diagnosis. And I was telling you how I was using my 15 15 Α I don't remember specifically. professional judgment to decide what to do in the plan Okay. Is there any reason to think -- given 16 16 that that's what's written on this form, is there any 17 of care for this patient. 17 MR. KNOTT: Counsel. reason to think you would've been told something 18 18 MR. WEIL: So --19 different? 19 MR. KNOTT: I could use a comfort break soon. 20 Α No. 2.0 21 And when you're asking her what question you asked 21 Okay. The next prompt is that, "Have detainee her, I think we're at a point where maybe that 22 pinpoint area of pain." Would you have asked the guard 22 to have Ms. Boyer pinpoint the area of pain? 23 would be good. 23 24 MR. WEIL: Well, yeah. We can take a break. 24 Α 25 That's fine. Come back in five minutes, 3:37? 25 Okay. And you asked about shortness of 0 Page 191 Page 193 breath, I believe you said, right? 1 MR. KNOTT: Yep. 1 2 MR. WEIL: Okay. 2 Correct. 3 COURT REPORTER: We're off the record. The 3 So of all the questions I have on this first 4 time is 3:32 p.m. 4 page, under S and O, the two questions that you recall (OFF THE RECORD) 5 asking -- or that you believe you asked are, "Is the 5 COURT REPORTER: We are back on the record for pain in the neck, shoulder or arm," and, "Is there any 6 6 7 the deposition of Lisa Pisney being conducted by 7 shortness of breath"; is that right? video conference. My name is Sydney Little. Today I asked -- I likely asked whether she was 8 8 9 is March 3, 2022. And the time is 3:50 p.m. 9 having any shortness of breath, any diaphoresis, any BY MR. WEIL: other symptoms besides the chest pain. 10 10 Ms. Pisney, when we got off the record, before Any other symptoms beside the chest pain? 11 11 Q 12 we took a break, I -- really quickly, the symptoms that 12 Α Correct. 13 you talked about were -- you asked the guard to report 13 0 Okay. And so, would you have asked about 14 whether Ms. Boyer had experienced any similar symptoms 14 dizziness then? 15 before; is that right? 15 Α I didn't specifically ask that but --No. I did not. Α 16 16 Q Okay. Okay. You did not. And you didn't ask her -- I did ask for any other symptoms, and I 17 17 Α whether -- about the -- whether the pain comes and goes, don't remember them relaying any other symptoms. 18 18 19 right? 19 Okay. Given that dizziness is written on 20 Α Correct. 20 here, would you expect that the -- if you'd asked for Did you ask whether Ms. Boyer was experiencing any other symptoms, that the guard would have told you 21 21 22 nausea or vomiting? 22 that Ms. Boyer was also feel dizzy? Α I --23 Α I did not. 23 MR. KNOTT: Form of the -- form of the 24 Okay. Did you ask whether Ms. Boyer was 24 experiencing dizziness? question. Foundation. Speculation. 25 25

2

3

Ms. Boyer said?

Page 194 1 Α I don't remember them telling me that. 2 Any reason to think that they would not have told you that, if you asked whether there are any 3 additional symptoms? MR. KNOTT: She just answered that question, 5 based on her recollection. So I think that's an 6 improper question. Asked and answered. 8 BY MR. WEIL: Can you answer my question, please, 9 Q 10 Ms. Pisney? 11 Α I just don't remember them ever telling me 12 that. 13 Okay. But my question is, given that it's on 14 this form, do you have any reason to think that they wouldn't have told you that, if you asked for any 15 additional symptoms? 16 I --17 Α 18 MR. KNOTT: She can only testify -foundation. Speculation. Asked and answered. 19 20 Okay. If you ask for any additional --21 Α I can't --

don't remember them telling me her -- describing that to 5 6 Okay. If you asked the guards to describe any other symptoms, given that, "I'm not right," is written 7 8 on the sheet. Do you have any reason to think that the 9 guard would not tell you that Ms. Boyer reported, "I'm 10 not right"? 11 MR. KNOTT: Same objections. Asked and answered. 12 13 I can only tell you what I remember and I don't remember that being recalled. 14 15 Okay. But you have no reason to think it wasn't told to you, right? 16 MR. KNOTT: Same objections. She's already 17 testified. Asked and answered. 18 They -- I don't know what that -- I just don't 19 20 recall them ever saying that to me. 21 Okay. And you never asked whether she'd 22 experienced similar symptoms before? I can't -- I can't tell you why they wouldn't 23 Α No. 24 MR. KNOTT: Asked and answered. asked for any other symptoms, and I don't remember them 25 Okay. When we went -- before we went on Page 197 break, I believe you said that -- something to the 1

appears that the guard is recounting something that

That appears to be so on the sheet. But I

Page 195

```
1
    telling me that.
```

15

25

2 Okay. Another symptom listed on this form is, nausea or vomiting, do you see that? 3

have told me or why they would have told me. I just

Okay, go ahead. I'm sorry.

- Correct.
- If you asked for any other symptoms, would you expect the guards to have told you that she'd answered yes, to the question of nausea or vomiting?
 - It would be another --
- MR. KNOTT: Same objection -- same objections. 9
- Yeah. It would be another symptom but I don't 10 remember them telling me that. 11
 - Any reason to think that they would not have told you that she had answered yes to the question, nausea or vomiting, if you asked whether she was experiencing any other symptoms?
- MR. KNOTT: Same objections. Asked and 16 17 answered.
- I have no reason why they would not tell me or 18 19 would tell me. I -- I asked for other symptoms. I 20 always ask for other symptoms.
- Okay. The other thing that it says on here 21 22 above dull, aching or sharp pressure is, "I'm not right," do you see that? 23
- 24 Α Yes.
 - And that's in quotes. Would you agree it

- effect of, and I -- correct me if I'm wrong. People who
- are in jail often experience anxiety, and it was your 3
- judgment that Ms. Boyer was likely experiencing anxiety; 4
- 5 is that right?
- That it was -- I thought it was more likely 6
- 7 than -- a more likely explanation for her symptoms than 8
- chest -- than cardiac.
- Okay. So it's more likely she was 9 experiencing anxiety than a heart attack. Is that --10 that was your assessment, in your judgment? 11
- 12 Α With -- with the information I had at the 13 time, yes.
- 14 And in performing a differential diagnosis, 15 anxiety would be low on the terms of when you're listing causes and trying to make sure that you rule out or 16 treat causes, anxiety would be low on that list, right? 17
 - Α It would be a more benign cause.
- 19 Okay. And a more -- the -- not withstanding 20 your judgment, that this was caused -- that the symptoms
- 21 that we've gone over -- or that were reported to you
- 22 were caused by anxiety, another potential cause of those
- 23 symptoms was heart attack; is that correct?
- 24 Α That's a possible diagnosis.
 - And it's critical when conducting a

MR. KNOTT: It's covered, easily for an hour this morning. Asked and answered. Please don't retread that ground.

The -- you have to take everything into consideration, when making a judgment about what you think could potentially be the cause. And in taking everything together, I thought the more likely diagnosis was anxiety than cardiac.

BY MR. WEIL: The more serious and deadly potential cause of the condition was heart attack, though. Given the symptoms that we've just gone over today, right? They -- just going over that you think that you -- were reported to you on this chest pain call, on the evening of Sunday, the 22nd; is that right?

MR. KNOTT: Object to the form of the question.

Knowing nothing else besides the symptoms that could -- that would be, of course, more serious. But I -- you have to take everything into consideration when you make a diagnosis and a judgment.

The differential diagnosis requires you to

Ms. Boyer was simply anxious; is that right?

Correct. Α

And another possible cause of those three 3 symptoms is that Ms. Boyer was experiencing a heart 4 5 attack; is that correct?

It's a possible cause.

And it would be -- and a heart attack is 7 8 exponentially more serious than anxiety, when you're 9 performing differential diagnosis; is that right?

10 MR. KNOTT: Asked and answered, multiple 11 times. Argumentative.

It is a more serious diagnosis but I thought 12

it was less likely --0 Okay.

15 Α -- because of her age, and sex, and other diagnoses that I was not aware of.

Another diagnosis, meaning that she had 17 18 cancer, right?

Yeah. Cancer doesn't necessarily make you at 19 Α a higher risk of heart disease. 2.0

21 Okay. Given the -- you believed it was less 22 likely, given that heart attack was a possible cause of 23 those symptoms, it's important to put that at the top of the differential diagnosis list, in order to rule it out 24 25 before it's able to kill the patient; is that right?

Page 199

rule out more serious symptoms, though, right? Most --

MR. KNOTT: Been asked and --

More serious potential causes.

MR. KNOTT: Asked and answered, multiple times. It's argumentative.

It's not a cookbook. You can't just say, 6 7 check, check, check. There's -- that's not how it's 8 done.

Okay. So you're presented with someone -- and we've gone through this list of what you believe you recall being told. And so we talked about differential diagnosis in the abstract this morning. Now I'm trying to deal with the information that you were provided with. Okay? What you were provided with, according to your memory, is that you were told that this person had chest pain, correct?

Α Yes.

And that the chest pain was underneath the 18 19 left shoulder, correct?

> Α Yes.

And that they had some shortness of breath --21 0

22 Α

-- correct? Given those three conditions that 23 24 you recall being told, one possible cause of those

conditions, if I understand you correctly, is that 25

Page 201 1 MR. KNOTT: Asked and answered, at least ten 2 times.

3 Α In this case, I didn't feel that it was high on the list of the differential. Things were more 4 likely to be causing her chest pain than cardiac cause, 5

> Did you feel --0

because her age, her sex.

I just thought it was unlikely. Α

9 Okay. So you chose not to rule out cardiac 10 because you thought other things were more likely?

I chose not to go further down the cardiac 11 12 path because I thought other diagnoses were more likely. 13 Yes.

And it's your testimony, that that's an acceptable practice when performing the differential diagnosis?

Α In the situation that I was in, and the 17 information I had. Yes. 18

19 Your -- turning to the second page of 20 Exhibit 19, so it's the back page. Your prescription was to give Ms. Boyer 81 milligrams of aspirin -- your 21 22 instruction was to give her 81 milligrams of aspirin; is

that right? 24 Α Yes.

Okay. And then to call -- to check her vital

8

9

10

11

12

13

Page 205

Page 202

1 signs and call back in half an hour; is that right?

- 2 A Yes. If it was elevated, and she had any more 3 chest pain.
 - Q Okay. And the one vital sign that I see changing is that her -- I believe her diastolic pressure moved from 102 to 92; is that right?
- 7 A Yes.

4

5

6

14

17

1

2

12

14

15

16

17

18 19

20

21

- 8 Q There is no other change in her vital signs;9 is that correct?
- 10 A That is correct.
- 11 Q Okay. And did you tell the guard what vital 12 signs would be abnormal in these circumstances, and what
- 13 would not be?
 - A They know the normal vital signs.
- 15 Q Okay. And the other instruction you gave, is 16 to call back if she was still complaining of chest pain?
 - A Yes.
- Q Given that you had concluded that Ms. Boyer's chest pain was likely caused by anxiety, why would it matter to you if she was still complaining of chest pain a half an hour later?
- 22 A That either she was anxious or she was having 23 -- it could be more cardiac related.
- Q Okay. So if she was complaining of chest pain an hour later --

Page 204
treatment, before the guards suggested that you provide
aspirin?

- A I was still thinking about it.
- Q Yeah. We noted a while ago that -- when we
 were reviewing the symptoms of heart attack, that chest
 pain pay -- a heart attack may be occurring, but chest
 pain comes and goes; is that right?
 - A That's correct.
 - Q So the fact that Ms. Boyer might not have chest pain one half hour after you provided her with aspirin, would not exclude the possibility that she -- that the chest pain she was experiencing was caused by heart attack; is that right?
- 14 A I would expect the officers to call me, if she 15 had chest pain at any other time.
- Q Okay. The question I had was, the fact that
 Ms. Boyer was not -- would -- might not be experiencing
 chest pain one half hour after you gave -- ordered this
 Ms. Boyer was not -- would -- might not be experiencing
 the state of the state of the state of the possibility that she had a heart attack; is that right?
- 21 A No. But they would have called me, if she had 22 chest pain at any time.
- Q Did you leave an instruction to call, if 24 Ms. Boyer had chest pain any other time?
 - A I said if she had any further chest pain to

Page 203

- A If it didn't go away --
- Q -- it could be cardiac?
- A If the chest pain didn't go away, it would be higher risk that there could be something cardiac going on, that's why I wanted to know. I was following up and making sure that she improved.
- 7 Q What sort of -- do you give any medication for 8 anxiety, in your practice?
- 9 A Sometimes. I had given her clonidine 10 previously, that also helped with her blood pressure and 11 with anxiety.
 - Q Okay. Does aspirin help with anxiety?
- 13 A No.
 - Q Okay. If you thought she had anxiety, why didn't you prescribe something for it?
 - A I'd given her clonidine earlier, and I wasn't sure I wanted to give more clonidine. And the officer asked me about giving her aspirin, and I didn't think that it would hurt anything to give her some aspirin.
 - Q So you didn't -- it was not your idea to give aspirin, it was the guard's?
- A They mentioned it to me. It's not something I would typically do.
- Q What had been your planned -- having gone through the sheet, what had been your planned course of

1 call.

25

2

3

4

- Q This is a -- okay. And if chest pain goes in and out over the course of hours, why do you think that that would exclude the possibility of heart attack?
- 5 A She never complained of chest pain again. She 6 complained once, and that was all.
- Q Okay. If chest pain goes in and out over the course of hours, why do you think that that would -- why does a complaint later of chest pain -- or checking about chest pain, exclude the possibility of heart attack?
- 12 A There was only one complaint of chest pain, so 13 it -- it wasn't going in and out, as far as I knew.
- Q Okay. And would the question of whether it was going in and out be important when you're deciding that a further complaint of chest pain is going to be enough to indicate to you -- just to rule out heart pain -- or heart attack later on?
- 19 A If she continued to complain of chest pain, 20 then that would have led to more discussion.
- Q Do you have any idea where Ms. Boyer was housed in the jail?
- 23 A In the jail -- I believe she was in the 24 booking area.
 - Q Okay. If Ms. Boyer had difficulty describing

Page 209

1 her symptoms or her medical history to someone, would 2 there -- would you be concerned that she might not be able to describe a history of chest pain, over the 3 course of the day?

She had complained of her blood pressure being elevated previously, she'd asked for her blood pressure to be checked, she complained about the shortness of breath that you talked about, she complained about the chest pain. So she didn't seem to have any problem telling the officers when she had a complaint.

Okay. And not withstanding that you assumed that she would be unable to account -- recount any medical history about chest pain; is that right?

When I was called earlier in the day, there was no information, we did not have her medical information, and I was not given any information that that had changed.

Do you really think it's likely that Shasta Parker, who placed this call and filled out this form, called you that Ms. -- told you that Ms. Boyer was experiencing chest pain, but did not bother to tell you that she had reported to Shasta that she had congestive heart failure?

24 MR. KNOTT: Object to the form of the question. It's argumentative. Lacks foundation.

Page 207

1 Calls for speculation.

2 I just -- I never remember hearing anything 3 about a heart history on this patient.

Given that it's written down here, do you 0 think it's likely that Shasta -- more likely than not, that Shasta Parker, who filled out this form, called you and reported that among -- in addition to having chest pain, Ms. Boyer had reported a history of congestive heart failure?

MR. KNOTT: Asked and answered. 11

12 Again, I don't recall being told that. Α

13 I'm asking, do you think it's more likely than 14 not?

15 MR. KNOTT: Calls for speculation. Foundation. Asked and answered. 16

I -- there were other things on this form that 17 I don't recall being told as well, so it's possible that 18 19 that wasn't relayed to me.

> 0 Possible it was?

MR. KNOTT: Same -- same objections. 21

22 I don't recall.

Okay. Did you review a -- an e-mail where 23 24 there's a conversation reported between you and Travis 25 Schamber?

Α No. I don't remember that.

2 0 Okay. We talked about that briefly this morning, that you talked with Travis Schamber before --3 or after this incident with Ms. Boyer?

> Α Yes.

6 0 Did -- did -- do you recall -- I believe you said you don't recall Travis Schamber looking at any 7 8 documents or going over any documents with Dr. Schamber, as he was recounting the history of what happened -- or 9 10 you were recounting the history of what happened?

11 I think eventually he got the documents, but I don't know if he had them at the time we had our 12 13 conversation.

0 Okay. You don't recall him referring to any documents about Ms. Boyer's medical history, or medical condition, or anything like that?

I don't know if he -- when we discussed, if 17 he'd had information about the -- her hospitalization 18 afterwards. That's possible. 19

20 Do you recall whether Ms. Fennigkoh was on 0 21 that call as well?

No. We did not talk to them together, as far 22 Α 23 as I know.

24 Q Okay. So it was just you and Travis Schamber 25 on that call?

1 Α I believe so.

Okay. Do you recall Travis Schamber saying that -- what had happened, that everything was kosher, regarding your care of Ms. Boyer?

He reassured me that he didn't think I did Α anything wrong, that there was nothing wrong with the care I gave the patient.

Did Travis Schamber ask you whether you 8 9 attempted to perform a differential diagnosis of Ms. Boyer's chest pain? 10

No. We talked about the calls that were made to me, the information that was relayed to me, the decisions I made with that information, and he didn't find that there was anything wrong with that.

And were you looking at any documents, when you told him what information was relayed to you?

No. It was just my memory. Α

Q Okav.

Α But it was clear memory, since it was recent.

20 This is -- I'm showing you now what's been

21 marked as Exhibit -- I'm sorry. I apologize, I'm going

22 to have to get the -- the exhibit number. I'm sorry,

23 hold on. Okay. So, Ms. Pisney, I'm showing you what's

24 been marked as Exhibit 24. It's a December 24, 2019 e-

mail from Amber Fennigkoh to Stan Hendrickson and Ryan 25

```
Page 210
 1
     Hallman (phonetic), do you see that document?
2
          Α
               Yes.
               Is this the document -- is this a document you
3
     reviewed in preparation for your deposition?
               I'm not sure if that was included, but I -- I
 5
     think I've seen it before.
 6
7
               Can you read it real quick to refresh yourself
8
     on it?
               MR. KNOTT: Is it -- can you read it?
 9
10
               THE WITNESS: Uh-huh.
11
              MR. KNOTT: All right.
              Okay. I've read it.
12
          Α
13
    BY MR. WEIL:
14
          0
               Okay. Does this -- does Exhibit 24 refresh
     your recollection at all about the substance of the call
15
     with Dr. Schamber, or who participated in that call?
16
               I still think that I just spoke with -- by
17
     myself to Dr. Schamber, but I'm sure Amber had spoken
18
     with him as well, at maybe a different time.
19
20
               Okay. In this e-mail, it appears that
21
    Ms. Fennigkoh is saying that she reviewed -- wait, okay.
     I'm sorry. Do you recall Dr. Schamber saying to you
22
23
     that everything was kosher, in terms of the care that
     was provided to Ms. Boyer?
24
25
              I don't think that he probably used that
                                                     Page 211
    particular term. But like I said, he told me that he
1
2
     didn't think I had done anything wrong.
3
               Okay. And you recounted to him, I'm assuming
     in much shorter form and substance, what you recounted
4
     to me today? In terms of what information you got, what
5
     information you requested about Ms. Boyer over the --
6
7
     over the calls that you had?
              I'm sure, maybe in better detail then, because
8
9
     it was just right afterwards.
              Okay. Do you recall Dr. Schamber telling you
10
     -- I'm looking at the last line here, "Dr. Schamber also
11
12
     told Lisa he wouldn't be surprised if she didn't make
```

Page 212 1 Okay. Does this refresh any -- your memory 2 about anything else that was discussed in your call with Dr. Schamber? 3 Α I think he was the one that told me that the 4 electrolytes -- because I don't think I saw the hospital 5 records, at that point. He said her potassium was quite 6 low, and that was likely the cause of her arrest. And 7 8 that was something that you are not able to tell without a lab value, so it wouldn't be something that you could 9 10 11 The only way you could know something like, that is if you'd sent Ms. Boyer out to the hospital, 12 13 right? 14 Α If she'd had a blood test done. 15 You went to the Monroe County Jail multiple times, every week, while you worked for ACH at the 16 Monroe County Jail, right? 17 18 Α Correct. You were aware that there was an emergency 19 20 room and a hospital across the street from the jail; is 21 that right? 22 Α 23 Okay. So during the -- okay. Let me strike 24 it. During all these calls regarding Ms. Boyer on the 25 22nd, you knew that an emergency room was yards away Page 213 1 from the jail; is that right?

2 MR. KNOTT: Object to form. 3 Α Yes. 4 I'm almost done here, Ms. Pisney. All right. 5 When -- when you were hired on at ACH, you attended a 6 multi-day course in Peoria, Illinois; is that right? 7 Α Yes. 8 And that was something of an orientation for 0 9 new hires to ACH? 10 Δ Yes. Was part of the way it was billed to you, to 11 12 train you in how to function in correctional medicine, 13 as opposed to medicine in the community? 14 15 MR. WEIL: Okay. I'm going to introduce -this would be -- are we on Exhibit 31, Sydney? 16 COURT REPORTER: Yes. 17 MR. WEIL: Okay. So I'm introducing what's 18 19 been marked as Exhibit 31. This was part of a 20 larger production by ACH, that begins ACH Bates 18914, and it ends ACH Bates 18929. I'm going to 21 22 write that down for my own notes here and then 23 we'll get going. 24 BY MR. WEIL:

25

I do. I don't specifically recall him saying

The way this e-mail reads, I'm -- I'm reading

I've seen her hospital records, and I

reported something to Ms. Fennigkoh. Is that -- is that

Either that, or -- or Amber spoke with Dr.

it without much context. It reads as though Dr.

Schamber reported something to you, and then you

13

14

15

16

17

18 **19**

20

21

22

23

24

25

it," do you see that?

Q

Α

how you read it?

Schamber as well.

Α

that, but he -- he may have.

understand what he was talking about.

Okay.

As I understand it from your lawyer,

```
Page 214
                                                                                                                        Page 216
 1 Ms. Pisney, this was among a deck of documents that you
                                                                    1
                                                                             Δ
                                                                                  Yes
 2
    kept with you from that training, that you had when you
                                                                    2
                                                                             0
                                                                                  And then there'd be -- I'm assuming there'd be
     began working at -- before you began working at ACH; is
                                                                        -- you'd be in a room with other folks, and Dr. Schamber
 3
                                                                    3
     that right?
                                                                        is maybe up in front, and he's got the same slides
                     (EXHIBIT 31 MARKED FOR IDENTIFICATION)
                                                                        pulled up on some sort of a projector for everybody to
 5
                                                                    5
               I assume. Yes.
                                                                        see; is that right?
 6
          Α
                                                                    6
                                                                    7
 7
               Okay. Do you recognize -- here I'm going to
                                                                             Α
                                                                                  Yes.
 8
     blow it up. I'll take off the marginal lines. Do you
                                                                    8
                                                                                  Okay. Do you know whether any of those
                                                                        meetings -- did it look to you like they were being
 9
     recognize this document?
                                                                    9
10
               It was in a bind -- a very large binder of
                                                                   10
                                                                        recorded at all?
11
     information that we went through.
                                                                   11
                                                                             Α
                                                                                  I don't think so.
               Okay. And this -- this particular PowerPoint
                                                                                  Okay. I went to -- I --
12
                                                                   12
13
     says, "Introduction to Correctional Healthcare." Do you
                                                                   13
                                                                                  MR. KNOTT: I'm sorry. What exhibit is this?
     see that?
                                                                                  MR. WEIL: This is 31.
14
                                                                   14
                                                                                  MR. KNOTT: In terms of number.
15
          Α
               Yes.
                                                                   15
               When this training was performed, do you
                                                                                  MR. WEIL: 31, Doug.
16
                                                                   16
17
     recall how it was performed? Was this something that
                                                                   17
                                                                                  MR. KNOTT: Thank you.
18
     was handed to you, or was this done in conjunction with
                                                                   18
                                                                        BY MR. WEIL:
     some sort of in-person presentation?
                                                                                  Do you see this, "Why do you go to the
19
                                                                   19
                                                                             0
          Α
               Some of it was -- we didn't go through
                                                                   20
                                                                        doctor?"
2.0
21
     specifically, and some of it we did. I can't remember
                                                                   21
                                                                             Α
                                                                                  Yes.
     if this was one we particularly had an in-person
                                                                   22
                                                                                  Okay. And one of the reasons you go to the
22
                                                                             Q
     presentation, but there were multiple presentations in
23
                                                                   23
                                                                        doctor is to be healthy, right? That's what you were
     those days -- those two days, I think it was.
24
                                                                   24
25
               There -- I saw in the production, I don't have
                                                                   25
                                                                             Α
                                                                                  I guess.
                                                     Page 215
                                                                                                                        Page 217
     it handy to pull up, but sort of an itinerary for those
                                                                    1
                                                                                  Okay. Were you informed that inmates go to
 1
 2
     two days; is that right?
                                                                    2
                                                                        the doctor for different reasons than people in the free
 3
          Α
               Okay.
                                                                    3
                                                                        world?
 4
          0
               And when --
                                                                    4
                                                                             Α
                                                                                  They have different motivations, at times.
                                                                                  Okay. Were you told that these --
 5
          Α
               That's possible. Yes.
                                                                    5
                                                                                  MR. KNOTT: Could you give me the Bates
          0
               Is that consistent with your recollection?
 6
                                                                    6
          Α
                                                                    7
                                                                             number?
               Okay. And when I -- the itinerary indicated a
 8
                                                                    8
                                                                                  MR. WEIL: Sure, sure, sure.
 9
     lot of presentations that would have the same title as
                                                                    9
                                                                                  MR. KNOTT: I'm just trying to catch up here.
     what -- what's on various different PowerPoint slide
                                                                                  MR. WEIL: Absolutely. Again, it's -- the
10
                                                                   10
     decks? Is it --
                                                                             starting Bates of Exhibit 31 is 18914, and the
11
                                                                   11
12
          Α
               Yes.
                                                                   12
                                                                             ending Bates is 18929.
13
               Okay. Is it consistent in your recollection
                                                                   13
                                                                                  MR. KNOTT: Okay. Thanks.
14
     that those slide decks that -- whose titles also appear
                                                                   14
                                                                        BY MR. WETT:
15
     in the itinerary, were in-person presentations?
                                                                   15
                                                                                  Okay. So were you told that immates go to
               I believe so.
                                                                        doctors for different reasons than people in the free
16
                                                                   16
               Okay. Do you recall Travis Schamber
                                                                        world?
17
          Q
                                                                   17
     presenting any topics?
                                                                                  When they're in jail, they may see the doctor
18
                                                                   18
19
          Α
               Yes. He presented many.
                                                                   19
                                                                        or have different motivations for seeking care than when
20
               Okay. Was there any illustration, or visual
                                                                   20
                                                                        they're on the outside.
     media, or anything like that presented in addition to
                                                                                  Okay. And were you told that health is not
21
                                                                   21
22
     this PowerPoint, as part of these presentations?
                                                                   22
                                                                        the goal of an inmate who seeks medical attention in the
                                                                        jail?
23
          Α
               I don't believe so.
                                                                   23
24
               Okay. And so it would be -- you would have
                                                                   24
                                                                                  MR. KNOTT: Object to form.
                                                                                  I mean, they're not there for primary care, I
     this PowerPoint with you, in the binder, right?
25
                                                                   25
                                                                             Α
```

```

                                                                    3
                                                                                 MR. MCCAULEY: Joined.
     inmates don't go to see doctors for primary care
                                                                                 The -- the -- you know, these PowerPoints were
                                                                    4
     purposes, but instead go for the purposes listed on this
                                                                       not the only things that were said in the orientation.
5
                                                                    5
     bullet point -- or this slide that says, "Why does the
                                                                    6
                                                                            0
                                                                                 What was --
 6
     inmate seek medical attention?"
7
                                                                            Α
                                                                                 There was more discussion going on.
8
              MR. KNOTT: Object. I think it misstates the
                                                                   8
                                                                                 Okay. Was -- do you remember anybody saying
                                                                            0
          document. Foundation for her personal knowledge.
                                                                   9
                                                                       anything to say, this PowerPoint is actually wrong?
9
10
               I don't specifically remember them discussing
                                                                   10
                                                                                 I -- there may have been more further
11
     this, but this -- what I think is, this could be some of
                                                                   11
                                                                       clarification. I don't know that they said the
     the motivations of a -- of an inmate seeking care,
                                                                       PowerPoint was wrong, but there was probably more
12
                                                                  12
13
    but...
                                                                  13
                                                                       discussion.
14
               Do you see -- here, I'm going to make this a
                                                                  14
                                                                            0
                                                                                 If you present with chest pain to a doctor, do
15
    little bigger here. On the next page it says, "What is
                                                                  15
                                                                       you want the doctor to focus on what you want, or what's
     your doctor's goal when he sees you in the office," do
                                                                       wrong with you?
16
                                                                  16
17
     you see that?
                                                                  17
                                                                            Α
                                                                                 Usually, if I go with pain, I want the pain to
                                                                       go away, so that's a want. I want them to figure out
18
         Α
               Yes.
                                                                  18
          0
              And it says, "The doctor wants to understand
                                                                       why I'm having chest pain, and to do something about it.
19
                                                                  19
20
     what you want," do you see that?
                                                                   20
                                                                                 Do you think a person who's in jail might want

                                                                                 MR. KNOTT: Argumentative. Speculative.
     see me today? So that is kind of what they want.
                                                                            Overly broad. Answer, if you're able.
24
                                                                   24
25
               Okay. Do you order -- the next line says, the
                                                                   25
                                                                            Α
                                                                                 Yes.
                                                     Page 219
                                                                                                                        Page 221
     -- if a patient says, "Well I want you to figure out
1
                                                                   1
                                                                       BY MR. WEIL:
2
     what's wrong with me," is that what you try to do?
                                                                   2
                                                                                 Do you think Ms. Boyer wanted to be
3
         Α
               Yes.
                                                                   3
                                                                       comfortable, or do you think she wanted to be healthy,
 4
               Do you think you should approach patients
                                                                    4
                                                                       when she came complaining of chest pain?
5
     differently in the jail, if a patient comes to you and
                                                                   5
                                                                                 MR. KNOTT: Foundation. Speculation.
     says, "I want you to figure out what's wrong with me?"
                                                                                 I -- I think she wanted someone to pay
6
                                                                   6
7
              No. I treat my -- the -- or the -- I treat
                                                                   7
                                                                       attention to her complaint, and I think we did.
     patients and inmates the same. I would -- I think that
                                                                   8
                                                                                 Why do you think she wanted someone to pay
8
9
     sometimes their motivations are not always clear in
                                                                   9
                                                                       attention to her complaint? Because she was
     jail, as they're not always clear on the outside either,
                                                                       uncomfortable, or because she was worried that she was
10
                                                                  10
                                                                       sick?
11
     SO...
                                                                  11
12
               Okay. This is a "Remember, you want to be
                                                                  12
                                                                                 MR. KNOTT: How is this not speculative?
          0
13
    healthy," do you see that?
                                                                  13
                                                                            Foundation. Speculation.
14
         Α
                                                                  14
                                                                            Α
                                                                                  She was comfortable because that -- she was
15
               And "the inmate wants to be comfortable,"
                                                                  15
                                                                       complaining of pain.
    right?
                                                                                 Okay. Do you think that her concern was that
16
                                                                  16
                                                                       she was uncomfortable or that she might be having a
17
         Α
               Yes.
                                                                  17
               Do you believe that immates just want to be
                                                                       serious medical issue?
18
                                                                  18
19
     comfortable, when they come to a doctor in the jail?
                                                                  19
                                                                                 MR. KNOTT: Foundation. Speculation.
20
              MR. KNOTT: Overly broad. Foundation.
                                                                   20
                                                                                 Again, that's hard to know.
                                                                            Α
          Speculation.
                                                                                 Did ACH instruct you that it's okay to treat
21
                                                                   21
22
         Α
              I think that's one of the reasons they might
                                                                   22
                                                                       patients on the outside different than patients in a
23
     see me.
                                                                   23
                                                                       jail?
24
               Why -- why is that the only reason listed --
                                                                   24
                                                                                 MR. KNOTT: Argumentative.
                                                                                 There are certain things in the jail that we
    why do you think that's the only reason listed on this
25
                                                                   25
                                                                            Α
```

21
          Q
              Okay.
                                                                  21
               It's a long term chronic illness that can be
                                                                   22
                                                                                 Is that -- is that statement that you doubt
22
          Α
     treated on the outside, and it doesn't need to be
                                                                       you'd start treatment, based on your experience treating
23
                                                                   23
     emergently treated while they're in jail.
                                                                       detainees in jails over the last several years?
24
                                                                   24
              Ms. Pisney, I'm just asking what ACH told you.
                                                                   25
                                                                                 That's my understanding of how the short-term
25
                                                     Page 223
                                                                                                                        Page 225
                                                                       correctional care is taken care of. If they were
1
    Did ACH tell you that they don't treat hepatitis C in
                                                                   1
2
                                                                   2
                                                                       transferred to prison, they would be treated in prison.
                                                                                 And that's -- your understanding is based on
3
               There are no strict protocols for treatment
                                                                   3
                                                                       encountering multiple people with hepatitis C in jail,
 4
     given out by ACH, each case is individual.
                                                                   4
5
               Okay. Did ACH ever tell you that they don't
                                                                   5
                                                                       and seeing the treatment that they're given for that
     treat Hepatitis C in jail, regardless of what's in
6
                                                                   6
                                                                       disease; is that right?
7
     protocols?
                                                                   7
                                                                                 MR. KNOTT: It's asked and answered. And you
              MR. MCCAULEY: Did Ms. Boyer have hepatitis C?
                                                                             just brought it around to argue with her.
8
                                                                   8
9
          I don't remember that, so...
                                                                   9
                                                                                 It depends on what treatment you're
               MR. WEIL: You can -- we've made a Monell
                                                                       discussing. Are they having a complication from their
10
                                                                   10
          claim about how ACH treats people in jail.
                                                                       hepatitis C, or are we talking about curing them of
                                                                   11
11
12
    BY MR. WEIL:
                                                                   12
                                                                       their hepatitis C? Because if they have a complication,
                                                                       I would treat them for that complication.
13
         0
               Can you answer the question, Ms. Boyer?
                                                                  13
14
         Α
              I'm Ms. Pisney.
                                                                  14
                                                                                 Okay. And if it's curing for hepatitis C?
15
              Or Ms. Pisney, I'm sorry. I'm sorry.
                                                                  15
                                                                                 That's -- they had it when they came in, and
                                                                       it's not the jail's responsibility to treat them for
              No. No one specifically told me that, but
16
                                                                  16
     it's -- there are things that are not treated in jail
                                                                  17
                                                                       hepatitis C -- for a cure.
17
     because it's a short term incarceration.
                                                                                 Okay. And so your understanding based on the
18
                                                                  18
19
               You've encountered multiple people with
                                                                  19
                                                                        -- you told me, I'm just trying to understand where the
20
    hepatitis C in jail, and the practice has been not to
                                                                  20
                                                                       basis of your statement that, we don't treat hepatitis C
     treat them for hepatitis C while they're in jail; is
                                                                   21
                                                                       in jail, or words to that effect. I don't want to put
21
22
     that right?
                                                                  22
                                                                       words in your mouth, but that hepatitis C -- treatment
                                                                       for hepatitis C is not provided in jail. I'm just
23
               MR. KNOTT: Object to form of the question.
                                                                  23

MR. KNOTT: Asked and answered. Overly broad -- multiple.

It depends on what you mean by treated.

Okay. And you said that it depends -- if I understand you correctly, if there's an emergent complication from hepatitis C, that would be treated. But hepatitis C itself would not; is that correct?

MR. KNOTT: Asked and answered. Vaque. Overly broad. Foundation for her knowledge.

I said that if they were on treatment when 16 they came into jail, that treatment would continue. That 17 if there was a complication they had from their 18 hepatitis C, that would be treated. But we would not 19 likely start treatment for a cure, while they were in 2.0 21 jail.

What is the foundation for that statement that, "We would not likely start treatment for a cure while they were in jail"? Is that based on something you've been told? Is it based on what you've observed Page 228

whether there's a complication. For the remainder, she 2 said, there's no treatment. I'm just trying to

understand the basis for that statement. 3

It's just from my experience --

Okay. How many --Q

Α -- in providing care.

Okay. How many -- since you started working for ACH, how many jail detains have you encountered, who

have hepatitis C? 9

I couldn't say how many.

Q Can you provide me an estimate?

Maybe 20? I don't know. I have no idea.

13 Q Is your statement based on your experience 14 with those 20 patients?

15 MR. KNOTT: What statement? Vaque. Overly 16

17 I have multiple -- I have great experience treating hepatitis C on the outside. But -- and again, 18

if I have a patient that is being currently treated with 19 the medications to cure hepatitis C, and they have those 20

21 medications, they continue on those medications. But

it's not a medication I would start in jail. 22

23 And -- okay.

Because I couldn't continue to follow them, 24 Α 25

once they're released from jail.

Page 227

for prisoners, or jail inmates? Or is it based on any -- something else?

It's based on my understanding, of what we 3 4 treat when patients are in jail.

What is the basis of your understanding? That's what I'm asking.

That's a chronic, long-term medical condition Α that they came in with. It's not -- it's not going to cause any urgent problem while they're in jail, and they will be released, and can be treated on the outside for their hepatitis C.

I understand the reasoning, but whether they're treated or not, as I understand it, you're saying, that they are not treated. And that's your experience; is that right?

MR. KNOTT: Argumentative. Multiple times, 16 17 asked and answered.

MR. WEIL: I'm -- so --

19 MR. KNOTT: I know you want the sound bite, 20 but you can't just keep asking the same question. 21

BY MR. WEIL: I'm just trying to understand where she got this information from. That's all. She said that we don't treat hepatitis C in jail, she's identified two exceptions to that, whether treatment's ongoing or

Page 229 1 Okay. Oh, I'm sorry. I still have this 2 Exhibit 31 up. Do you see the next slide says, "What do we do when we hire a doctor?" 3

COURT REPORTER: You took it down.

5 Oh, I'm sorry. Did I take it down? Oh, here. You know what? There's two steps you need to do to 6 7 share. Do you see that next slide, Ms. Pisney?

Α

9 And, "Train the doctor in correctional healthcare," do you see that? 10

Α Yes.

12 Q Did you receive training in correctional healthcare, outside of these two days in Peoria that 13 14 we've been discussing?

15 In discussions with Dr. Schamber, he oriented me to the Monroe County Jail. He provided any questions 16 -- or any answers to questions that I had. So the 17 ongoing conversations I had with him. 18

19 Okay. So you've had ongoing conversations 20 with Dr. Schamber since that initial training?

Α

22 0 But the training that you received when you 23 get hired, when you got hired, was this two day 24 orientation in Peoria; is that right?

25 MR. KNOTT: Form.

14

15

20

4

7

12

Page 230 A In relation to correctional healthcare, I had my experience, and training, and education as a nurse

3 practitioner prior to that.

- Q Here's another slide. It says, "Why the difference?" And I believe, it's like, what do we do when we hire a doctor? We train them in correctional healthcare. The next slide says, "Why the difference," do you see that?
- 9 A Yes.

1

2

5

6

7

8

1

4

8

9

10

11

- 10 Q Okay. And it says, "They want to get 11 comfortable." Is that referring to detainees?
- 12 A That's my inference. Yes.
- Q And that's to be distinguished from people in the free world; is that right?
- 15 MR. KNOTT: Foundation. Speculation.
- 16 A Sure. I'm asking what you were trained. Were 17 you told that detainees are different than people in the 18 free world, because they want to get comfortable, as 19 distinguished of people in the free world?
- 20 A I -- I think the gist of what I got from the 21 training, was that sometimes their motivations for 22 seeking care is not straightforward.
- 23 Q Okay. That's like anybody, right?
- 24 A Yes. That -- anybody --
- Q Whether they're in jail or not, correct?

A No.

- Q Okay. I'm trying to understand, did they
 explain why this difference was relevant, if your job is
 to perform a differential diagnosis?
- A My -- my job is to care for the patient that's in front of me. And I treat the detainees as I would any other patient.
- 8 Q Meaning, any other patient on the outside, 9 right?
- 10 A Yes. Correct.
- 11 Q So you're not trying to figure out what the 12 patient wants. You're trying to figure out what's wrong 13 with them, right?
 - A Correct.
 - Q And that's what a differential diagnosis is?
- 16 A That's part of it.
- Q Okay. Do you have any understanding then, why they would -- why ACH should be describing a difference between detainees and people on the outside?
 - MR. KNOTT: Foundation. Speculation.
- 21 A There are some differences in correctional 22 healthcare, than there is on the outside --
- 23 Q I -- right. I'm sorry. Go ahead.
- 24 A I think that -- like I said, the motivation 25 can sometimes be different. But my practice was to
- 25 can sometimes be different. But my practice was to

Page 231

- A That's true.
- 2 Q So what difference was ACH identifying with 3 people in jail versus people in the free world?
 - MR. KNOTT: Foundation. Speculation.
- 5 A You have to be more alert for misuse of 6 medication, or misuse of drugs in jail than you would on 7 the outside, necessarily.
 - Q Do you -- okay. Did you ever get an indication that Ms. Boyer was seeking some sort of drug or other, when she came to you with healthcare complaints?
- 12 A I did not. I knew she was taking oxycodone in 13 large amounts on the outside, but...
- 14 Q And that had been prescribed for her on the 15 outside, right?
- 16 A Yes.
- 17 Q That's the information you had?
- 18 A Yes
- 19 Q And you were trained that jail detainees want 20 medications to handle anxiety; is that right?
- 21 A They sometimes do. Yes.
- Q Okay. And is -- should that training -- this difference between jail detainees and others, were you instructed that should affect the way you perform a
- 25 differential diagnosis?

1 treat all of my patients as the same.

- Q I understand that as you were describing,detainees are in the jail for a short amount of time.
 - A Correct
- 5 Q And I believe you said, that changes some of 6 the ways you provide care for them, right?
 - A Yes.
- 8 Q But this difference isn't -- this, "Why the 9 difference," slide is not describing detainees being in 10 jail for a short amount of time. It's describing other 11 attributes of detainees; is that right?
 - MR. KNOTT: Foundation. Speculation.
- 13 A Yeah. I can't say what motivated them to make 14 this slide.
- 15 Q Okay. Fair to say that it sounds like ACH is 16 just trying to tell you that detainees are different 17 than people on the outside, in terms of what they seek
- 18 healthcare for?
- MR. KNOTT: Argumentative. Foundation. Asked
 and answered.
- 21 A Again, I -- I don't know their motivation for 22 this particular slide.
- Q Well, is that -- do you have any recollection of this instruction -- this orientation and what you

25 were told?

Page 232

Page 233

7

14

15

16

22

25

1

3

5

6

7

8

20

Page 237

Page 234 1 Not this specific one. No. But I know that anytime you go into a talk, there are going to be more 2 discussion than what's just strictly on the slide. They 3 could be saying that this may be what the normal person thinks about inmates, but it's different. So I don't --5 I don't remember. 6

If a normal person thought these things about inmates that are on this, "Why the difference," slide, do you think that would be fair to the detainees?

MR. KNOTT: Foundation. Vaque. Overly broad.

11 MR. MCCAULEY: Object to form.

MR. KNOTT: Calls for speculation. 12

13 I think everybody that goes into healthcare wants to take good care of patients, and make them 14 comfortable, make them better, and treat them with 15 respect. And that's what I do. 16

BY MR. WEIL: 17

7

8

9 10

18 Let's see, I may be close to done here, Ms. Pisney. You mentioned a moment ago that you recall 19 20 seeing about 20 detainees who had hepatitis C; is that 21 right?

Maybe. I don't know that I always even knew 22 Α 23 if they had hepatitis C or not.

24 Right. You're reviewing -- when you treat 25 detainees, you would often review their medical history;

Page 235

1 is that right?

2

7

9

10

11

12

13

14

What they knew of their medical history.

3 Okay. And is the, your estimate that you saw 4 somewhere around 20 detainees with hepatitis C, based on 5 those encounters that you'd have with detainees, when 6 you came to the jail and would interview them?

> Α Yes.

8 Q Okay.

> Yes. I -- I didn't see every detainee, and I saw maybe three or four detainees, every time I came.

Okay. And so, could it have been more than 20 detainees or less than 20 detainees that had hepatitis C, that you encountered in your time at the

15 Yes. Very possible. I really don't have any Α idea how many. 16

Do people suffering from hepatitis C often 17 suffer, have complications from hepatitis C, as a result 18 19 of that condition?

20 Nope. Most of them never even know they have Α 21 it.

22 Okay. But some do, correct? Because they're experiencing symptoms with hepatitis C? 23

24 Perhaps. If it's been there for many years, 25 they can develop cirrhosis of the liver and liver

Page 236 cancer. But that's after having had hepatitis C for

2 several years.

For detainees who had developed cirrhosis of 3 0 4 the liver, was it still the case that they would not be provided with care for hepatitis C, while they're at the 5 6 jail?

MR. MCCAULEY: Object to form.

8 Α I didn't know -- yeah. I didn't know if they 9 had cirrhosis or not. We didn't have blood work on most 10 patients that came to the hospital. There was nobody 11 that I saw that was ever jaundiced. So I don't think anybody had severe liver disease, when I saw them in the 12 jail. 13

Do you have an estimate of about how long a detainee is typically at the jail -- the jails you

17 It ran the gamut from, you know, some of the 18 longest ones may have been there for a year or two. And some can be there for a day. 19

20 Hepatitis C can now be treated with a fairly 21 short course of medication; is that right?

That's correct.

23 Q Okay. And it lasts about -- I think about a 24 month; is that right?

Α Eight weeks.

Α

0 So, two months? Correct.

Okay. Notwithstanding that shorter time frame that's now available, you -- ACH didn't treat detainees 4

with hepatitis C in jail; is that right?

MR. KNOTT: Willful misstatement of the record. Willful misstatement of what she said multiple times.

9 I don't know that there's any clear instructions given us, not to treat people for hepatitis 10 C. But again, it's a chronic illness that many people 11

12 don't have any symptoms of, that takes many years to

develop cirrhosis, and that patients can be treated on 13

14 the outside. And when they are incarcerated for longer, they're given that option of treatment as well. 15

BY MR. WEIL: 16

And the reasons you've just provided, those 17 are the reasons that ACH doesn't provide treatments for 18 19 Hepatitis C in jail?

MR. KNOTT: Willful misstatement of testimony.

Again, I never received specific instructions 21 22 to not treat hepatitis C in the jail.

23 Okay. You just gave me a list of reasons or 24 factors, why were you giving me that list of -- they're not there for a long time, it takes a while --25

13

14

COURT REPORTER: We are back on the record for the deposition of Lisa Pisney, being conducted by video conference. My name is Sydney Little. Today is March 3, 2022. And the time is 5:05pm. BY MR. WEIL:

Ms. Pisney, I just have a couple more questions and I'll be done. Turning you to Exhibit 19, which we've been going over, this chest pain protocol. If you had been provided the information that's written Page 240

do take complaints like that serious. And -- but again, 2 you know, someone might say that if they're having a

panic attack as well. So it's hard to know what you 3

would do in retrospect. I could tell you what I would

5 like to have done in retrospect, but with the

information I had at the time, I do believe that I 6

7 provided good care.

8 When -- we discussed hepatitis C for a bit, 9 when someone has been ordered medication and you believe 10 -- or have learned that they're leaving the jail soon, 11 do you withhold ordering that prescription, if they're leaving soon? 12

> Α No.

0 Okay. I'm going to show you Exhibit 26, which is an e-mail from Amber Fennigkoh to a woman named Sarah Malloy (phonetic). Do you see that in front of you?

I see it. But I can't read it.

18 Sure. I'm going to make it a little -- I'm just interested, this looks like somewhat -- the -- I'll 19 20 say that the blackout lines on the left hand side, I 21 understand are the name of different patients. Okay?

And they're redacted for privacy purposes. There's a patient here that says, "Saw Lisa, she ordered," and said one, continue to take -- oh, I'm

Page 239

in this protocol, under the S and the O letters, would you have sent Ms. Boyer to the emergency room?

MR. KNOTT: Foundation. Speculation.

It's hard to know how that might have changed my thinking. There are a few things on here, like her medications, but they're mostly dealing with high blood pressure. And I already knew she had some issues with high blood pressure. The heart history may have changed my thinking, but I may have waited and done the same thing as I did. Say, you know, If it continues, let me know, and we'll go from there. So it's hard to know.

So, if you'd been provided the rest of this information at around 8:09 p.m., when the -- you see 8:09 p.m.'s written on the form there, up on the top?

Α Yeah. Yes.

Assuming this, you recall this information was provided to you around 8:09 p.m., or thereabouts, if you'd been provided all the information that's under the S and the O on this form, you would not have attempted to rule out heart attack at that time, under the differential diagnosis; is that right?

MR. KNOTT: Foundation. Speculation.

23 I think the thing that would be most 24 concerning to me was her complaint of, "I'm not right." And specifically, I don't remember hearing that, but I 25

Page 241 sorry. I'm on the wrong one. This up here, "Diabetic, 1

2 four times per day. Not very compliant. All orders are

3 in. I reviewed with Lisa. Did not send any sheet to

pharm, is hoping he gets out," do you see that?

Α Yes.

Is it -- is that a familiar practice to you in terms of not ordering certain medications, because it appears that the detainee is going to be released or get out soon?

MR. KNOTT: Object. It misstates the prior testimony. And calls for speculation, as to this particular patient. And there's no evidence that there's a practice.

14 Yeah. I don't even know what that means. I have no idea. I mean, I don't know what, "Diabetic, 15 four times a day, " means, "All orders are in, " it says, 16 so I don't -- I have no idea what that means. 17

BY MR. WEIL: 18

19 So this, if Ms. Fennigkoh is indicating here 20 that medication was ordered for a person, but it was not 21 sent to be filled at the pharmacy, as there was a hope 22 that the person might get out. That would be a real 23 departure from practice, as far as you know; is that 24 right?

MR. KNOTT: Misstates the prior testimony.
